# Actual PEGACPLSA23V1 Exam Dumps Will Be the Best Choice to Prepare for Your Exam

What's more, part of that PracticeDump PEGACPLSA23V1 dumps now are free: https://drive.google.com/open?id=1b4tDdJRPk-N3v3LhpQhhjtDfbuvdzC44

Our staff will be on-line service 24 hours a day. I believe that you have also contacted a lot of service personnel, but I still imagine you praise the staff of our PEGACPLSA23V1 study engine. They have the best skills and the most professional service attitude on the PEGACPLSA23V1 Practice Questions. He can solve any problems you have encountered while using PEGACPLSA23V1 exam simulating for all of our staffs are trained to be professional to help our customers. And they are kind and considerate.

Pegasystems PEGACPLSA23V1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Pega Platform Design Extended:Use App Studio for app development. Understand features of Prediction Studio and Admin Studio. Reuse relevant components efficiently. Grasp the basics of UX design, DX API, and Constellation. Design accessible and user-friendly experiences.

Topic 2	• Application Design Extended: Manage work assignment and routing, and use features like Get Next Work. Explore different ways to allocate tasks. Handle mid-case flow changes and fix issues using problem flows. Implement background processing, job schedulers, queue processors, and asynchronous integrations. Understand how to use stream services, data flows, and datasets in Pega Infinity.
Topic 3	• Data Model Design: Understand how data relationships work. Build new data models or extend existing ones. Use data pages and virtualization to manage information. Design reusable and reliable data structures. Learn dynamic class referencing and polymorphism. Extend and benefit from Pega's industry foundation models.
Topic 4	• Pega Platform Design: Understand the value of Center-out architecture in building scalable Pega solutions. Explore how deployment options influence app design, and apply performance monitoring. Work with distributed case designs and know when to include other Pega tools. Learn about multi-tenant systems, high availability, and features like Pega Mobile, IVA, and Process Fabric. Gain insight into containerization, Hazelcast, and cloud architecture. Understand Agile Workbench and Agile Studio tools.

The Pegasystems PEGACPLSA23V1 certification provides is beneficial to accelerate your career in the tech sector. Today, the Pegasystems PEGACPLSA23V1 certification is a fantastic choice to get high-paying jobs and promotions, and to achieve it, you must crack the challenging PEGACPLSA23V1 Exam. It is critical to prepare with actual Certified Pega Lead System Architecture (LSA) Exam 23 (PEGACPLSA23V1) exam questions if you have less time and want to clear the test in a short time. You will fail and waste time and money if you do not prepare with real and updated PEGACPLSA23V1 Questions.

Pegasystems Certified Pega Lead System Architecture (LSA) Exam 23 Sample Questions (Q45-Q50):

NEW QUESTION # 45
Which of the following actions need to be configured for a job scheduler activity?

- A. Record locking
- B. Transaction management
- C. System runtime context
- D. On which node to run

Answer: A

NEW QUESTION # 46
A Customer Service application requires customer data assembled from multiple external systems.
The customer data is captured by a parent case. Subcases of that parent case need to reference the same customer data. The customer data must be as current as possible.
Which two options are used as part of the solution? (Choose Two)

- A. Use the Snapshot data access pattern to capture the customer data prior to subcase spin off.
- B. Use the System of Record (SOR) data access pattern when capturing the customer data.
- C. Load the customer data in parallel using the Load -Data Page and Connect-Wair methods.
- D. Have each subcase load a portion of the customer data prior to updating the parent case.

Answer: B,C

NEW QUESTION # 47
To automate work in the center-out business architecture, you need _____ .

- A. Robotic Process Automation
- B. business process management
- C. business rules engine
- D. case management

Answer: D

NEW QUESTION # 48

Which two benefits does the Search and Reporting Service offer over embedded Elasticsearch? (Choose Two)

- A. Improved row-level security.
- B. Helps in connecting with any full-text search engines.
- C. Independent release cycles for Pega Platform updates.
- D. Eliminates issues with potential loss of data indices when Util nodes crash.

Answer: C,D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Pega's Search and Reporting Service (SRS), as described in Pega Academy'sLead System Architect Mission and thePega Certified Lead System Architect Study Guide, is a managed cloud service that replaces embedded Elasticsearch for full-text search, offering improved reliability and flexibility.
* Option A (Correct): SRS eliminates issues with data index loss when Util nodes crash, as it is a managed service with built-in redundancy and fault tolerance, unlike embedded Elasticsearch, which relies on local nodes. This is documented in theSearch and Reporting Servicesection of Pega Community.
* Option B (Incorrect): Row-level security is managed by Pega's access control mechanisms, not by SRS or embedded Elasticsearch. SRS focuses on search functionality, per theSecurity Designmodule.
* Option C (Correct): SRS operates on independent release cycles from the Pega Platform, allowing updates without impacting core application functionality. This contrasts with embedded Elasticsearch, which is tightly coupled, as noted in theSRS Architectureguidelines.
* Option D (Incorrect): SRS is a specific Pega-managed service, not a generic connector for any full- text search engine. It replaces embedded Elasticsearch but does not support arbitrary engines, per the Search Configurationmodule.
:
Pega Academy:Lead System Architect Mission(covers Search and Reporting Service).
Pega Community:Search and Reporting Service(details on benefits over Elasticsearch).
Pega Certified Lead System Architect Study Guide (v23): Section onPega Platform Architecture(emphasizes SRS advantages).

NEW QUESTION # 49

As a Lead System Architect tasked with enhancing a hotel room booking application, your objective is to streamline the booking process by identifying high-value customers. To accomplish this, you have decided to segment customers based on the total revenue generated from their bookings, considering that customers can have multiple bookings. The revenue is calculated by summing the amounts of all bookings made by each customer. Customers will be categorized as follows: Silver: Total booking amount is less than $500. Gold:
Total booking amount ranges from $500 to $2000. Platinum: Total booking amount exceeds $2000. You want to use SQL functions for efficient customer categorization. Which SQL function code correctly determines the customer categories?

- A. SELECT CASE WHEN {1} < 500 THEN 'Silver' WHEN {1} BETWEEN 500 AND 2000 THEN 'Gold' ELSE 'Platinum' END
- B. IF {1} < 500 THEN 'Silver' ELSE IF {1} BETWEEN 500 AND 2000 THEN 'Gold' ELSE 'Platinum' END
- C. CASE WHEN {1} < 500 THEN 'Silver' WHEN {1} BETWEEN 500 AND 2000 THEN 'Gold' ELSE 'Platinum' END
- D. IF {1} < 500 THEN 'Silver' ELSE IF {1} >= 2000 THEN 'Platinum' ELSE 'Gold' END

Answer: C

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
Pega's reporting framework, as described in Pega Academy'sReporting Missionand thePega Certified Lead System Architect Study Guide, supports SQL-based function aliases in Report Definitions to categorize data.

The CASE statement is the standard SQL construct for conditional logic in Pega reports.
* Option A (Correct): The CASE statement CASE WHEN {1} < 500 THEN 'Silver' WHEN {1} BETWEEN 500 AND 2000 THEN 'Gold' ELSE 'Platinum' END accurately categorizes customers based on total booking amounts. It is syntactically correct and aligns with Pega's SQL function alias syntax, as documented in theFunction Aliassection of Pega Community.
* Option B (Incorrect): The IF statement is not standard SQL syntax in Pega's reporting framework.
Pega uses CASE for conditional logic in Report Definitions, per theReport Definitionmodule.
* Option C (Incorrect): Similar to Option B, IF is not supported in Pega's SQL functions. The correct construct is CASE, as noted in theSQL Functionsguidelines.
* Option D (Incorrect): The SELECT keyword is unnecessary in a function alias, as it is used in full SQL queries, not inline expressions. The CASE statement alone is sufficient, per theFunction Alias Configurationmodule.
:
Pega Academy:Reporting Mission(covers SQL function aliases).
Pega Community:Function Alias Configuration(details on CASE statements).
Pega Certified Lead System Architect Study Guide (v23): Section onReporting Design(emphasizes SQL- based categorization).

NEW QUESTION # 50

......

Time talks. The passing rate for PracticeDump PEGACPLSA23V1 download free dumps is really high. Our users do not worry about tests with our products. There was one big piece missing from the puzzle. As exams are very difficult and low passing rate, it will be useless if you do not purchase valid dumps. Pegasystems PEGACPLSA23V1 Exam Learning materials make you half the work double the things. Once you pass exam you will obtain a satisfied jobs as you desire.
