# CDCP Reliable Test Book, Training CDCP Solutions

DOWNLOAD the newest VerifiedDumps CDCP PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1GCIi1AigCHmZ1oGeE7tY36rD1Rh7qzTC

We are concerted company offering tailored services which include not only the newest and various versions of CDCP practice guide, but offer one-year free updates of our CDCP exam questions services with patient staff offering help 24/7. So there is considerate and concerted cooperation for your purchasing experience accompanied with patient staff with amity. Their enrichment is dependable and reliable on the CDCP training braindumps.

VerifiedDumps will provide you with a standard, classified, and authentic study material for all the IT candidates. Our experts are trying their best to supply you with the high quality CDCP training pdf which contains the important knowledge required by the actual test. The high quality and valid CDCP study torrent will make you more confidence in the real test. Additionally, you will get the updated EXIN vce dumps within one year after payment. With the updated CDCP study material, you can successfully pass at first try.

>> CDCP Reliable Test Book <<

Training CDCP Solutions - New CDCP Dumps Ebook

If you want to study with computer, then you can try our Software or APP ONLINE versions. These two versions of our CDCP practice guide helps you to test your knowledge and over the exam anxiety. They have various self-assessment and self-learning tools, like timed exam and exam history, test series etc Which help you to manage time during actual CDCP Exam and arrange

multiple tests which you can attempt on different intervals. Also you may improve your test skills by attempting CDCP exam questions multiple times.

EXIN CDCP Exam Syllabus Topics:

Topic	Details
Topic 1	• Electro Magnetic Fields: The topic deals with effects of EMF on human health and equipment (H)EMP, standards, and EMF shielding solutions.
Topic 2	• Physical Security and Safety: Sub-topics are about physical security considerations and physical safety considerations.
Topic 3	• Designing a Scalable Network Infrastructure: It covers ANSI • TIA-942 cabling hierarchy, network redundancy, structured Cabling System, and planning considerations.
Topic 4	• Fire Safety • Protection: This topic gives an understanding of standards for fire suppression, detection systems, total flooding fire suppression techniques, and handheld extinguishers. Additionally, it covers Signage and safety.
Topic 5	• Equipment Racks: It discusses power rail • strip options, security considerations, and rack standards, properties and selection criteria.
Topic 6	• Light: This topic covers light fixture types and placement, emergency lighting, and emergency Power Supply (EPS).
Topic 7	• Auxiliary Systems: The topic covers water leak detection systems, data centre monitoring requirements, EMS, BMS and DCIM.
Topic 8	• Power Infrastructure: It focuses ATS and STS systems, redundancy levels and techniques, static and dynamic UPS systems, battery types, thermo-graphics, and renewable energy factor (REF).
Topic 9	• Raised Floor • Suspended Ceiling: The topic discusses applicable standards, signal reference grid, and disability act and regulations.
Topic 10	• Water Supply: This topic is all about water supply techniques and application areas.

EXIN Certified Data Centre Professional (CDCP) Sample Questions (Q14-Q19):

NEW QUESTION # 14
How many monitoring points should be used in Temperature Measurement?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: D

Explanation:
According to the EPI Data Centre Professional (CDCP®) Reference Materials, the recommended number of monitoring points for temperature measurement in a data centre is 3 per rack: one at the top, one at the middle, and one at the bottom1. This is to ensure that the temperature distribution within the rack is uniform and within the acceptable range for the equipment. The temperature sensors should be placed at the front of the rack, where the air enters the equipment, and not at the back, where the hot air exits1.
References: 1: EPI Data Centre Professional (CDCP®) Reference Materials, page 23.

NEW QUESTION # 15
Which Class of Fires involves ordinary combustible materials such as paper, wood and cloth?

- A. Class B
- B. Class K
- C. Class A
- D. Class D

Answer: C

Explanation:
According to the CDCP® Preparation Guide, Class A fires involve ordinary combustible materials such as paper, wood and cloth. These materials leave behind ash or embers when they burn. Class A fires can be extinguished by water or other cooling agents that reduce the temperature of the fuel below its ignition point.
References: CDCP® Preparation Guide, page 30. Basics of Fire Protection in a Data Center. 3 Levels of Data Center Fire Protection Standards. Three Levels of Data Center Fire Protection.

NEW QUESTION # 16
Sprinkler heads used in computer rooms activate at what temperature?

- A. Only on direct contact with a flame
- B. 70 C (158 °F)
- C. 27 °C (81 °F)
- D. 57 °C (135 °F)

Answer: D

Explanation:
Sprinkler heads used in computer rooms activate at 57 °C (135 °F), which is the standard temperature rating for ordinary sprinklers. This is the temperature at which the heat-sensitive element of the sprinkler head, such as a glass bulb or a fusible link, breaks or melts, allowing water to flow from the sprinkler. Sprinkler heads are designed to activate only when exposed to a fire, not to ambient temperature fluctuations. Therefore, sprinkler heads should be installed at a sufficient distance from the heat sources, such as servers, racks, or ducts, to avoid accidental activation. Sprinkler heads should also be selected and installed in accordance with the relevant standards and codes, such as NFPA 13 and NFPA 75.

NEW QUESTION # 17
When referring to the internal mounting space in racks, equipment manufactures generally refer to standardized height of electronic modules "U" or "RU". What is the height of 1 "U" or "RU"?

- A. 24 inches (80 cm)
- B. 3.5 inches (8.59 crn)
- C. 1.75 inches (4.445 cm)
- D. 19 inches (60 cm)

Answer: C

Explanation:
According to the Certified Data Centre Professional (CDCP) Reference Materials, the height of 1 "U" (rack unit) or "RU" (rack unit) is standardized at 1.75 inches, which is equivalent to 44.45 millimeters or 4.445 centimeters. This unit of measurement is globally used to define the internal mounting space in IT and telecommunications racks. Equipment manufacturers specify their devices' height based on how many "U" the device occupies (for example, a 2U server is 3.5 inches high). The standardization ensures interoperability and planning efficiency within the data center environment.
The "U" (rack unit) system is essential for ensuring that racks and equipment from different manufacturers will fit together properly, facilitating modularity, expansion, and maintenance. The 1.75-inch specification is defined by several industry standards including EIA-310 and is referenced directly in the EPI CDCP training and its official exam preparation guides.
:

NEW QUESTION # 18

By what are magnetic fields of the type 'H' or 'B' created?

- A. Magnetic fields are created by voltage; the greater the voltage, the stronger the magnetic field.
- B. Magnetic fields are created when an electric current flows; the greater the current, the stronger the magnetic field.
- C. Magnetic fields are created when there is a high level of common mode noise (CMN); the greater the common mode noise (CMN), the stronger the magnetic field.
- D. Magnetic fields are created by the magnetic flux of the earth which varies per month.

Answer: B

Explanation:
According to the CDCP Preparation Guide1, magnetic fields of the type 'H' or 'B' are created when an electric current flows through a conductor, such as a wire or a coil. The magnetic field strength 'H' is proportional to the current 'I' and the number of turns 'N' of the coil, and inversely proportional to the length
'l' of the coil. The magnetic flux density 'B' is proportional to the magnetic field strength 'H' and the permeability " of the medium in which the magnetic field exists. The greater the current, the stronger the magnetic field and the magnetic flux density. The relationship between 'H', 'B', 'I', 'N', 'l', and " can be expressed by the following equations:
$H = N I / l$
$B = H$
References:
1: CDCP Preparation Guide, page 23, section 2.4.2.1 2: Difference between B and H in magnetic fields?3, page 1, section 1 4:
Magnetic field | Definition & Facts5, page 1, section 1

NEW QUESTION # 19

......

We really take the requirements of our worthy customers into account. Perhaps you know nothing about our CDCP study guide. Our free demos of our CDCP learning questions will help you know our study materials comprehensively. As we have three different kinds of the CDCP Practice Braindumps, accordingly we have three kinds of the free demos as well. They are a small part of the questions and answers of the CDCP learning quiz.
