### Microsoft Dynamics 365: Finance and Operations Apps Developer Sample Questions (Q139-Q144):

#### NEW QUESTION # 139

You are a Dynamics 365 Finance developer.

You have the following source control branches:

You need to move the list of changesets from the development environment to the test environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

#### NEW QUESTION # 140

You need to modify the CashDisc form to meet the requirements.

Which objects should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

#### Answer:

Explanation:

Explanation:

Scenario: CashDisc form

You must extend the CashDisc form to add a new field named MinimumInvoiceAmount to the form. You must add a new Extended Data Type to the extension model for the new field. The new field must be added above the discount method field. The field must display 10 characters.

Box 1: extension

To add a new field to an existing table, you must first create a table extension.

Box 2: field

Box 3: field group

Box 4: data source

Often, the information that is stored in existing tables doesn't satisfy customer requirements. Therefore, additional tables must be created, and data from those tables must be shown on pages.

You can add new data sources to existing forms through extension. Follow these steps.

\* In the extension model, create a form extension for the selected form.

\* Right-click the form extension, and then select New Data Source.

#### NEW QUESTION # 141

You create the following cloud-based Dynamics 365 Finance environments:

A developer creates code extensions in the Development environment. The developer checks the code changes into an Azure DevOps branch.

You need to deploy the code changes to the Standard Acceptance Test environment.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

□ Explanation:

Box 1: Build the code in the DevOps pipeline.

Box 2: Asset library

Run the export to the Asset library in Microsoft Dynamics Lifecycle Services (LCS).

Box 3: Select Maintain and Apply updates.

reprovision the target environment

If you copy a database between environments, the copied database won't be fully functional until you run the Environment reprovisioning tool to make sure that all Commerce components are up to date.

Follow these steps to run the Environment reprovisioning tool.

\* In your project's Asset Library, in the Software deployable packages section, click Import.

\* From the list of shared assets, select the Environment Reprovisioning Tool.

\* On the Environment details page for your target environment, select Maintain > Apply updates.

\* Select the Environment Reprovisioning tool that you uploaded earlier, and then select Apply to apply the package.

\* Monitor the progress of the package deployment.

**NEW QUESTION # 142**

You are implementing Dynamics 365 Supply Chain Management for a customer.

The complete solution involves an ISV product that was obtained from Microsoft AppSource.

You notice that there is a significant slowdown in certain screens once the ISV product is installed.

You need to determine the cause of the issue.

Which Lifecycle Services (LCS) tool or functionality should you use?

- A. SQL Insights
- B. Regression suite automation tool (RSAT)
- C. Impact analysis report
- D. Issue search
- E. SQL Server Runtime

**Answer: A**

**NEW QUESTION # 143**

A company uses Dynamics 365 Finance.

You must implement three classes with the following requirements:

\* Variables in ClassA must be accessible from ClassA and its child classes but not from other classes. ClassB is a class that inherits from ClassA.

\* ClassC is not a parent or child class of any other class. The variables of ClassC must only be accessible within ClassC.

You need to complete the implementation.
