ITFAS-Level-1 Latest Test Question - ITFAS-Level-1 Examcollection Dumps

Pass your ITFAS-Level-1 exam certification with ITFAS-Level-1 reliable test. The Braindumpsqa ITFAS-Level-1 practice material can guarantee you success at your first try. When you choose ITFAS-Level-1 updated dumps, you will enjoy instant downloads and get your ITFAS-Level-1 study files the moment you have paid for them. In addition, the update is frequent so that you can get the ITFAS-Level-1 latest information for preparation.

NICET Inspection and Testing of Fire Alarm Systems Level I Exam Sample Questions (Q20-Q25):

NEW QUESTION # 20

Which of the following options is required while conducting annual testing of an audiovisual device?

- A. Confirm voice intelligibility
- B. Verify proper operation
- C. Verify proper setting of candela rating
- D. Confirm sound level based on design

Answer: B

Explanation:

When performing annual testing of notification appliances such as strobes or horns, NFPA 72 mandates functional testing- which means checking that they operate correctly when activated.

NFPA 72 (2022), Table 14.4.3.2 - Testing Frequencies and Methods:

Under "Notification Appliances," the required method for both audible and visible devices is:
"Functional test - verify proper operation."

While things like sound levels and candlea settings are verified during acceptance testing or design review, the annual requirement is simply to verify that they work.

Correct answer: C. Verify proper operation

NEW QUESTION # 21

What is the periodic testing frequency of a control valve switch?

- A. Semiannually
- B. Quarterly
- C. Monthly
- D. Annually

Answer: D

Explanation:

Control valve supervisory switches must be tested to verify that they send a signal when the valve position changes (e.g., valve is closed). NFPA 72 requires this to be done annually.

NFPA 72 (2022), Table 14.4.3.2 - Testing Frequencies:

Control valve supervisory switch:

Frequency: Annually

Method: Operate valve control; verify signal annunciation.

Correct answer: D. Annually

NEW QUESTION # 22

How often should radio transmitters be inspected?

- A. Semiannually
- B. Quarterly
- C. Monthly
- D. Annually

Answer: B

Explanation:

Radio transmitters used in fire alarm systems for off-premises signal transmission must be inspected to verify physical condition, connections, and proper operation. The required inspection interval is quarterly.

NFPA 72 (2022), Table 14.3.1 - Inspection Frequencies:

"Radio transmitters" # Frequency: Quarterly

Correct answer: B. Quarterly

NEW QUESTION # 23

Which three of the following parties gets notified that the system has been restored? (Choose three.)

- A. Building occupants
- B. Authority Having Jurisdiction
- C. Monitoring organization
- D. First responders

Answer: A,B,C

Explanation:

After impairment or testing, NFPA 72 requires that all previously notified parties be informed that the system has been returned to service. This includes those who could be affected by or responsible for system monitoring and emergency response.

NFPA 72 (2022), Section 10.21.3.8:

"When the system has been returned to normal, the persons and facilities previously notified (including the supervising station, building occupants, and AHJ, where required) shall be notified that testing is complete and the system is restored." Although "first responders" isn't explicitly listed, they're typically contacted through the AHJ or monitoring center, so they're not usually notified directly by technicians.

Correct answers:

- * Authority Having Jurisdiction
- * Building occupants
- * Monitoring organization

NEW QUESTION # 24

An off-normal signal shall be initiated during which of the following travel distances of the valve control apparatus from its normal position?

- A. 1/2
- B. 1/5
- **C. 1/4**
- D. 1/3

Answer: C

Explanation:

This question is referring to supervisory signaling for control valves in sprinkler systems. When a valve begins to move from its normal (open) position, the fire alarm system must detect and signal this before it reaches too far out of position.

NFPA 72 (2022), Section 17.16.1.3:

"Off-normal signal shall be initiated during the first one-quarter (1/4) of the valve travel distance from its normal position." This ensures timely detection if someone begins to close a sprinkler valve, which could disable the fire suppression system.

Correct answer: B. 1/4

NEW QUESTION # 25

.....

Once we have latest version, we will send it to your mailbox as soon as possible. Our ITFAS-Level-1 exam questions just need students to spend 20 to 30 hours practicing on the platform which provides simulation problems, can let them have the confidence to pass the ITFAS-Level-1 exam, so little time great convenience for some workers. Our ITFAS-Level-1 question torrent not only have reasonable price but also can support practice perfectly, as well as in the update to facilitate instant upgrade for the users in the first place, compared with other education platform on the market, the ITFAS-Level-1 Exam Question can be said to have high quality performance. It must be your best tool to pass your exam and achieve your target.
