NEW QUESTION # 82

You have created a project-specific deliverable that is not part of the SAP Activate roadmap in SAP Cloud ALM. What must you create to manage all tasks that are related to that deliverable? Note: There are 2 correct answers to this question.

- A. A custom team
- B. A custom deliverable
- C. A custom release
- D. A custom task

Answer: B,D

Explanation:

SAP Cloud ALM is the primary tool for managing implementation tasks and deliverables for SAP S/4HANA Cloud Public Edition projects. When a project-specific deliverable is created outside the standard SAP Activate roadmap, additional elements must be defined in SAP Cloud ALM to manage related tasks effectively.

* Option A: A custom team Incorrect. A custom team refers to a group of project members assigned to tasks, but it is not directly related to managing tasks for a specific deliverable. The SAP Cloud ALM Documentation states, "Teams in SAP Cloud ALM are used to assign resources to tasks, not to define or manage deliverables."

* Option B: A custom task Correct. Custom tasks are created to define specific activities related to a deliverable. The SAP Cloud ALM Implementation Guide explains, "For project-specific deliverables, custom tasks must be created in SAP Cloud ALM to outline the activities required to complete the deliverable, ensuring traceability and progress tracking."

* Option C: A custom release Incorrect. A custom release is used to manage deployment cycles, not tasks for a specific deliverable. The SAP Cloud ALM Documentation notes, "Releases in SAP Cloud ALM are for planning and executing deployments, not for managing deliverable-specific tasks."

* Option D: A custom deliverable Correct. A custom deliverable must be defined in SAP Cloud ALM to represent the project-specific deliverable, and tasks are then associated with it. The SAP Cloud ALM Implementation Guide confirms, "To manage a project-specific deliverable outside the SAP Activate roadmap, a custom deliverable is created in SAP Cloud ALM, with custom tasks linked to it to manage all related activities." Extract from Official Documentation:

* SAP Cloud ALM Implementation Guide (SAP Help Portal, <https://help.sap.com>): "For deliverables not part of the standard SAP Activate roadmap, a custom deliverable must be created in SAP Cloud ALM.

Custom tasks are then defined and linked to the deliverable to manage all associated activities, ensuring alignment with project objectives."

* SAP Cloud ALM Documentation (SAP Community, <https://community.sap.com>): "Custom deliverables and tasks in SAP Cloud ALM allow project teams to extend the SAP Activate roadmap, providing flexibility to manage project-specific requirements while maintaining structured task management." Additional Context:

SAP Cloud ALM's flexibility allows project teams to incorporate custom deliverables and tasks, ensuring that unique project requirements are managed within the same platform used for standard roadmap activities. This approach maintains visibility and governance over all project tasks, aligning with SAP's cloud-first project management strategy.
