Up to now, we have more than tens of thousands of customers around the world supporting our Plat-Dev-210 training prep. So our Plat-Dev-210 study materials are elemental materials you cannot miss. In your review duration, you can contact with our after-sales section if there are any problems with our Plat-Dev-210 Practice Braindumps. They will help you 24/7 all the time. These services assure your avoid any loss.

## Salesforce Plat-Dev-210 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Integration Procedures: This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>OmniScripts: This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Expression Sets &amp; Decision Matrices: This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Integrated Troubleshooting and Deployment: This final section measures the skills of a Support Engineer and focuses on identifying and resolving issues within Omnistudio tools. It involves diagnosing errors based on given scenarios and determining where breakdowns occur in the data flow for specific customer issues. This ensures the candidate can effectively troubleshoot, debug, and maintain solutions to ensure optimal performance and reliability.</li> </ul>

## How to Prepare For Plat-Dev-210 Exam?

DumpStillValid has a huge team of IT experts, who continue to use their knowledge and experience to study a lot of IT certification examination papers of past few years. Their findings of the research is now the product of DumpStillValid, therefore DumpStillValid's Salesforce Plat-Dev-210 Practice Questions are very similar with the real exam, which can help a lot of people to realize their dreams. DumpStillValid can ensure you to successfully pass the exam, and you can boldly Add DumpStillValid's products to your shopping cart. With DumpStillValid your dreams can be achieved immediately.

## Salesforce Certified Omnistudio Developer Sample Questions (Q75-Q80):

### NEW QUESTION # 75

A developer needs to configure an Expression Set to calculate the sum of the entire BasePrice.

What is the most efficient way for the developer to meet this requirement?

- A. Add an Aggregation Step as SUM(BasePrice).
- B. Add a Calculation Step as SUM(BasePrice).
- C. Add a Sub Expression step as SUM(BasePrice).

**Answer: A**

Explanation:

The Expression Set component in OmniStudio allows developers to perform calculations using steps such as Aggregation, Calculation, and Sub Expression.

\* C. Add an Aggregation Step as SUM(BasePrice) - This is correct. Aggregation steps are specifically designed to perform functions like SUM, AVG, COUNT, MIN, MAX over collections (arrays) of data. In this use case, summing the entire BasePrice array is best handled using an Aggregation Step.

Incorrect Options:

\* A. Sub Expression Step is used to combine or manipulate previously calculated values, not to aggregate across an array.

\* B. Calculation Step is used for row-level calculations, not aggregation across multiple rows.

:

Salesforce OmniStudio Documentation # Expression Sets # Aggregation Step

### NEW QUESTION # 76

Which two of these options can a developer use to retrieve data from a Salesforce object?

Choose 2 answers

- A. A DataRaptor Load Action
- B. A DataRapt or Post Action
- C. A Lookup Input Element
- D. A DataRaptor Extract Action

**Answer: A,C**

Explanation:

A DataRaptor Load Action can be used to retrieve data from a Salesforce object by specifying the object name, fields, and filter criteria. A Lookup Input Element can be used to retrieve data from a Salesforce object by allowing the user to search for a record using a lookup field

### NEW QUESTION # 77

A developer creates an Integration Procedure with a Set Values and a DataRaptor Extract Action that requires AccountId as a key. When the developer previews the Integration Procedure, the developer enters the AccountId correctly and execute the Preview. The developer sees the data extract by the DataRaptor in the Debug Log, but the response is empty.

What is the likely cause of this issue?

- A. The AccountId used for the preview is invalid.

- B. The DataRaptor Action did not have the add response Ro Response JSON property set to true.
- **C. A Response Action was not added to the integration Procedure.**
- D. The Response cannot be previewed directly.

**Answer: C**

Explanation:

According to the OmniStudio Developer Guide, "To return a response from an Integration Procedure, add a Response action as the last action in your Integration Procedure." Therefore, the correct answer is C.

### NEW QUESTION # 78

Refer to the exhibit.

What JSON from the DRGetAccountDetails action would display all six values correctly in the OmniScript structure shown?

BlkContacts is a Repeat Block.

□

- A. □
- **B. □**
- C. □
- D. □

**Answer: B**

Explanation:

According to the OmniScript Data JSON page, the OmniScript structure JSON defines the data elements and their properties that are used in an OmniScript. The exhibit shows an OmniScript structure JSON with six elements: AccountName, AccountNumber, AccountType, AccountOwner, ContactName, and ContactPhone.

The DRGetAccountDetails action is a DataRaptor Extract action that retrieves data from the Account and Contact objects in Salesforce. The BlkContacts element is a Repeat Block that displays a list of contacts related to the account. Therefore, the JSON from the DRGetAccountDetails action that would display all six values correctly in the OmniScript structure shown is option C, which has the following structure:

{The other options have different structures that do not match the OmniScript structure shown. Therefore, the correct answer is C.

□

### NEW QUESTION # 79

A developer is configuring the API URL in an HTTP Action element within an Integration procedure.

What is the merge code syntax for passing a Date node from an element named SetValue in the URL?

- A. %SetValue Date
- **B. {(SetValue. Date)}**
- C. (' Setvalues' [ 'Date']
- D. x%SetValue.Date%

**Answer: B**

Explanation:

The correct syntax for merge codes in Integration Procedure is {{(NodeName)}}, where NodeName is the name of the JSON node in the data source. The other options are either missing the parentheses or using incorrect symbols.

### NEW QUESTION # 80

.....

We provide you with two kinds of consulting channels if you are confused about some questions on our Plat-Dev-210 study materials. You can email us or contact our online customer service. We will reply you as soon as possible. You are free to ask questions about Plat-Dev-210 training prep at any time since that we are working 24/7 online. Our staff is really very patient and friendly. They are waiting to give you the most professional suggestions on our Plat-Dev-210 exam questions.
