

# ISO-IEC-27001-Foundation Exam Study Solutions - Reliable ISO-IEC-27001-Foundation Test Pass4sure

2026 Latest DumpsKing ISO-IEC-27001-Foundation PDF Dumps and ISO-IEC-27001-Foundation Exam Engine Free Share: <https://drive.google.com/open?id=1SNMbtJ4qvYfgJpbfs47xMdLwUA2a83RE>

On DumpsKing website you can free download part of the exam questions and answers about APMG-International Certification ISO-IEC-27001-Foundation Exam to quiz our reliability. DumpsKing's products can 100% put you onto a success away, then the pinnacle of IT is a step closer to you.

## APMG-International ISO-IEC-27001-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• <b>Framework Design:</b> Framework design is the process of developing a reusable structural foundation that supports and guides the creation and organization of software systems.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Data Security:</b> Data security refers to protecting digital information—such as that stored in databases or networks—from destruction, unauthorized access, or malicious attacks, ensuring confidentiality and integrity.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Information Management (IM):</b> Information management (IM) encompasses the entire lifecycle of information within an organization—from its collection and storage to its distribution, use, and eventual archiving or disposal.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Compliance:</b> Regulatory compliance refers to an organization's commitment to understanding and adhering to applicable laws, policies, and regulations to operate within established legal and ethical standards.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Security Breaches:</b> Security breaches occur when unauthorized access or violations of security protocols are detected or imminent, potentially compromising data or system integrity.</li> </ul>

## Authoritative ISO-IEC-27001-Foundation Exam Study Solutions | 100% Free Reliable ISO-IEC-27001-Foundation Test Pass4sure

By propagating all necessary points of knowledge available for you, our ISO-IEC-27001-Foundation study materials helped over 98 percent of former exam candidates gained successful outcomes as a result. Our ISO-IEC-27001-Foundation exam questions have accuracy rate in proximity to 98 and over percent for your reference. And it is unique and hard to find in the market as our ISO-IEC-27001-Foundation training guide. Besides, our price of the ISO-IEC-27001-Foundation practice engine is quite favourable.

### APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q26-Q31):

#### NEW QUESTION # 26

Which activity is an operational planning and control requirement?

- A. Scheduling of second party audits
- B. Document information security objectives
- C. Review the consequences of unintended changes
- D. Perform information security risk assessments at planned intervals

**Answer: C**

Explanation:

Clause 8.1 (Operational planning and control) requires organizations to:

"Ensure that changes are controlled. The organization shall review the consequences of unintended changes, taking action to mitigate any adverse effects, as necessary." This requirement ensures that operational processes are planned, controlled, and adjusted where unexpected changes occur. Risk assessments (B) are covered in Clause 6.1.2 (Planning), not operations. Scheduling second-party audits (C) is not an ISMS requirement but part of supplier/customer arrangements. Documenting objectives (D) belongs to Clause 6.2 (Planning).

Thus, the required operational planning and control activity is A: Review the consequences of unintended changes.

#### NEW QUESTION # 27

To whom does the scope of the Terms and conditions of employment control apply?

- A. Personnel and the organization
- B. Contractors only
- C. All employees, contractors and third-party users
- D. Employees only

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.6.1 (Terms and conditions of employment) states:

"The contractual agreements with employees and contractors shall state their and the organization's responsibilities for information security." This means the control applies not just to employees, but also contractors and, where relevant, third-party users who are subject to contractual obligations with the organization. The goal is to ensure that all parties engaged in work under the organization's control understand their security responsibilities before, during, and after employment or contract engagement.

Options A and B are too narrow, excluding key groups. Option C misrepresents the scope by implying a mutual responsibility but not identifying the individuals covered. The explicit scope includes employees, contractors, and third-party users.

Therefore, the correct answer is D.

#### NEW QUESTION # 28

Which aspect of ISO/IEC 27001 requires that contractors know about the organization's information security policies?

- A. Nonconformity and corrective action
- B. Competence
- C. Communication
- **D. Awareness**

**Answer: D**

Explanation:

Clause 7.3 (Awareness) requires:

"Persons doing work under the organization's control shall be aware of: (a) the information security policy; (b) their contribution to the effectiveness of the ISMS, including the benefits of improved information security performance; (c) the implications of not conforming with the ISMS requirements." This applies not only to employees but also contractors and external parties under the organization's control.

Competence (B) requires having skills, training, and experience, while Communication (C) covers defining communication processes (Clause 7.4). Nonconformity and corrective action (A) is part of Clause 10 (Improvement).

Therefore, the specific requirement that ensures contractors are made aware of the information security policies is found in Clause 7.3 Awareness. Correct answer: D.

### NEW QUESTION # 29

Which statement describes the Classification of information control in Annex A of ISO/IEC 27001?

- A. Ensures that security perimeters are used to protect assets
- B. Ensures the rules to control physical and logical access apply to assets
- **C. Ensures that information is classified based on confidentiality, integrity and availability**
- D. Ensures that all information assets are labelled with their classification

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.12 (Classification of information) states:

"Information should be classified according to the information security needs of the organization based on confidentiality, integrity and availability." This aligns directly with option B. Option A (labelling) is a separate control (Annex A.5.13). Option C (security perimeters) is under physical controls (Annex A.7.1). Option D (access control rules) relates to Annex A.5.15 and A.8.2.

Thus, the verified correct statement for the Classification of information control is B.

### NEW QUESTION # 30

Which statement is a factor that will influence the implementation of the information security management system?

- A. The ISMS will encompass all controls specified within ISO/IEC 27001
- **B. The ISMS will be scaled to the controls according to the needs of the organization**
- C. The ISMS will be separate from the organization's overall management structure
- D. The ISMS will be operated as an independent process within the organization

**Answer: B**

Explanation:

ISO/IEC 27001 makes clear that the ISMS is intended to be tailored to the organization. The standard states: "This document also includes requirements for the assessment and treatment of information security risks tailored to the needs of the organization. The requirements set out in this document are generic and are intended to be applicable to all organizations regardless of type, size or nature." This means implementation is scaled based on each organization's risk, context, and needs, not a fixed one-size-fits-all set of activities or controls. Clause 6.1.3 further reinforces that control selection is flexible and risk-driven: "Organizations can design controls as required or identify them from any source," and "Annex A contains a list of possible information security controls... The information security controls listed in Annex A are not exhaustive and additional information security controls can be included if needed." Together, these extracts verify that the ISMS implementation is influenced by and scaled to the organization's needs and selected controls, not separated from management processes (A, D) nor mandated to include "all controls" (B).

### NEW QUESTION # 31

.....

The ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) practice questions are designed by experienced and qualified ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam trainers. They have the expertise, knowledge, and experience to design and maintain the top standard of ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam dumps. So rest assured that with the ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam real questions you can not only ace your ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam dumps preparation but also get deep insight knowledge about APMG-International ISO-IEC-27001-Foundation exam topics. So download ISO/IEC 27001 (2022) Foundation Exam (ISO-IEC-27001-Foundation) exam questions now and start this journey.
