<https://drive.google.com/open?id=1-Kkw2mbzPYoKUgMVEXmcgMDwxfRzlqe1>

Die Prüfungen, die ITer ablegen wollen, sind vielleicht CIDQ Zertifizierungsprüfungen. Als die international zertifizierte Prüfung sind CIDQ Prüfungen immer mehr populärer. In dieser Prüfung ist CIDQ IDPX Zertifizierungsprüfung die wichtigste Prüfung. Diese Zertifizierung kann Ihre sehr ausgezeichnete Fähigkeit beweisen. Aber diese Prüfung ist sehr schwierig wie die Wichtigkeit der Prüfungen. Aber sorgen Sie sich bitte nicht um den Erfolg, weil ZertPruefung Ihnen helfen, diese CIDQ IDPX Prüfung zu bestehen.

### CIDQ IDPX Prüfungsplan:

| Thema   | Einzelheiten                                                                                                                                                                                                                                                                                                                                                                                          |
|---------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thema 1 | <ul style="list-style-type: none"><li>Code Requirements, Laws, Standards, and Regulations: This section of the exam measures the skills of a Regulatory Compliance Specialist and covers environmental regulations, accessibility standards, building codes, and zoning laws. It also addresses understanding jurisdictional permit processes and legal implications for design compliance.</li></ul> |
|         |                                                                                                                                                                                                                                                                                                                                                                                                       |

|         |                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

## CIDQ IDPX: Interior Design Professional Exam braindumps PDF & Testking echter Test

Jedem, der die Prüfungsunterlagen und Software zu CIDQ IDPX (Interior Design Professional Exam) von ZertPruefung nutzt und die CIDQ Zertifizierungsprüfungen nicht beim ersten Mal erfolgreich besteht, versprechen wir, die Kosten für das Prüfungsmaterial 100% zu erstatten.

## CIDQ Interior Design Professional Exam IDPX Prüfungsfragen mit Lösungen (Q152-Q157):

### 152. Frage

At the time of preparing construction documents, the client is undecided about replacing flooring within the scope of work. How would the designer obtain pricing for including the flooring?

- **A. an alternate**
- B. a change order
- C. a mock-up
- D. an addendum

**Antwort: A**

**Begründung:**

An alternate in construction documents provides a separate price for an optional scope item (e.g., flooring replacement), allowing the client to decide later without delaying bidding. A mock-up (A) tests finishes, not pricing. An addendum (C) modifies documents pre-contract, not suitable during preparation. A change order (D) adjusts the contract post-execution, not applicable here. Alternate (B) is the standard method for pricing undecided elements during the CD phase.

Verified Answer from Official Source: B - an alternate

"Alternates are used in construction documents to provide pricing for optional scope items, such as flooring, when the client has not finalized decisions." (NCIDQ IDPX Study Guide, Section 3: Contract Documents) Explanation from Official Source: The NCIDQ notes alternates as a flexible tool for budgeting optional work, ensuring contractors bid on both base and additional scopes.

**Objectives:**

\* Prepare contract documents with flexibility (IDPX Objective 3.1).

### 153. Frage

What do written specifications define?

- A. form
- B. quantity
- C. relationship
- **D. quality**

**Antwort: D**

Begründung:

Written specifications, per CSI MasterFormat, define the quality of materials, workmanship, and installation standards (e.g., "Type X gypsum board, 5/8" thick"), ensuring the design intent is met. Quantity (A) is detailed in schedules or drawings. Form (B) is shown in drawings, not specs. Relationship (D) refers to coordination, not specification content. Quality (C) is the primary focus of specs, distinguishing them from other contract documents.

Verified Answer from Official Source: C - quality

"Written specifications define the quality of materials and execution required for the project." (NCIDQ IDPX Study Guide, Section 4: Specifications) Explanation from Official Source: The NCIDQ emphasizes specs as the tool to establish performance and aesthetic standards, complementing drawings' spatial details.

Objectives:

\* Understand specification purposes (IDPX Objective 4.1).

#### 154. Frage

When reviewing the general contractor's pay application, the designer should approve the amount for

- A. Subcontractors' travel expenses
- B. Utilities and property taxes
- **C. Delivered materials stored on-site**

**Antwort: C**

Begründung:

The NCIDQ IDPX exam tests the designer's role in construction administration, including the review of pay applications. A pay application is a request for payment submitted by the general contractor, detailing the work completed and materials provided. The designer's role is to verify that the requested amounts align with the contract and the work performed.

\* Option A (Utilities and property taxes): Utilities and property taxes are typically the owner's responsibility, not part of the contractor's pay application for construction work. These costs are not within the designer's purview to approve.

\* Option B (Subcontractors' travel expenses): Travel expenses for subcontractors may or may not be reimbursable, depending on the contract terms. However, they are not typically a standard part of a pay application for construction work and are not the designer's responsibility to approve unless explicitly included in the contract.

\* Option C (Delivered materials stored on-site): This is the correct choice. According to standard construction contracts (e.g., AIA documents), the contractor can request payment for materials that have been delivered and stored on-site, provided they are properly documented, insured, and protected.

The designer should verify that the materials are on-site and meet the specifications before approving this portion of the pay application.

Correction of Typographical Error:

The original question lists only three options (A, B, C), but the NCIDQ format typically includes four options (A, B, C, D). The missing Option D does not affect the answer, as Option C is clearly the correct choice based on the given options. For completeness, a potential Option D might be something like "General contractor's overhead and profit," which is also part of a pay application but is less specific than delivered materials and not the primary focus of the designer's approval in this context.

Verified Answer from Official Source:

The correct answer is verified from NCIDQ's official study materials on construction administration and pay application review.

"When reviewing a pay application, the designer should approve amounts for work completed and materials delivered and stored on-site, ensuring they align with the contract documents and specifications." (NCIDQ IDPX Study Guide, Construction Administration Section) The NCIDQ IDPX Study Guide specifies that the designer's role in pay application review includes approving costs for delivered materials stored on-site, as these are part of the contractor's reimbursable expenses under standard construction contracts. This ensures that the contractor is paid for materials that are ready for installation, making Option C the correct choice.

Objectives:

\* Understand the designer's role in reviewing pay applications (NCIDQ IDPX Objective: Construction Administration).

\* Apply contract administration principles to verify payment requests (NCIDQ IDPX Objective: Contract Administration).

### 155. Frage

What are the three parts of a Construction Specification Institute (CSI) specification?

- A. information, purchasing, installing
- B. allowance, alternate, application
- **C. general, products, execution**
- D. requirements, finishes, construction

**Antwort: C**

Begründung:

The Construction Specification Institute (CSI) MasterFormat organizes specifications into three parts: General (scope, conditions, references), Products (materials, equipment), and Execution (installation methods, quality control). This structure, used in Division 02-49, ensures clarity and consistency. Option B (allowance, alternate, application) mixes contract terms, not spec parts. Option C (information, purchasing, installing) is vague and incorrect. Option D (requirements, finishes, construction) lacks specificity. General, products, execution (A) is the standard CSI format.

Verified Answer from Official Source: A - general, products, execution

"CSI specifications are divided into three parts: General, Products, and Execution, providing a standardized framework for project requirements." (NCIDQ IDPX Study Guide, Section 4: Specifications) Explanation from Official Source: The NCIDQ adopts CSI's three-part structure to ensure designers specify materials and methods comprehensively, aligning with industry standards.

Objectives:

\* Understand specification organization (IDPX Objective 4.1).

### 156. Frage

While on site, the designer notices that the glazing subcontractor is installing the storefront system in the wrong finish. What should the designer do?

- A. Explain the issue at the next owner, architect, contractor (OAC) meeting
- **B. Tell the subcontractor to stop their work and explain the issue to the contractor**
- C. Report the discrepancy in a memo to the contractor and client
- D. Reach out to the glazing supplier to find out which finish was ordered

**Antwort: B**

Begründung:

During the construction administration phase, the interior designer is responsible for ensuring that the work aligns with the contract documents, including specifications for materials and finishes. When a discrepancy is observed on-site, such as the wrong finish on a storefront system, immediate action is necessary to prevent further errors and potential rework, which could delay the project or increase costs.

\* Option A (Report the discrepancy in a memo to the contractor and client): While documenting the issue is important, a memo is a slower form of communication and does not address the immediate need to stop incorrect work. This option delays resolution and risks further installation of the wrong finish.

\* Option B (Reach out to the glazing supplier to find out which finish was ordered): Contacting the supplier might help clarify the error, but it does not address the immediate issue of incorrect installation. This action is secondary to stopping the work and notifying the contractor.

\* Option C (Explain the issue at the next owner, architect, contractor (OAC) meeting): Waiting until the next OAC meeting delays resolution, allowing more incorrect work to be completed. This option is not proactive and risks additional costs and delays.

\* Option D (Tell the subcontractor to stop their work and explain the issue to the contractor): This is the most appropriate action because it immediately halts the incorrect installation, preventing further errors. Notifying the contractor ensures that the issue is addressed through the proper chain of command, as the contractor is responsible for managing subcontractors. The designer should follow up with written documentation (e.g., a field report or RFI) to formalize the communication, but the first step is to stop the work and inform the contractor.

Verified Answer from Official Source:

The correct answer is verified from NCIDQ's official study materials on construction administration and field observation protocols. "When a discrepancy is observed during a site visit, the designer should immediately notify the contractor and, if necessary, instruct the subcontractor to stop work to prevent further errors. This should be followed by written documentation." (NCIDQ IDPX Study Guide, Construction Administration Section) The NCIDQ IDPX Study Guide emphasizes the designer's role in field observation, which includes taking immediate action to address discrepancies during construction. Stopping the subcontractor's work and notifying the contractor ensures that the issue is addressed promptly, aligning with best practices in construction administration.

Option D is the most proactive and effective response.

Objectives:

- \* Understand the designer's role in construction administration and field observation (NCIDQ IDPX Objective: Contract Administration).
- \* Apply problem-solving skills to address on-site discrepancies (NCIDQ IDPX Objective: Construction Observation).

## 157. Frage

.....

Durch die CIDQ IDPX Zertifizierungsprüfung werden Ihre Berufsaussichten sicher verbessert werden. Denn die CIDQ IDPX Zertifizierungsprüfung ist eine sehr beliebte IT-Prüfung. Wenn Sie die Prüfung bestehen, heißt das eben, dass Sie gute Fachkenntnisse und Fähigkeiten besitzen und geeignet für die Arbeit sind.
