Salesforce Order Management Administrator Accredited Professional Sample Questions (Q33-Q38):

NEW QUESTION # 33

When are Fulfillment Orders created by default?

- A. The Status field on the Order Summary entity changes and a platform event which is caught by a flow
- B. During import with a status of Activated
- C. During import with a status of Managed

Answer: A

NEW QUESTION # 34

What are three tools that can be used to deploy changes to a Salesforce Org?

Choose 3 answers

- A. Developer Console
- B. Ant Migration Tool
- C. Salesforce Pull Requests
- D. Change Sets
- E. Release Manager

Answer: A,B,D

NEW QUESTION # 35

The Northern Trail Outfitters (NTO) team is already using Order Management. The team wants to transition from their home-grown Commerce engine to B2C Commerce Cloud. Which action do they need to perform?

- A. Create a Flow to download the Orders from an SFTP location where B2C Commerce drops them and then ingest the data into Order Management
- B. Change the Order Integration Flow in Setup so the org will start seeing the orders flow in
- C. Export the orders from B2C periodically and import them into Order Management using a scheduled job
- D. File a support case to activate an integration between B2C Commerce and Order Management

Answer: B

NEW QUESTION # 36

What three steps are required when deploying changes via change sets?

- A. Deploy the change set in the target org
- B. Add the change set to the release schedule in the target org
- C. Upload the change set to the target org
- D. Approve the change set in the sandbox org
- E. Create the change set in the sandbox org

Answer: A,C,E

Explanation:

Three steps that are required when deploying changes via change sets are:

Create the change set in the sandbox org. This is the first step where the administrator selects the metadata components that they want to deploy and adds them to a change set in the source org, which is usually a sandbox org.

Upload the change set to the target org. This is the second step where the administrator sends the change set from the source org to the destination org, which is usually a production org or another sandbox org. The administrator needs to have a deployment connection with the target org and permission to upload change sets.

Deploy the change set in the target org. This is the final step where the administrator validates and deploys the change set in the destination org. The administrator needs to have permission to deploy change sets and resolve any deployment errors or warnings.

NEW QUESTION # 37

Which three components can be used to modify the user experience in the Order Summary detail page?

- A. Tabs
- B. Related List - Double
- C. Related List-Single
- D. Accordion

Answer: A,C,D

Explanation:

Three components that can be used to modify the user experience in the Order Summary detail page are:

Tabs. Tabs are a type of component that allow users to switch between different views or subpages on a record page. Tabs can contain other components, such as charts, reports, or custom components, that display different information or functionality related to a record. The administrator can use the Lightning App Builder to add and customize tabs on the Order Summary detail page to give users more options and flexibility.

Accordion. Accordion is a type of component that allow users to expand and collapse sections of a record page. Accordion can contain other components, such as fields, related lists, or custom components, that display different information or functionality related to a record. The administrator can use the Lightning App Builder to add and customize accordion on the Order Summary detail page to give users more control and visibility.

Related List-Single. Related List-Single is a type of component that displays a single related list for a record. A related list is a list of records that are linked to another record by a relationship field, such as lookup or master-detail. The administrator can use the Lightning App Builder to add and customize related list-single on the Order Summary detail page to give users more access and context.
