Scrum Professional Scrum Product Owner II Sample Questions (Q55-Q60):

NEW QUESTION # 55

How can Scrum help with making funding and investment decisions? (choose the best two answers)

- A. By frequently inspecting the outcomes of the delivered Sprint Increments to understand how much value is being produced per investment spent.
- B. The only financial decisions required is the funding necessary for the operational costs of the Scrum Teams.
- C. By releasing to the customers and users early and often.
- D. Setting a fixed budget will ensure that the project is delivered on-time, within scope, and on-budget.

Answer: A,C

NEW QUESTION # 56

A Product Owner is needed for every:
(choose the best answer)

- A. All of the above.
- **B. Product.**
- C. Program.
- D. Portfolio.

Answer: B

Explanation:

The Product Owner is the sole person accountable for managing the Product Backlog and ensuring the value of the work the Scrum Team performs. The Product Owner is one person, not a committee. The Product Owner may represent the desires of a committee in the Product Backlog, but those wanting to change a Product Backlog item's priority must address the Product Owner¹. The Product Owner is responsible for the product and its outcome².

A product is a vehicle to deliver value. It has a clear boundary, known stakeholders, well-defined users or customers. A product could be a physical product, a software product, a service, a project, or something else³. A product has a product vision, which is the overarching goal of the product, the reason for creating it, and the impact it should have on its customers and users⁴.

A portfolio is a collection of products or projects that are aligned with a strategic goal or an organizational unit⁵. A program is a group of related projects or products that are managed in a coordinated way to obtain benefits and control not available from managing them individually. A portfolio or a program may have a portfolio or program manager, who is responsible for overseeing the alignment, prioritization, and governance of the portfolio or program. However, these roles are not equivalent to the Product Owner role, as they do not have the same accountabilities and authorities as the Product Owner.

Therefore, the correct answer is that a Product Owner is needed for every product, not for every portfolio or program. Reference: 1: Scrum Guide 2: Understanding and Applying the Scrum Framework 3: Managing Products with Agility 4: [Product Vision] 5: [Portfolio] : [Program] : [Portfolio Management] : [Program Management]

NEW QUESTION # 57

The Developers inform the Product Owner during the Sprint that they are not likely to complete everything they forecasted. What would you expect a Product Owner to do?
(choose the best answer)

- A. Change the Sprint Goal to match what the Developers can deliver.
- B. End the Sprint, since the goal cannot be achieved.
- C. Skip Product Backlog refinement activities.
- D. Inform management that more resources are needed.
- **E. Reduce the scope of the Sprint, if possible, to still meet the Sprint Goal.**

Answer: E

Explanation:

Explanation

According to the Professional Scrum Product Owner™ II certification guide¹, the Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. This means that the Product Owner should collaborate with the Developers and the Scrum Master to find the best way to deliver value in the current Sprint, even if the initial forecast is not met. The Product Owner should not change or abandon the Sprint Goal, as it is a commitment made by the Scrum Team during Sprint Planning. The Product Owner should also not skip Product Backlog refinement activities, as they are essential for preparing the Product Backlog for future Sprints. The Product Owner should not end the Sprint prematurely, as it may cause more disruption and waste than delivering a potentially releasable Increment. The Product Owner should not inform management that more resources are needed, as it may imply that the Scrum Team is not self-organizing and cross-functional. The Product Owner should respect the Developers' autonomy and professionalism and support them in finding the best solution to the problem. Therefore, the best answer is to reduce the scope of the Sprint, if possible, to still meet the Sprint Goal. This means that the Product Owner and the Developers should negotiate the scope of the Sprint Backlog within the Sprint, removing or adding Product Backlog items that are aligned with the Sprint Goal and the value delivery. NEW QUESTION # 58

Zara company's best selling app has started to have its user base erode by new competing apps that have newer and more popular features. An important stakeholder believes that Zara's app user base can be restored by adding several customer requests to the product backlog that would be prioritized over other planned product initiatives. This set of requested features would take over a year to implement and release and delay other items in the backlog.
What should Zara do? (choose the best answer)

- A. Implement selected suggestions from each stakeholder so as not to upset any of your stakeholders.
- B. Postpone previously planned initiatives and start working on the backlog of customer requests as soon as possible.
- C. Implement and measure the result of a single feature in a shortened one month release cycle.
- **D. Reach out to the customers to learn more about their needs and decide what to do next based on the information.**

Answer: D

NEW QUESTION # 59

The Developers inform the Product Owner during the Sprint that they are not likely to complete everything they forecasted. What would you expect a Product Owner to do?
(choose the best answer)

- A. Change the Sprint Goal to match what the Developers can deliver.
- B. End the Sprint, since the goal cannot be achieved.
- C. Skip Product Backlog refinement activities.
- D. Inform management that more resources are needed.
- **E. Reduce the scope of the Sprint, if possible, to still meet the Sprint Goal.**

Answer: E

Explanation:

According to the Professional Scrum Product Owner II certification guide¹, the Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team. This means that the Product Owner should collaborate with the Developers and the Scrum Master to find the best way to deliver value in the current Sprint, even if the initial forecast is not met.
