# 2026 Realistic 1Z0-931-25 Latest Exam Discount - Oracle Oracle Autonomous Database Cloud 2025 Professional Exam Dumps.zip 100% Pass

Testing yourself is an effective way to enhance your knowledge and become familiar with the 1Z0-931-25 exam format. Rather than viewing the 1Z0-931-25 test as a potentially intimidating event, Lead2Passed Oracle Autonomous Database Cloud 2025 Professional (1Z0-931-25) desktop and web-based practice exams help candidates assess and improve their knowledge. If your 1Z0-931-25 Practice Exams (desktop and web-based) results aren't ideal, it's better to experience that shock during a mock exam rather than the 1Z0-931-25 actual test.

You can get three different versions for 1Z0-931-25 exam dumps. The 1Z0-931-25 pdf file is the common version which many candidates want to choose. The 1Z0-931-25 pdf dumps can be printed into papers, which is convenient to reviewing and remember. The 1Z0-931-25 PC test engine is suitable for any windows system, which can simulate the actual test. While the 1Z0-931-25 Online Test engine can be installed on any electronic device, supporting off-line study. You can choose the proper version as your needs for 1Z0-931-25 test preparation.

>> 1Z0-931-25 Latest Exam Discount <<

Efficient 1Z0-931-25 Latest Exam Discount Provide Prefect Assistance in 1Z0-931-25 Preparation

Once you purchase our windows software of the 1Z0-931-25 training engine, you can enjoy unrestricted downloading and installation of our 1Z0-931-25 study guide. You need to reserve our installation packages of our 1Z0-931-25 learning guide in your flash disks. Then you can go to everywhere without carrying your computers. For it also supports the offline practice. And the best advantage of the software version is that it can simulate the real exam.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q32-Q37):

NEW QUESTION # 32
Which option describes the connection types that third-party software can use to connect to an Autonomous Database (ADB)?

- A. SQL*NET only
- B. New ADB-specific protocols
- C. Any protocol supported by Oracle Net Services
- D. JDBC only

Answer: C

Explanation:
Third-party software can connect to an Autonomous Database using standard Oracle connectivity options. The correct answer is:
Any protocol supported by Oracle Net Services (B): Autonomous Database leverages Oracle Net Services (also known as SQL*Net) for connectivity, supporting protocols like TCP/IP with TLS for secure communication. This allows a wide range of third-party tools (e.g., SQL Developer, Tableau, or custom applications) to connect using established Oracle networking standards.
The incorrect options are:
New ADB-specific protocols (A): There are no proprietary, ADB-specific protocols; it uses Oracle's existing Net Services framework.
SQL*NET only (C): While SQLNet is part of Oracle Net Services, the broader term "Oracle Net Services" encompasses all supported protocols, not just SQLNet.
JDBC only (D): JDBC is a specific Java-based API for database connectivity, not a protocol, and it's just one of many ways to connect via Oracle Net Services.
This flexibility ensures compatibility with diverse client applications.

NEW QUESTION # 33

Which two actions can you perform with Autonomous Data Guard enabled on Autonomous Database on Shared Infrastructure?
(Choose two.)

- A. Reinstate
- B. View Apply Lag
- C. Switchover
- D. Change Protection Mode
- E. Failover

Answer: C,E

Explanation:
Autonomous Data Guard on Shared Infrastructure enhances ADB availability with standby databases. The two correct actions are:
Switchover (C): A switchover swaps roles between the primary and standby databases in a planned manner, with no data loss (RPO = 0). You initiate this via the OCI console (e.g., "Switchover" button on the primary ADB's Data Guard section) or API (e.g., oci db autonomous-database switchover). For example, before maintenance on the primary, you switch to the standby in another region (e.g., from us-ashburn-1 to us-phoenix-1), taking ~2 minutes (RTO ≈ 2 min). This ensures continuity without downtime, as the standby becomes primary seamlessly.
Failover (D): A failover promotes the standby to primary during an unplanned outage (e.g., primary region failure), also with RPO = 0 due to synchronous replication. Trigger it via the OCI console (e.g., "Failover" on the standby) or API (e.g., oci db autonomous-database failover). For instance, if us-ashburn-1 crashes, the standby in us-phoenix-1 takes over in ~2 minutes, preserving all committed transactions. It's automatic in some cases (e.g., severe failure), but manual initiation is supported too.
The incorrect options are:
View Apply Lag (A): While relevant in traditional Data Guard (measuring replication delay), Autonomous Data Guard on shared ADB uses synchronous replication (zero lag), and apply lag isn't a user-actionable metric exposed in the UI-monitoring focuses on role status, not lag.
Reinstate (B): Reinstatement (restoring a failed primary as a standby) isn't a user action in shared infrastructure. Oracle manages post-failover recovery, and users can't manually reinstate; a new standby might be provisioned instead.
Change Protection Mode (E): Traditional Data Guard offers modes (e.g., Maximum Availability), but in Autonomous Data Guard on shared infrastructure, the mode is fixed (synchronous, akin to Maximum Availability), and users can't modify it-control is limited to switchover/failover.
These actions ensure high availability with user-initiated role changes.

NEW QUESTION # 34

For fleet admins to access dedicated Exadata infrastructure, which policy should be assigned?

- A. Allow group adb-admins to manage autonomous-database in tenancy
- B. Allow group adb-admins to manage autonomous-database-family in tenancy
- C. Allow group adb-admins to manage autonomous-database in tenancy where target.workloadType='OLTP'
- D. Allow group adb-admins to manage autonomous-database in tenancy where target.workloadType='DW'

Answer: B

Explanation:
Fleet administrators managing dedicated Exadata infrastructure in Oracle Autonomous Database require broad permissions across all Autonomous Database resources, including those on dedicated infrastructure.
Correct Answer (B): The policy Allow group adb-admins to manage autonomous-database-family in tenancy grants comprehensive management rights over the entire Autonomous Database family, including dedicated Exadata infrastructure. The autonomous-database-family resource type encompasses all Autonomous Database resources (shared and dedicated) within the tenancy, making it suitable for fleet admins.
Incorrect Options:
A: Limits permissions to databases with the OLTP workload type (Autonomous Transaction Processing), excluding Data Warehouse (DW) or other types on dedicated infrastructure.
C: Restricts access to DW workload types only, omitting OLTP and other configurations.
D: Grants permissions only to autonomous-database resources, which may not fully cover dedicated infrastructure components like Autonomous Container Databases or Exadata Infrastructure.
This policy ensures fleet admins have the necessary scope to manage all aspects of dedicated deployments.

NEW QUESTION # 35
What are three characteristics of Data Lake data captured in Object Storage? (Choose three.)

- A. High concurrency
- B. Mixed data types
- C. Multiple subject areas
- D. Schema on read
- E. High transaction performance

Answer: B,C,D

Explanation:
Data Lakes in OCI Object Storage store raw data for analysis. The three correct characteristics are:
Schema on read (C): Data Lakes store data in its raw, native format (e.g., JSON, CSV, Parquet) without a predefined schema. The schema is applied when data is read or processed, not when written, offering flexibility. For example, a Parquet file with sales data might be queried with SQL only when analyzed, not structured upfront like in a database.
Multiple subject areas (D): Data Lakes aggregate data from diverse sources-sales, HR, IoT-spanning multiple subject areas. This enables cross-domain analysis, like combining customer data with weather data for insights, all stored in a single OCI bucket.
Mixed data types (E): Data Lakes support varied formats: structured (e.g., CSV tables), semi-structured (e.g., JSON documents), and unstructured (e.g., videos). For instance, a bucket might hold CSV logs, JSON events, and image files, all accessible for processing.
The incorrect options are:
High concurrency (A): Data Lakes in Object Storage are not designed for high-concurrency transactional access (e.g., thousands of simultaneous updates). They're optimized for batch processing or analytics, unlike ATP's concurrency focus.
High transaction performance (B): Transactional performance (e.g., fast commits) is a database strength, not a Data Lake's. Object Storage prioritizes scalability and durability over transactional speed, making it unsuitable for OLTP workloads.
These traits make Data Lakes ideal for big data analytics, not real-time transactions.

NEW QUESTION # 36
Which statement is FALSE about the Catalog tool?

- A. You can view the data definition of an entity.
- B. You can delete an entity from the Autonomous Database via the Catalog tool.
- C. Impact shows the entities that depend on the source.
- D. You can limit the display of entities to only those with certain names, schemas, types, or applications by entering values in the Search field.

Answer: B

Explanation:
The Catalog tool in Autonomous Database provides metadata exploration:
Correct Answer (A): "You can delete an entity from the Autonomous Database via the Catalog tool" is false. The Catalog is a read-only interface for viewing database objects (tables, views, etc.) and their relationships; it does not support modification or deletion actions.

True Statements:
B: Filtering by name, schema, type, or application is a core search feature.
C: Viewing DDL (data definition language) for entities is supported.
D: The Impact tab shows dependencies, aiding change analysis.
This ensures safe metadata exploration without risking data changes.

NEW QUESTION # 37

......

We attract customers by our fabulous 1Z0-931-25 certification material and high pass rate, which are the most powerful evidence to show our strength. We are so proud to tell you that according to the statistics from our customers' feedback, the pass rate among our customers who prepared for the exam with our 1Z0-931-25 Test Guide have reached as high as 99%, which definitely ranks the top among our peers. Hence one can see that the Oracle Autonomous Database Cloud 2025 Professional learn tool compiled by our company are definitely the best choice for you.

1Z0-931-25 Exam Dumps.zip: https://www.lead2passed.com/Oracle/1Z0-931-25-practice-exam-dumps.html

1Z0-931-25 Soft test engine can be used in more than 200 personal computers, and they support MS operating system, If you want to consult the passing rate of the 1Z0-931-25 exam braindumps, we can check for you, Oracle 1Z0-931-25 Latest Exam Discount We also provide you with customized test engine, with which you can have an intensive training for better understanding and acquisition of the key points, Oracle 1Z0-931-25 Latest Exam Discount The Company does not assume any responsibility for any actions or consequences of using these third party websites.

The interview is your moment to shine, Steve easily fits in and is a team player, 1Z0-931-25 Soft test engine can be used in more than 200 personal computers, and they support MS operating system.

Crack the Oracle 1Z0-931-25 Exam with Confidence

If you want to consult the passing rate of the 1Z0-931-25 exam braindumps, we can check for you, We also provide you with customized test engine, with which you can have 1Z0-931-25 an intensive training for better understanding and acquisition of the key points.

The Company does not assume any responsibility for any actions or consequences of using these third party websites, We are proud that our 1Z0-931-25 learning questions are so popular in the market.
