

Practice To Associate-Cloud-Engineer - Remarkable Practice On your Google Associate Cloud Engineer Exam Exam

DOWNLOAD the newest TestsDumps Associate-Cloud-Engineer PDF dumps from Cloud Storage for free:
<https://drive.google.com/open?id=13gWhIdAdVNbeeK1nFG9clagUFkeuP6a>

Our Associate-Cloud-Engineer study guide has three formats which can meet your different needs: PDF, software and online. If you choose the PDF version, you can download our study material and print it for studying everywhere. With our software version of Associate-Cloud-Engineer exam material, you can practice in an environment just like the real examination. And you will certainly be satisfied with our online version of our Associate-Cloud-Engineer training quiz. It is more convenient for you to study and practice anytime, anywhere.

Google Associate-Cloud-Engineer Exam Syllabus Topics:

Section	Weight	Objectives
Planning and configuring a cloud solution	25%	- Configuring storage and database solutions - Configuring compute resources
Configuring access and security	15%	- Managing IAM roles and permissions - Securing data and services

Deploying and implementing a cloud solution	20%	- Implementing networking components - Deploying applications and services
Ensuring successful operation of a cloud solution	20%	- Monitoring and logging - Managing cloud resources
Setting up a cloud solution environment	20%	- Managing billing and identity access - Setting up cloud projects and accounts

First-hand New Associate-Cloud-Engineer Test Pattern - Google Valid Test Associate-Cloud-Engineer Tips: Google Associate Cloud Engineer Exam

At TestsDumps, we are committed to providing candidates with the best possible Associate-Cloud-Engineer practice material to help them succeed in the Google Associate Cloud Engineer Exam exam. With our real Associate-Cloud-Engineer exam questions in Associate-Cloud-Engineer PDF file, customers can be confident that they are getting the best possible Google Associate Cloud Engineer Exam preparation material for quick preparation. The Google Associate-Cloud-Engineer PDF Questions are portable and you can also take their print.

Google Associate Cloud Engineer Exam Sample Questions (Q79-Q84):

NEW QUESTION # 79

You are building an architecture for one of your client with a requirement of streaming millions of requests with high availability and durability along with HIPPA compliance. Which managed service will you prefer?

- A. Cloud Function
- B. Cloud DataProc
- C. RabbitMQ
- D. Cloud Pub/Sub

Answer: D

NEW QUESTION # 80

You need to set up permissions for a set of Compute Engine instances to enable them to write data into a particular Cloud Storage bucket. You want to follow Google-recommended practices. What should you do?

- A. Create a service account and add it to the IAM role 'storage.objectAdmin' for that bucket.
- B. Create a service account and add it to the IAM role 'storage.objectCreator' for that bucket.
- C. Create a service account with an access scope. Use the access scope 'https://www.googleapis.com/auth/devstorage.write_only'.
- D. Create a service account with an access scope. Use the access scope 'https://www.googleapis.com/auth/cloud-platform'.

Answer: B

Explanation:

https://cloud.google.com/iam/docs/understanding-service-accounts#using_service_accounts_with_compute_engine

<https://cloud.google.com/storage/docs/access-control/iam-roles>

NEW QUESTION # 81

You created a Kubernetes deployment by running `kubectl run nginx image=nginx replicas=1`. After a few days, you decided you no longer want this deployment. You identified the pod and deleted it by running `kubectl delete pod`. You noticed the pod got recreated.

```
$ kubectl get pods
```

```
NAME READY STATUS RESTARTS AGE
```

```
nginx-84748895c4-nqqmt 1/1 Running 0 9m41s
```

```
$ kubectl delete pod nginx-84748895c4-nqqmt
```

```
pod nginx-84748895c4-nqqmt deleted
```

```
$ kubectl get pods
NAME READY STATUS RESTARTS AGE
nginx-84748895c4-k6bzl 1/1 Running 0 25s
```

What should you do to delete the deployment and avoid pod getting recreated?

- A. `kubectl delete -deployment=nginx`
- B. `kubectl delete nginx`
- **C. `kubectl delete deployment nginx`**
- D. `kubectl delete pod nginx-84748895c4-k6bzl -no-restart 2`

Answer: C

Explanation:

This command correctly deletes the deployment. Pods are managed by kubernetes workloads (deployments). When a pod is deleted, the deployment detects the pod is unavailable and brings up another pod to maintain the replica count. The only way to delete the workload is by deleting the deployment itself using the `kubectl delete deployment` command.

```
$ kubectl delete deployment nginx
deployment.apps/nginx deleted
```

Ref: <https://kubernetes.io/docs/reference/kubectl/cheatsheet/#deleting-resources>

NEW QUESTION # 82

You built an application on Google Cloud Platform that uses Cloud Spanner. Your support team needs to monitor the environment but should not have access to table data. You need a streamlined solution to grant the correct permissions to your support team, and you want to follow Google-recommended practices. What should you do?

- **A. Add the support team group to the roles/monitoring.viewer role**
- B. Add the support team group to the roles/stackdriver.accounts.viewer role.
- C. Add the support team group to the roles/spanner.databaseUser role.
- D. Add the support team group to the roles/spanner.databaseReader role.

Answer: A

Explanation:

* roles/monitoring.viewer provides read-only access to get and list information about all monitoring data and configurations. This role provides monitoring access and fits our requirements.

roles/monitoring.viewer. is the right answer.

Ref: <https://cloud.google.com/iam/docs/understanding-roles#cloud-spanner-roles>

NEW QUESTION # 83

You want to find out when users were added to Cloud Spanner Identity Access Management (IAM) roles on your Google Cloud Platform (GCP) project. What should you do in the GCP Console?

- A. Open the IAM & admin console to review IAM policies for Cloud Spanner roles.
- B. Go to the Stackdriver Monitoring console and review information for Cloud Spanner.
- C. Open the Cloud Spanner console to review configurations.
- **D. Go to the Stackdriver Logging console, review admin activity logs, and filter them for Cloud Spanner IAM roles.**

Answer: D

Explanation:

Stackdriver logging allows filtering of logs based on resource (i.e. Cloud Spanner) then sub category of granting access will provide info as to when a role was granted to the user.

NEW QUESTION # 84

.....

It will provide you with the Google Associate-Cloud-Engineer dumps latest updates until 365 days after purchasing the Associate-Cloud-Engineer exam questions. Above all, you will obtain these updates entirely free if the Google Associate-Cloud-

Engineer certification authorities issue fresh updates. TestsDumps ensures that you will hold the prestigious Google Associate-Cloud-Engineer certificate on the first endeavor if you work consistently, taking help from our remarkable, up-to-date, and competitive Google Associate-Cloud-Engineer dumps.
