After installation, Fortinet NSE6\_FSR-7.3 Practice Exam software is used without an internet connection.

## Fortinet NSE 6 - FortiSOAR 7.3 Administrator Sample Questions (Q62-Q67):

### NEW QUESTION # 62

The Create Record and Update Record steps are categorized under which playbook step'

- A. Core
- B. Execute
- C. Evaluate
- D. Reference

**Answer: A**

Explanation:

In FortiSOAR playbooks, the "Create Record" and "Update Record" steps are categorized under the "Core" category of playbook steps. Core steps are essential actions that are frequently used in playbooks to interact with records in the FortiSOAR database. They include fundamental operations such as creating, reading, updating, or deleting records within modules. These steps are crucial for the automation of tasks such as data management, where playbooks need to create new entries or update existing data as part of incident response workflows.

### NEW QUESTION # 63

An administrator is issuing the following command on a node trying to join a FortiSOAR duster as a standby:

```
csadm ha join-cluster --status active --role secondary --primary-node
10.0.1.160
```

The node fails to join the cluster. What is the issue?

- A. The primary node needs to be resolvable via FQDN.
- B. The IP address should be for secondary-node Instead of primary-node.
- C. The role value should be worker.
- D. The status value should be passive.

**Answer: D**

Explanation:

When joining a FortiSOAR cluster as a standby node, the correct status value should be passive.

Using active would imply that the node is trying to join as an active node, which could cause conflicts in the cluster setup. In FortiSOAR, standby nodes must be set as passive to ensure they are recognized correctly and to avoid conflicts with the primary node or other active nodes within the cluster. Therefore, setting the status to passive will resolve the issue and allow the node to join the cluster as intended.

### NEW QUESTION # 64

What are two different services that you can configure for monitoring system and cluster health statuses on FortiSOAR? (Choose two.)

- A. IMAP
- B. SMTP
- C. POP
- D. Exchange

**Answer: B,D**

#### NEW QUESTION # 65

Which three attributes are required on FortiSOAR when mapping users from an identity provider (IdP) for SAML authentication? (Choose three.)

- A. email
- B. role
- C. team
- D. lastName
- E. firstName

**Answer: A,C,E**

Explanation:

FortiSOAR requires the user's first name, team assignment, and email address to properly create and map user accounts during SAML authentication.

#### NEW QUESTION # 66

Which service on FortiSOAR in the playbook scheduler?

- A. uwsgi
- B. celeryd
- C. celerybeatd
- D. cyops-tomcat

**Answer: C**

Explanation:

The celerybeatd service in FortiSOAR is responsible for the playbook scheduler. It handles the periodic execution of scheduled playbooks by managing tasks that need to be executed at specific times or intervals. This service works in conjunction with the Celery worker processes (celeryd) to execute the scheduled tasks.

#### NEW QUESTION # 67

.....
