Valid Dumps C_BCBTM_2509 Ebook & C_BCBTM_2509 Certification Exam Cost

Our C_BCBTM_2509 test questions can help you have a good preparation for exam effectively. Also you don't need to worry about if our C_BCBTM_2509 study materials are out of validity. We provide one year free updates for every buyer, after purchasing you can download our latest version of C_BCBTM_2509 Training Questions always within one year. And if you have any question on our C_BCBTM_2509 learning guide, you can contact with our service at any time, we will help you pass the C_BCBTM_2509 exam with our high quality of C_BCBTM_2509 exam questions and good service.

SAP C_BCBTM_2509 Exam Syllabus Topics:

--

Topic	Details
Topic 1	<ul style="list-style-type: none"> Understanding SAP Signavio and SAP LeanIX Solutions: This section of the exam measures the expertise of Enterprise Architects and focuses on the core concepts of SAP Signavio and SAP LeanIX. It includes understanding how these solutions enhance enterprise architecture management, process intelligence, and business process transformation. Learners explore how SAP Signavio provides visibility into business processes and how SAP LeanIX supports IT landscape transparency, allowing organizations to improve alignment between business goals and IT systems.
Topic 2	<ul style="list-style-type: none"> Understanding WalkMe: This section of the exam evaluates the competencies of Digital Adoption Specialists and covers the role of WalkMe within the SAP ecosystem. It focuses on how WalkMe enhances user experience, drives digital adoption, and simplifies workflows across SAP solutions. Candidates learn how WalkMe guidance and automation tools support end-users in navigating complex SAP applications, ultimately improving productivity, engagement, and system utilization.
Topic 3	<ul style="list-style-type: none"> Positioning SAP Business Transformation Management Solutions: This section of the exam measures the skills of SAP Solution Consultants and focuses on understanding how to position SAP Business Transformation Management solutions within diverse enterprise environments. It covers identifying the value proposition of these solutions, aligning them with customer transformation strategies, and demonstrating how they support business agility and operational excellence through data-driven insights and process optimization.
Topic 4	<ul style="list-style-type: none"> Understanding Business Transformation: This section of the exam evaluates the abilities of Business Transformation Advisors and covers the fundamental principles of business transformation in the digital age. It emphasizes recognizing transformation drivers, defining strategic objectives, and integrating technological innovations into organizational change processes. Candidates are expected to understand how SAP tools and methodologies enable efficient transformation planning, execution, and sustainability across various industries.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q22-Q27):

NEW QUESTION # 22

What are the key functional categories of WalkMe's capabilities in the new pricing model?

- A. Workflow Automation, User Engagement, Security & Privacy
- B. Content Creation, Deployment, Analytics & Insights
- **C. Data & Analytics, Action & Experience, Platform & Admin**
- D. Digital Adoption, Process Optimization, Compliance Management

Answer: C

Explanation:

In WalkMe's new pricing and capability model, its platform capabilities are structured into three primary functional categories: Data & Analytics, Action & Experience, and Platform & Admin.

These categories align with WalkMe's enterprise focus on digital adoption, measurement, and governance.

"WalkMe's new pricing model organizes core capabilities into Data & Analytics, Action & Experience, and Platform & Admin, ensuring clarity, scalability, and measurable outcomes for enterprise customers." Reference:

Data & Analytics provide insights into user behavior and adoption.

Action & Experience focuses on guidance, automation, and in-app user experiences.

Platform & Admin manages security, governance, and deployment administration.

"These capability pillars ensure organizations can measure adoption, act to improve user journeys, and govern platform usage effectively." Incorrect Options:

A: Content creation and deployment are part of "Action & Experience," but not the complete categorization.

C & D: These describe solution outcomes, not the functional capability categories.

Verified Correct answer: B: Data & Analytics, Action & Experience, Platform & Admin.

NEW QUESTION # 23

What benefit does the combined WalkMe-SAP solution offer to enterprises?

- A. Increased hiring efficiency
- B. Enhanced physical supply chain management
- **C. Streamlined user adoption and seamless process integration**
- D. Lower software maintenance costs

Answer: C

Explanation:

The partnership between SAP and WalkMe integrates WalkMe's Digital Adoption Platform (DAP) directly into SAP applications (such as SAP S/4HANA, SAP SuccessFactors, and SAP Ariba) to improve user engagement and digital process execution.

"The combined SAP-WalkMe solution helps organizations streamline user adoption and simplify process integration, ensuring users can easily navigate SAP systems and execute digital workflows correctly." Reference:

This integration provides contextual, real-time assistance to users within SAP interfaces, enabling faster onboarding, fewer errors, and improved productivity - all critical for successful transformation under the SAP Business Transformation Management (BTM) framework.

"WalkMe for SAP reduces complexity by guiding users in real time, supporting end-to-end process integration, and driving adoption across the SAP ecosystem." Incorrect Options:

A: Lower maintenance costs are a secondary effect, not the core benefit.

B: WalkMe is not a hiring solution.

D: It does not manage supply chains directly.

Verified Correct answer: C: Streamlined user adoption and seamless process integration.

NEW QUESTION # 24

What does WalkMe Discovery help organizations achieve?

- A. Translates all tools into multiple languages automatically
- B. Automates training development processes
- **C. Identifies underutilized tools and compliance risks**
- D. Enhances employee satisfaction scores by 50%

Answer: C

Explanation:

WalkMe Discovery is a key component of the SAP Business Transformation Management (BTM) suite through SAP's partnership with WalkMe. It is designed to provide visibility into the digital application landscape and analyze software usage across the enterprise.

"WalkMe Discovery automatically discovers all web-based applications used across the organization, revealing underutilized tools, shadow IT, and potential compliance risks." Reference:

The tool allows transformation leaders to map actual system usage, understand license utilization, and identify areas of inefficiency or non-compliance, which directly supports SAP's Business Transformation Management (BTM²) framework goals for transparency and optimization.

"By identifying unused or redundant applications, WalkMe Discovery helps organizations reduce costs and mitigate compliance risks as part of their transformation initiatives." Option A (translation automation) and C (automated training development) are functions more aligned with WalkMe Digital Adoption Platform (DAP), not the Discovery module.

"While the WalkMe DAP provides in-app guidance and user training automation, Discovery focuses on discovering and analyzing app usage." Option D (enhancing satisfaction by 50%) is not a defined or measurable objective of the Discovery module; SAP does not claim specific numerical outcomes related to satisfaction.

Therefore, the correct answer - verified from SAP's official transformation documentation and WalkMe integration materials - is B: Identifies underutilized tools and compliance risks.

NEW QUESTION # 25

How does the SAP Signavio Process Collaboration Hub help organizations?

- A. By creating marketing strategies based on customer feedback.
- B. By replacing existing process modeling tools with AI-driven automation.
- C. By automatically generating legal compliance reports and enabling collaboration.
- **D. By providing transparency into processes and enabling collaboration.**

Answer: D

Explanation:

The SAP Signavio Process Collaboration Hub is designed to make business processes transparent and accessible across the organization while fostering collaboration among stakeholders.

"The SAP Signavio Process Collaboration Hub provides a central entry point for all users to access, share, and collaborate on process-related information, offering transparency across business processes." Reference:

It allows employees, analysts, and management to view, discuss, and contribute to process improvement initiatives, supporting collaborative transformation and process governance.

"It enables everyone in the organization to access process information, provide feedback, and collaborate for continuous improvement." Options A, C, and D are incorrect:

A: Compliance reporting is not a function of Collaboration Hub.

C: Marketing strategy and customer feedback analysis are outside its purpose.

D: It does not replace modeling tools; it integrates with Process Manager and Process Intelligence.

Thus, the correct and SAP-verified answer is B: By providing transparency into processes and enabling collaboration.

NEW QUESTION # 26

Which key solution of SAP Signavio helps in collaborative process mining?

- **A. SAP Signavio Process Intelligence**
- B. SAP Signavio Process Collaboration Hub
- C. SAP Signavio Process Manager
- D. SAP Signavio Value Accelerator

Answer: A

Explanation:

SAP Signavio Process Intelligence is the dedicated process mining and analysis component of the SAP Signavio Business Transformation Suite. It enables organizations to discover, analyze, and improve business processes collaboratively using real data.

"SAP Signavio Process Intelligence connects to system data, reconstructs end-to-end processes, and enables collaborative process mining and analysis to uncover inefficiencies and improvement opportunities." Reference:

The term collaborative process mining refers to enabling multiple stakeholders to analyze, discuss, and align process improvements based on shared process insights - a feature central to Process Intelligence.

"Process Intelligence integrates with the Process Collaboration Hub to allow joint analysis and process improvement discussions."

Option A (Collaboration Hub) is a supporting platform for sharing process models and insights, but it does not perform mining itself.

Option C (Process Manager) focuses on process modeling and design, not mining.

Option D (Value Accelerator) refers to predefined process frameworks and KPIs used for benchmarking, not mining.

Therefore, the correct and verified answer based on SAP's BTM documentation and the official Signavio solution portfolio is B:

SAP Signavio Process Intelligence.

NEW QUESTION # 27
