Certificate of Cloud Security Knowledge (CCSK) v4 Preparation Guide

A self study guide for preparing for the CCSK v4 Exam.

Welcome to the Certificate of Cloud Security Knowledge (CCSK), the industry's first user certification for secure cloud computing. The CCSK is designed to ensure that a broad range of professionals with a responsibility related to cloud computing have a demonstrated awareness of the security threats and best practices for securing the cloud.

Basic Facts about the CCSK Examination

The CCSK examination is a timed, multiple choice examination located at <https://ccsk.cloudsecurityalliance.org/>. The examination consists of 60 multiple choice questions, and must be completed within 90 minutes. A participant must correctly answer 80% of the questions to receive a passing score.

It is not possible to pause or stop the examination and finish it at a later date. Therefore, the participant should be properly prepared to take the test before starting, and while you can choose to take the test any time of the day or night, one should budget for 90 minutes of uninterrupted time once you make the commitment to start the test.

If you have any problems with the test itself, or other extenuating circumstances such as network outages that inhibit your ability to complete the test, please contact CCSK Test Support at ccskadmin@cloudsecurityalliance.org.

Studying for the CCSK Examination

The body of knowledge for the CCSK examination is the CSA Security Guidance for Critical Areas of Focus in Cloud Computing v4, the Cloud Controls Matrix (CCM), and the ENISA report "Cloud Computing: Benefits, Risks and Recommendations for Information Security".

With the development of information and communications technology, we are now living in a globalized world. CCSK information technology learning is correspondingly popular all over the world. Modern technology has changed the way how we live and work. When it comes to the study materials selling in the market, qualities are patchy. But our CCSK test material has been recognized by multitude of customers, which possess of the top-class quality, can help you pass exam successfully. On the other hand, our CCSK Latest Dumps are designed by the most experienced experts, thus it can not only teach you knowledge, but also show you the method of learning in the most brief and efficient ways.

Cloud Security Alliance CCSK (Certificate of Cloud Security Knowledge) Exam is a globally recognized certification that demonstrates an individual's knowledge and expertise in cloud security. The CCSK certification is designed for IT professionals, security practitioners, and cloud computing experts who want to validate their skills and knowledge in cloud security. The CCSK certification is vendor-neutral, meaning that it is not tied to any specific cloud platform or technology, and it covers a broad range of cloud security domains, including governance, risk management, compliance, architecture, and operations.

Cloud Security Alliance (CSA) is a not-for-profit organization that is dedicated to promoting best practices for cloud computing security. One of the ways that they do this is through their Certificate of Cloud Security Knowledge (CCSK) Certification Exam. CCSK Exam is designed to test an individual's knowledge of cloud security best practices and provide them with a recognized certification that demonstrates their expertise in this area.

Cloud Security Alliance CCSK (Certificate of Cloud Security Knowledge) Exam is a globally recognized certification that validates the expertise of IT professionals in cloud security. Certificate of Cloud Security Knowledge v5 (CCSKv5.0) certification is designed to assess an individual's knowledge of cloud security principles, best practices, and controls. The CCSK certification is offered by the Cloud Security Alliance (CSA), a non-profit organization that promotes cloud security best practices and education.

Cloud Security Alliance CCSK Practical Information - CCSK Clearer Explanation

We have to admit that the exam of gaining the CCSK certification is not easy for a lot of people, especial these people who have no enough time. If you also look forward to change your present boring life, maybe trying your best to have the CCSK Certification is a good choice for you. Now it is time for you to take an exam for getting the certification.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q46-Q51):

NEW QUESTION # 46

ENISA: "VM hopping" is:

- A. Using a compromised VM to exploit a hypervisor, used to take control of other VMs.
- B. Instability in VM patch management causing VM routing errors.
- C. Looping within virtualized routing systems.
- D. Lack of vulnerability management standards.
- E. Improper management of VM instances, causing customer VMs to be commingled with other customer systems.

Answer: A

NEW QUESTION # 47

What is a commonly used method by which hybrid cloud integrates data centers with public cloud?

- A. Using VPN or dedicated links
- B. Using satellite connections
- C. Using peer-to-peer networks
- D. Using local area network (LAN)

Answer: A

Explanation:

"Hybrid cloud deployments commonly use secure network connections such as VPNs or dedicated links (e.g., Direct Connect or ExpressRoute) to integrate on-premises data centers with public cloud environments."

NEW QUESTION # 48

Which one of the following is the key techniques to create cloud infrastructure?

- A. Automation
- B. Orientation
- C. Data Classification
- D. Orchestration

Answer: D

Explanation:

The key techniques to create a cloud are abstraction and orchestration. We abstract the resources from the underlying physical infrastructure to create our pools, and use orchestration(and automation)to coordinate carving out and delivering a set of resources from the pools to the consumers. As you will see, these two techniques create all the essential characteristics we use to define something as a

"cloud."

NEW QUESTION # 49

Cloud customer can do vulnerability assessment of their whole infrastructure on cloud just like they conduct vulnerability assessment of their traditional infrastructure.

- A. False
- B. True

Answer: A

Explanation:

It is false.

Customer will have to take permission and give notification to cloud service provider.

The cloud owner (public or private) will typically require notification of assessments and place limits on the nature of assessments.

This is because they may be unable to distinguish an assessment from a real attack without prior warning.

NEW QUESTION # 50

Which of the following help to intermediate IAM between an organization's existing identity providers and many different cloud services used by the organization?

- A. Cloud Access Security Broker
- B. Relying Party
- C. Active Director
- D. Federated Identity Provider

Answer: D

Explanation:

One of the better-known categories heavily used in cloud security is Federated Identity Brokers. These services help intermediate IAM between an organization's existing identity providers (internal Security Guidance v4.0 Copyright 2017, Cloud Security Alliance. All rights reserved or cloud-hosted directories) and the many different cloud services used by the organization. They can provide web-based Single Sign

On (SSO), helping ease some of the complexity of connecting to a wide range of external services that use different federation configurations.

NEW QUESTION # 51

.....

You may want to own a CCSK certificate to prove that you are competent and boost excellent practical abilities in some certain area. Thus you will be regarded as the capable people and be respected. Passing the test CCSK certification can help you realize your goals and if you buy our CCSK Guide Torrent you will pass the CCSK exam easily. Our CCSK exam questions are written by the most professional experts, so the quality of our CCSK learning material is wonderful. And we always keep our CCSK study guide the most updated for you to pass the exam.
