It is very worthy for you to buy our product and please trust us.

Cisco Certified Support Technician (CCST) Cybersecurity Sample Questions (Q74-Q79):

NEW QUESTION # 74

What is one benefit of regularly updating documentation in the context of cybersecurity?

- A. Decreasing accountability and traceability of incidents
- B. Increasing the risk of unauthorized access to the documentation
- C. Creating confusion among users accessing the documentation
- **D. Increasing the likelihood of compliance with industry regulations**

Answer: D

Explanation:

Regularly updating documentation helps organizations stay current with industry regulations and best practices. By aligning documentation with compliance requirements, organizations can ensure they are meeting the necessary standards and reduce the risk of potential penalties or legal issues.

NEW QUESTION # 75

What is the main purpose of port scanning in cybersecurity?

- **A. To identify open ports and services running on a target system**
- B. To gather information about potential targets on the internet
- C. To detect intrusions and prevent unauthorized access
- D. To exploit vulnerabilities in the target system

Answer: A

Explanation:

Port scanning is a technique used to identify open ports and services running on a target system. By scanning the ports, a cybersecurity professional can gather valuable information about the target, such as the services and protocols in use, which can help in identifying potential vulnerabilities and securing the system.

NEW QUESTION # 76

Which of the following is a good practice for updating documentation in a secure manner?

- A. Allowing multiple users to directly edit the documentation
- B. Storing the documentation on a publicly accessible server
- **C. Implementing version control and access controls**
- D. Making updates without keeping a revision history

Answer: C

Explanation:

To update documentation securely, it is advisable to implement version control mechanisms that track changes and allow reverting to previous versions if needed. Additionally, access controls should be implemented to ensure that only authorized users can modify the documentation, reducing the risk of unauthorized changes.

NEW QUESTION # 77

Which of the following is a common method used by threat actors to gain access in an Advanced Persistent Threat (APT)?

- A. Application vulnerabilities

- B. Distributed Denial of Service (DDoS) attacks
- C. Firewall misconfigurations
- **D. Social engineering techniques**

Answer: D

Explanation:

Social engineering techniques, such as phishing, spear phishing, or baiting, are commonly employed by threat actors to gain initial access in an APT. By tricking individuals or organizations into revealing sensitive information or executing malicious actions, attackers can bypass traditional security measures and gain a foothold in the target system.

NEW QUESTION # 78

Which technology actively inspects incoming and outgoing network traffic and takes immediate action to prevent security threats?

- A. Server
- **B. IPS**
- C. Firewall
- D. IDS

Answer: B

Explanation:

An Intrusion Prevention System (IPS) is a technology that actively inspects network traffic, both incoming and outgoing, and takes immediate action to prevent security threats. It not only identifies potential threats but also actively blocks or mitigates them in real-time.

NEW QUESTION # 79

.....

Our staff will be on-line service 24 hours a day. I believe that you have also contacted a lot of service personnel, but I still imagine you praise the staff of our 100-160 study engine.
