ISO-IEC-27001-Foundation시험대비 최신 덤프공부 - ISO-IEC-27001-Foundation시험대비 공부문제

Fast2test의APMG-International인증 ISO-IEC-27001-Foundation덤프공부가이드에는APMG-International인증 ISO-IEC-27001-Foundation시험의 가장 최신 시험문제의 기출문제와 예상문제가 정리되어 있어APMG-International인증 ISO-IEC-27001-Foundation시험을 패스하는데 좋은 동반자로 되어드립니다. APMG-International인증 ISO-IEC-27001-Foundation시험에서 떨어지는 경우APMG-International인증 ISO-IEC-27001-Foundation덤프비용전액 환불신청을 할수 있기에 보장성이 있습니다.시험적중율이 떨어지는 경우 덤프를 빌려 공부한 것과 같기에 부담없이 덤프를 구매하셔도 됩니다.

최신 ISO/IEC 27001 ISO-IEC-27001-Foundation 무료샘플문제 (Q43-Q48):

질문 # 43

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Awareness

- B. Communication
- C. Competence
- D. Nonconformity and corrective action

정답: A

설명:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

질문 # 44

Which action is a required response to an identified residual risk?

- A. By default, it shall be controlled by information security awareness and training
- B. The organization shall change practices to avoid the risk occurring
- **C. It shall be reviewed by the risk owner to consider acceptance**
- D. Top management shall delegate its treatment to risk owners

정답: C

설명:

Clause 6.1.3 (e) specifies:

"The organization shall obtain risk owners' approval of the information security risk treatment plan and acceptance of the residual information security risks." This confirms that residual risks - those remaining after risk treatment - must be reviewed and formally accepted by the designated risk owner. Option A is incorrect; awareness training is not a default control for all residual risks. Option B misrepresents leadership responsibility; top management ensures processes exist, but risk owners formally approve residual risk. Option D (avoiding risk) is a treatment option, not the mandated requirement for residual risks.

Thus, the required response is C: Review and acceptance by the risk owner.

질문 # 45

Who is required to ensure that staff are supported so that they can contribute to the information security management system?

- A. Auditors who audit each area of operation
- B. Management responsible for each area of operation
- **C. Top management of the organization**
- D. ISO/IEC 27001 practitioners within the organization

정답: C

설명:

Clause 5.1 (Leadership and Commitment) requires that:

"Top management shall demonstrate leadership and commitment with respect to the information security management system by... ensuring that the resources needed for the ISMS are available... and supporting persons to contribute to the effectiveness of the ISMS." This makes it explicit that top management has the responsibility to ensure personnel are supported so they can contribute to the ISMS. Option B (line management) may provide local support, but ultimate accountability rests with top management. Auditors (C) only evaluate compliance, not provide support.

Practitioners (D) help implement, but they don't bear formal responsibility under the standard.

Thus, the verified answer is A: Top management of the organization.

질문 # 46

Which International Standard can be used to implement an integrated management system with ISO/IEC

27001?

- A. ISO 9001
- **B. ISO/IEC 27013**
- C. ISO/IEC 27003
- D. None of the above

정답: B

설명:

ISO/IEC 27013 provides specific guidance on the integration of ISO/IEC 27001 (Information Security Management) and ISO/IEC 20000-1 (IT Service Management). It offers practical advice for organizations seeking a unified management system approach. While ISO/IEC 27003 (A) provides guidance on ISMS implementation, it does not address integration. ISO 9001 (C) is the Quality Management Standard and can be integrated, but the specific standard designed for integrating 27001 with ITSM is ISO/IEC 27013. Therefore, the correct answer is B: ISO/IEC 27013, as it is explicitly published for this purpose.

질문 # 47

Which statement about the conduct of audits is true?

- A. During Stage 1 of a certification audit, evidence is collected by observing activities
- B. The certificate issued after a successful re-certification audit in typical schemes lasts for one year
- **C. One of the focus areas for a surveillance audit is the output from internal audits and management reviews**
- D. Third party audits are conducted by a customer of the organization

정답: C

설명:

Clause 9.2 (Internal Audit) and Clause 9.3 (Management Review) highlight that audit outputs and management reviews are key inputs for evaluating ISMS performance. Surveillance audits, conducted by Certification Bodies, check ongoing compliance and effectiveness. ISO certification schemes (per ISO/IEC 17021) require surveillance audits to verify whether corrective actions and continuous improvements are being made. A critical focus area is the results of internal audits and management reviews, ensuring that the organization maintains its ISMS between certification cycles.

Option A is incorrect - third-party audits are performed by independent Certification Bodies, not customers.

Option B is incorrect - certificates are typically valid for three years with annual surveillance. Option D is incorrect - Stage 1 is primarily a documentation and readiness review, not evidence observation.

Therefore, the verified correct answer is C.

질문 # 48
