And there are three versions of the COF-C02 preparation engine for you to choose: the PDF, Software and APP online.

Snowflake SnowPro Core Certification Exam Sample Questions (Q18-Q23):

NEW QUESTION # 18

A user wants to add additional privileges to the system-defined roles for their virtual warehouse. How does Snowflake recommend they accomplish this?

- A. Grant the additional privileges to the ORGADMIN role.
- **B. Grant the additional privileges to a custom role.**
- C. Grant the additional privileges to the ACCOUNTADMIN role.
- D. Grant the additional privileges to the SYSADMIN role.

Answer: B

NEW QUESTION # 19

What metadata is stored for each micro-partition? (Select TWO)

- A. The clustering key used in the table
- B. The average depth of values for each of the columns
- **C. The number of distinct values**
- **D. The minimum and maximum values for each of the columns**
- E. The range of values for each of the columns in the full table

Answer: C,D

NEW QUESTION # 20

Which task is supported by the use of Access History in Snowflake?

- A. Cost monitoring
- **B. Compliance auditing**
- C. Performance optimization
- D. Data backups

Answer: B

Explanation:

Access History in Snowflake is primarily utilized for compliance auditing. The Access History feature provides detailed logs that track data access and modifications, including queries that read from or write to database objects. This information is crucial for organizations to meet regulatory requirements and to perform audits related to data access and usage.

Role of Access History: Access History logs are designed to help organizations understand who accessed what data and when. This is particularly important for compliance with various regulations that require detailed auditing capabilities.

How Access History Supports Compliance Auditing:

By providing a detailed log of access events, organizations can trace data access patterns, identify unauthorized access, and ensure that data handling complies with relevant data protection laws and regulations.

Access History can be queried to extract specific events, users, time frames, and accessed objects, making it an invaluable tool for

compliance officers and auditors.

NEW QUESTION # 21

Which privilege is needed for a Snowflake user to see the definition of a secure view?

- A. USAGE
- B. CREATE
- C. OWNERSHIP
- D. MODIFY

Answer: C

Explanation:

To see the definition of a secure view in Snowflake, the minimum privilege required is OWNERSHIP of the view. Ownership grants the ability to view the definition as well as to modify or drop the view. Secure views are designed to protect sensitive data, and thus the definition of these views is restricted to users with sufficient privileges to ensure data security.

Snowflake Documentation: Secure Views

NEW QUESTION # 22

The following JSON is stored in a VARIANT column called src of the CAR_SALES table:

```
{
  "customer": [
    {
      "address": "San Francisco, CA",
      "name": "Jane Doe"
    }
  ],
  "date": "2022-01-28",
  "dealership": "Town Auto Sales",
  "salesperson": {
    "id": "55"
  }
}
```

A user needs to extract the dealership information from the JSON.

How can this be accomplished?

- A. select dealership from car_sales;
- B. select src:Dealership from car_sales;
- C. select src.dealership from car_sales;
- D. select src:dealership from car_sales;

Answer: C

Explanation:

In Snowflake, to extract a specific element from a JSON stored in a VARIANT column, the correct syntax is to use the dot notation. Therefore, the query `select src.dealership from car_sales;` will return the dealership information contained within each JSON object in the src column.

NEW QUESTION # 23

.....

The most advantage of our COF-C02 exam torrent is to help you save time. It is known to us that time is very important for you. As the saying goes, an inch of time is an inch of gold; time is money.
