BONUS!!! Download part of RealExamFree HPE7-A03 dumps for free: [https://drive.google.com/open?id=1GxawGellEDo2dFsD2qOtt\\_CfZFzOBbwF](https://drive.google.com/open?id=1GxawGellEDo2dFsD2qOtt_CfZFzOBbwF)

Dear candidates, pass your test with our accurate & updated HPE7-A03 training tools. As we all know, the well preparation will play an important effect in the HPE7-A03 actual test. Now, take our HPE7-A03 as your study material, and prepare with careful, then you will pass successful. If you really want to choose our HP HPE7-A03 PDF torrents, we will give you the reasonable price and some discounts are available. What's more, you will enjoy one year free update after purchase of HPE7-A03 practice cram.

As our loyal customers wrote to us that with the help of our HPE7-A03 exam questions, they have successfully passed the exam and achieved the certification. They are now living the life they desired before. While you are now hesitant for purchasing our HPE7-A03 Real Exam, some people have already begun to learn and walk in front of you! So what you should do is to make the decision to buy our HPE7-A03 practice engine right now. The time and tide wait for no man!

## First-grade HPE7-A03 Reliable Test Book to Obtain HP Certification

If you choose RealExamFree, success is not far away for you. And soon you can get HP Certification HPE7-A03 Exam certificate. The product of RealExamFree not only can 100% guarantee you to pass the exam, but also can provide you a free one-year update service.

## HP Aruba Certified Campus Access Architect Exam Sample Questions (Q35-

## Q40):

### NEW QUESTION # 35

You are designing a solution with Aruba OS10-based access points and redundant gateways and these are the requirements:

- Wi-Fi6E based access points
- support for tunneled traffic
- application visibility
- rogue APs
- live upgrades
- Air Slice
- Cloud Guest Authentication
- AI insights

Which licenses are needed? (Select two.)

- A. Gateway Foundation
- B. AP Advanced
- C. AP Foundation
- D. WIAN Gateway

**Answer: B,C**

Explanation:

For a solution design incorporating Aruba OS10-based access points with the specified requirements, including Wi-Fi 6E support, tunneled traffic, application visibility, rogue AP detection, live upgrades, Air Slice, Cloud Guest Authentication, and AI insights, the necessary licenses are AP Foundation (Option A) and AP Advanced (Option C). The AP Foundation license provides basic connectivity and network access control features essential for establishing a Wi-Fi network. The AP Advanced license adds advanced capabilities such as application visibility and control, enhanced security features like rogue AP detection, and performance optimization features like Air Slice. These licenses together ensure the access points can deliver the full range of required functionalities, from reliable basic connectivity to sophisticated network management and security, making them suitable for a comprehensive and high-performing wireless network solution.

### NEW QUESTION # 36

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services. The client would like to include Blue Dot location tracking in their four floors of corporate space. The APs are not ideally placed to allow for smooth map transitions.

What could you add to provide better tracking? (Select two.)

- A. tags
- B. UXI sensors
- C. beacons
- D. more APs

**Answer: C,D**

Explanation:

For improving Blue Dot location tracking in corporate spaces where access points (APs) are not ideally placed for smooth map transitions, adding more APs and deploying beacons are effective strategies. More APs can enhance the density and coverage of the Wi-Fi network, providing more data points for more accurate location tracking. Beacons, specifically designed for precise indoor positioning, can supplement Wi-Fi-based location services by broadcasting signals that mobile devices can use to determine their location with greater accuracy.

This combination ensures better tracking and smoother map transitions within the corporate space, enhancing the overall effectiveness of the Blue Dot location tracking solution.

### NEW QUESTION # 37

A global cruise line company needs to refresh its current fleet. They will refresh the insides of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware.

They start with the smallest ship with a maximum of 800 guests

Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single

OM2 pair to the IDF, the maximum length is 60 meters (200 ft). Each technical room is connected by a single

OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on the 200/300 series Indoor and outdoor APs running InstantOS (less than 300 APs).

The customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new Internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed.

Based on the best practices, what should be recommended as the most cost-effective switch model for the technical rooms?

- A. HPE Aruba Networking 6200M 36G 12SR5 ClassG PoE 4SFP\*
- B. HPE Aruba Networking 6200M 24G Class- PoE 4SFP\*
- C. Aruba 6300M 12p ClassD PoE and 36p Class6 PoE HPE Smart Rate 1G/2.5G/5G and 2p SOG and 2p 10G
- **D. HPE Aruba Networking 6300M 24p HPE Smart Rate 1 G/2.5G/5G/10G Class6 PoE and 2p 50G and 2p 25G**

**Answer: D**

Explanation:

For technical rooms requiring redundant power and an upgrade to 10GbE uplinks to handle increased network traffic, the most cost-effective switch model is the HPE Aruba Networking 6300M 24p HPE Smart Rate 1G/2.5G/5G/10G Class6 PoE and 2p 50G and 2p 25G. This model offers the necessary port density and speed flexibility, with support for high-power PoE devices and uplink capabilities that meet the future-proofing needs for technical rooms on the cruise ships. The switch's redundant power capabilities ensure high availability and resilience for critical technical room infrastructure, aligning with the customer's requirements for sustainability, cost-effectiveness, and preparedness for future hardware refreshes without extensive unused port capacities.

### NEW QUESTION # 38

During the discovery phase, why is it important to identify regulatory compliance requirements?

- **A. To ensure the network design adheres to legal and industry standards**
- B. To train the IT staff accordingly
- C. To select the most cost-effective network equipment
- D. To determine the project timeline

**Answer: A**

### NEW QUESTION # 39

'Don't Buy at Us' is a US-based retail company that is expanding into Europe. They are expanding into EMEA with a regional headquarters called HQ2 inside The Netherlands. Their US- based headquarters HQ1 was refreshed last year based on the HPE Aruba Networking ESP architecture. You have created the design for HQ2 based on the same design as HQ1, a two-tier architecture. The high level is shown below.

Switch BOM for this project based on Two Tier:

Collapsed Core: 2 x Aruba 8360-16Y2C in VSX (ISL 2x100GbE DAC)

Access Stack: 10 x Stack of 6200F 48G Class4 PoE 4SFP+ 740W (each stack has 4 members, VSF with 10GbE VSF links) (2 x 10GbE uplink per stack) During the presentation of your design to the CTO of "Don't Buy at Us" you were informed about the changes they want you to incorporate into the updated design:

1. HQ2 will include the EMEA regional distribution center (EMEA-DISTR) next to the HQ2.
2. Only two pairs of OS1 are available between HQ2 and EMEA-DISTR.
3. The uplinks from all access stacks need to increase to 2 x 25GbE, the fiber in HQ2 and EMEA- DISTR is certified for 25GbE.
4. EMEA-DISTR needs at least 7 x stack of Aruba 48 ports switches (each stack has 4 members).

Which answer based on best practice is presenting the correct Switch BOM for the updated design?

- A.
- B.
- C.
- D.

**Answer: B**

Explanation:

Based on the requirements provided by "Don't Buy at Us," the updated design needs to accommodate 25GbE uplinks and a minimum of 7 stacks of 48-port Aruba switches for the EMEA-DISTR. Option C is the most suitable based on best practices, as it proposes:

A core configuration consisting of two Aruba 8360-12C in VSX for the collapsed core with ISL of 2x100GbE DAC, which will provide robust core networking with high-speed interconnects, suitable for the demands of a regional distribution center and headquarters. Aggregation with two stacks, each with 2 Aruba 8360-12C in VSX (ISL 2x100GbE DAC), accommodating the uplink capacity requirements.

Access stacks with a total of 17 stacks of Aruba 6300F 48-port 1GbE Class 4 PoE with 4-port SFP56 (each stack has 4 members, VSF with 50GbE VSF links, 2 x 25GbE uplinks per stack), which exceeds the minimum requirement of 7 stacks and provides the necessary uplink bandwidth. This configuration supports the 25GbE uplink speeds, satisfies the required number of switch stacks for the EMEA distribution center, and is compatible with the existing 25GbE- certified fiber infrastructure at HQ2 and EMEA-DISTR.

### NEW QUESTION # 40

.....

When we started offering HP HPE7-A03 exam questions and answers and exam simulator, we did not think that we will get such a big reputation. What we are doing now is incredible form of a guarantee. RealExamFree guarantee passing rate of 100%, you use your HP HPE7-A03 Exam to try our HP HPE7-A03 training products, this is correct, we can guarantee your success.

**Authorized HPE7-A03 Test Dumps:** <https://www.realexamfree.com/HPE7-A03-real-exam-dumps.html>

HPE7-A03 : Aruba Certified Campus Access Architect Exam Exam is definitely an important certificate test that HP people need to get, but it is regarded as an boring and very difficult task without HPE7-A03 latest dumps for our candidates .Maybe you didn't resort to any exam auxiliary tools and question reference books within the whole your school life, we hold that point too .But HPE7-A03 Exam of course ,is not the same as our school exams ,it is more complicated and we absolutely need someone professional to help us to overcome such a challenge, HP HPE7-A03 Reliable Test Book What' more, accompanied by high attention paid to the certificates, exams concerning them have also been put a greater premium on.

Configuring Options from the Charms Bar, For example, by collecting HPE7-A03 measurements from every stage of production, we can apply statistical analysis that helps us improve system throughput.

HPE7-A03 : Aruba Certified Campus Access Architect Exam Exam is definitely an important certificate test that HP people need to get, but it is regarded as an boring and very difficult task without HPE7-A03 Latest Dumps for our candidates .Maybe you didn't resort to any exam auxiliary tools and question reference books within the whole your school life, we hold that point too .But HPE7-A03 Exam of course ,is not the same as our school exams ,it is more complicated and we absolutely need someone professional to help us to overcome such a challenge.

## Get Valid HPE7-A03 Reliable Test Book and Excellent Authorized HPE7-A03 Test Dumps

What' more, accompanied by high attention paid to the certificates, Valid HPE7-A03 Exam Bootcamp exams concerning them have also been put a greater premium on, Is there shortcut to pass the exam?

This has helped hundreds of HP HPE7-A03 exam candidates, These HPE7-A03 exam questions give applicants the knowledge they need to quickly ace the HPE7-A03 examination.
