

C_ADBTP Vorbereitung - C_ADBTP Probesfragen

ISACA CISA Certified Information Systems Auditor 1

CISA Prüfung & CISA Probesfragen

Wollen Sie Ihre IT-Fähigkeiten beweisen? Möchten Sie mehr Anerkennung und Berufschancen bekommen? Die Prüfungszertifizierung der ISACA CISA ist ein bedeutendster Ausweis für Sie. Die Wichtigkeit der Zertifizierung der ISACA CISA wissen fast alle Angestellte aus IT-Branche. Die Tatkraft von Menschen ist limitiert. Wenn Sie in einer kurzen Zeit diese wichtige ISACA CISA Prüfung bestehen möchten, brauchen Sie unsere die Prüfungssoftware von uns ZertFragen als Ihr bester Helfer für die Prüfungsvorbereitung. Umfassende Prüfungsaufgaben enthaltende und Mnemotechnik entsprechende Software kann Ihnen beim Erfolg der ISACA CISA gut helfen!

ZertFragen ist eine Website, die Fragenkataloge zur CISA -Zertifizierungsprüfung bietet. Seine Erfolgsquote beträgt 100%. Das ist der Grund dafür, warum viele Kandidaten ZertFragen glauben. ZertFragen kümmert sich immer um die Bedürfnisse der Kandidaten und versuchen, ihre Bedürfnisse abzudecken. Mit ZertFragen werden Sie sicher eine glänzende Zukunft haben.

CISA Übungsmaterialien & CISA Lernführung: Certified Information Systems Auditor & CISA Lernguide

Der Kundendienst ist ein wichtiger Standard für eine Firma und ZertFragen bemüht sich sehr dafür. Nachdem die Kunden ISACA CISA Prüfungsunterlagen gekauft haben, geben wir ihnen rechtzeitiger Bescheid über die Aktualisierungsinformation der ISACA CISA und schicken die neueste Version per E-Mail. Dieser Aktualisierungsdienst ist innerhalb einem Jahr gratis. Wir sind getrost mit unseren Produkten. Deshalb garantieren wir, falls Sie nach dem Benutzen der ISACA CISA Prüfungsunterlagen die Prüfung nicht bestehen, werden wir Ihnen mit voller Rückerstattung unser Bedauern zeigen.

CISA Prüfung & CISA Probesfragen

Wir ITZert bieten Ihnen die umfassendsten SAP C_ADBTP Dumps mit sehr hoher Hit-Rate. Und alle Probleme, die vielleicht in aktuellen Prüfungen sind in Dumps vorhanden. Und wir aktualisieren unsere Dumps nach der Veränderung der Prüfungsinhalte. Es kann den sinnlosen Zeitaufwand vermeiden und Ihnen helfen, leichter und hocheffektiver die SAP C_ADBTP Prüfung zu bestehen. Obwohl Sie die SAP C_ADBTP Prüfung nicht bestehen, geben wir Ihnen voll Geld zurück. Deshalb können Sie keinen Verlust haben. Die Chance ist für die Leute, die gut bereit sind. Wir hoffen, dass Sie keine gut Chance verlieren.

Als ein professioneller Lieferant der IT Zertifizierungsprüfungssoftwares, bieten wir nicht nur die Produkte wie SAP C_ADBTP Prüfungsunterlagen, deren Qualität und Wirkung garantiert werden, sondern auch hochqualifizierter 24/7 Kundendienst. Wenn Sie neben SAP C_ADBTP noch Prüfungsunterlagen anderer Prüfungen suchen oder Fragen für den Kauf haben, können Sie direkt auf unserer Website online fragen. Innerhalb einem Jahr nach dem Kauf der SAP C_ADBTP Prüfungssoftware, geben wir Ihnen Bescheid, sobald die SAP C_ADBTP Prüfungsunterlagen aktualisiert haben.

SAP C_ADBTP Probesfragen, C_ADBTP Ausbildungsressourcen

Wollen Sie die Fragenkataloge zur SAP C_ADBTP Zertifizierungsprüfung haben, die Ihre Zeit und Energie sparen können? Dann wählen Sie ITZert. Unsere Fragenkataloge für SAP C_ADBTP Zertifizierungsprüfung werden Ihnen einjähriger Aktualisierung kostenlos bieten, damit Sie die neulich aktualisierten Informationen über SAP C_ADBTP Zertifizierungsprüfung erhalten können. Wir versprechen Ihnen, dass wir Ihnen alle Ihre bezahlten Summe zurückgeben werden, wenn Sie die Zertifizierungsprüfung nicht bestehen, nachdem Sie unsere Produkte gekauft haben.

SAP Administrating SAP Business Technology Platform(C_ADBTP_2601) C_ADBTP Prüfungsfragen mit Lösungen (Q10-Q15):

10. Frage

SIMULATION

Enable Service Subscriptions

In the entitlements of a directory, add a service plan for a service subscription. Assign and create this subscription to/in a subaccount of the directory.

Task 1: Entitle a Service in a Directory

In your SAP BTP cockpit, enable entitlement management for your Partner directory.

In your Partner directory, entitle the standard (Application) service plan for the SAP Build Work Zone, standard edition.

Antwort:

Begründung:

See the Explanation below for complete solution.

Explanation:

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Partner directory.

Why this matters:

Both actions in this task must be done at the Partner directory level, not directly in a subaccount.

Step 1 - Open the Partner Directory

What to do

In the left navigation, click Directories.

Select Partner.

Explanation:

This opens the directory where you must manage entitlements for this task.

What to verify

You should now be inside the Partner directory page.

Step 2 - Open Entitlements

What to do

Inside the Partner directory, go to Entitlements.

Explanation:

This is the area where you manage quota and service plan assignments for the directory and its subaccounts.

What to verify

You should see the entitlements page for Partner.

Step 3 - Enable Entitlement Management for the Partner Directory

What to do

In the Entitlements area, look for the option to Enable Entitlement Management.

Click Enable.

Explanation:

A directory must have entitlement management enabled before you can add and manage service plans there.

What to verify

After enabling, the Partner directory should allow entitlement assignment and management.

Step 4 - Start Adding a Service Plan

What to do

In the Entitlements page of the Partner directory, click Configure Entitlements or Add Service Plans.

Explanation:

This opens the service catalog where you can select the service and plan to add.

What to verify

You should see the list of available services and plans.

Step 5 - Find the Required Service

What to do

Search for or scroll to:

SAP Build Work Zone, standard edition

Select that service.

Explanation:

You must choose the exact service named in the task. Be careful not to select a different SAP Build service by mistake.

What to verify

The selected service should be:

SAP Build Work Zone, standard edition

Step 6 - Select the Correct Service Plan

What to do

Under the selected service, choose the service plan:

standard (Application)

Add the plan to the entitlement configuration.

Explanation:

This task requires the standard (Application) service plan specifically.

Do not choose another plan if more than one is listed.

What to verify

The selected plan should read exactly:

standard (Application)

Step 7 - Save the Entitlement Changes

What to do

Click Add, Save, or Confirm depending on the screen.

Then click Save for the entitlement configuration.

Explanation:

This commits the new service plan entitlement to the Partner directory.

What to verify

After saving, the entitlements list for Partner should include:

SAP Build Work Zone, standard edition

plan: standard (Application)

Final Expected Result for Task 1

Inside the Partner directory:

Entitlement management is enabled

The service SAP Build Work Zone, standard edition is entitled

The plan standard (Application) is added

Common Mistakes to Avoid

1. Working in the wrong level

Do this in:

Partner directory

Not in:

Global Account

Subaccount

Another directory

2. Forgetting to enable entitlement management first

If entitlement management is not enabled for the directory, you may not be able to add the service plan properly.

3. Choosing the wrong service

Be sure you select:

SAP Build Work Zone, standard edition

Not another SAP Build service.

4. Choosing the wrong plan

You must select:

standard (Application)

11. Frage

SIMULATION

Enable a Cloud Foundry Environment

Add a service plan for Cloud Foundry environment and enable it in a subaccount.

Task 1: Add a Service Plan for Cloud Foundry Environment

In your SAP BTP cockpit, in your EU HCM Dev subaccount, entitle one MEMORY service plan for the Cloud Foundry Runtime.

Antwort:

Begründung:

See the Explanation below for complete solution.

Explanation:

Before you start

Log in to SAP BTP Cockpit.

Open your correct Global Account.

Go to the Human Resources directory.

Open the EU HCM Dev subaccount.

This matters because the runtime memory quota must be assigned to the EU HCM Dev subaccount specifically. SAP documents that the MEMORY plan is the quota-bearing plan for Cloud Foundry Runtime.

Step 1 - Open the EU HCM Dev subaccount

In the cockpit, choose Directories.

Open Human Resources.

Select EU HCM Dev.

You should now be on the EU HCM Dev subaccount page.

Step 2 - Open Entitlements

In EU HCM Dev, choose Entitlements.

SAP Help confirms that service plans and quota assignments for a subaccount are configured in the Entitlements area.

Step 3 - Configure entitlements

Click Configure Entitlements or Add Service Plans.

Search for:

Cloud Foundry Runtime

In SAP Help, this appears as Cloud Foundry Runtime (APPLICATION_RUNTIME), and the relevant plan for assigning runtime memory is MEMORY.

Step 4 - Select the MEMORY plan

Under Cloud Foundry Runtime, select:

MEMORY

Set the quantity to 1 if the cockpit shows an amount/quota field.

Add the plan to the subaccount.

Save the entitlement changes.

SAP documents that the MEMORY plan is specifically used to assign runtime memory quota to the subaccount, and that 1 unit corresponds to 1 GB of runtime memory when quota is adjusted or assigned.

Step 5 - Verify the result

After saving, check the Entitlements page of EU HCM Dev.

You should see:

Cloud Foundry Runtime

plan: MEMORY

quantity: 1 if shown

Final expected result

Inside EU HCM Dev:

Cloud Foundry Runtime is entitled

the service plan is MEMORY

the assigned amount is 1 if the cockpit displays quantity/quota units

Common mistakes to avoid

Doing this in the wrong subaccount; it must be EU HCM Dev

Choosing the wrong Cloud Foundry plan; the task asks for MEMORY

Forgetting to save the entitlement change after adding the plan

Confusing the runtime memory entitlement with the later step of actually enabling the Cloud Foundry environment; SAP distinguishes the MEMORY runtime quota from enabling the Cloud Foundry org itself.

12. Frage

SIMULATION

Enable Service Subscriptions

Task 2: Entitle and Subscribe a Service in a Subaccount

In your AM PA Prod subaccount, entitle the standard (Application) service plan for SAP Build Work Zone, standard edition.

In the AM PA Prod subaccount, establish a trust to the agylamkzw.accounts.ondemand.com identity provider.

In your AM PA Prod subaccount, create a service subscription for SAP Build Work Zone, standard edition with the standard service plan .

Antwort:

Begründung:

See the Explanation below for complete solution.

Explanation:

Part A - Entitle the Service Plan in AM PA Prod

Step 1 - Open the AM PA Prod Subaccount

What to do

In the SAP BTP Cockpit, go to Directories.

Open the Partner directory.

Select the subaccount AM PA Prod.

Explanation:

This opens the exact subaccount where the entitlement and subscription must be created.

What to verify

You should now be on the AM PA Prod subaccount page.

Step 2 - Open Entitlements in the Subaccount

What to do

In AM PA Prod, open Entitlements.

Explanation:

SAP documents that subaccount entitlements are configured in the subaccount's entitlement area, where you add service plans and quotas available to that subaccount.

What to verify

You should see the Entitlements screen for AM PA Prod.

□ Step 3 - Add the Required Service Plan

What to do

Click Configure Entitlements or Add Service Plans.

Search for:

SAP Build Work Zone, standard edition

Select the service.

Choose the plan:

standard (Application)

Add the service plan.

Save the entitlement changes.

Explanation:

The task requires the standard (Application) plan specifically. SAP's entitlement flow requires you to add the service plan to the subaccount before you can subscribe to the application.

What to verify

Under Entitlements, you should now see:

SAP Build Work Zone, standard edition

plan: standard (Application)

Part B - Establish Trust to the Identity Provider

Step 4 - Open Trust Configuration

What to do

In the AM PA Prod subaccount, go to:

Security

Trust Configuration

Explanation:

SAP Help states that trust to a custom identity provider is established from the cockpit in Security > Trust Configuration.

What to verify

You should be on the Trust Configuration page of AM PA Prod.

Step 5 - Start the Trust Setup

What to do

Click Establish Trust or New Trust Configuration.

□ Explanation:

This opens the wizard or form to add a trusted identity provider for the subaccount. SAP documents this as the standard cockpit flow for custom identity provider trust.

Step 6 - Enter the Identity Provider

What to do

In the trust configuration, use the identity provider:

agvlamkzw.accounts.ondemand.com

Continue through the wizard and confirm the trust setup.

Save the configuration.

Explanation:

The simulation explicitly requires trust to that identity provider domain. For SAP Build Work Zone, standard edition, SAP also notes that the subaccount must trust an identity provider before subscription use cases for business users are completed.

What to verify

On the Trust Configuration page, the identity provider `agvlamkzw.accounts.ondemand.com` should appear as trusted.

Part C - Create the Service Subscription

Step 7 - Open the Subscription Area

What to do

In AM PA Prod, go to:

Services

Instances and Subscriptions

Explanation:

SAP Help for SAP Build subscriptions points to the subaccount subscription flow after the entitlement is available. In current cockpit usage, subscriptions are created from the subaccount's services are a.

What to verify

You should see the Instances and Subscriptions page.

Step 8 - Create the Subscription

What to do

Click Create.

Choose Subscription if a type selection appears.

Search for:

SAP Build Work Zone, standard edition

Select the plan:

standard

Then confirm the creation.

Explanation:

SAP's getting-started guidance for SAP Build Work Zone, standard edition says that once the subaccount has the required entitlement, you can subscribe to the application from the subaccount.

What to verify

You should now see a subscription entry for:

SAP Build Work Zone, standard edition

plan: standard

Step 9 - Confirm the Subscription Is Active

What to do

Check the status of the new subscription in Instances and Subscriptions.

Explanation:

The subscription should be visible and active in the subaccount after creation.

What to verify

You should see:

SAP Build Work Zone, standard edition

subscription created successfully

SAP's guidance for subscription-based applications consistently uses this subaccount subscription flow after entitlement is present.

Final Expected Result for Task 2

Inside AM PA Prod:

the entitlement SAP Build Work Zone, standard edition is assigned

the entitled plan is standard (Application)

trust is established to `agvlamkzw.accounts.ondemand.com`

a subscription exists for SAP Build Work Zone, standard edition

the subscription uses the standard service plan

Common Mistakes to Avoid

1. Doing the entitlement in the wrong place

This task must be done in:

AM PA Prod subaccount

Not only in:

Partner directory

Directory entitlement and subaccount entitlement are different scopes in the cockpit.

2. Choosing the wrong service or wrong plan

Use exactly:

SAP Build Work Zone, standard edition
standard (Application) for entitlement
standard for the subscription selection screen
SAP's service subscription flow starts only after the correct entitlement exists.

3. Skipping trust configuration

The simulation explicitly requires trust to:
agvlankzw.accounts.ondemand.com

Trust is configured in Security > Trust Configuration.

4. Looking for subscription creation before entitlement

The entitlement must be added first, otherwise the service may not appear in the subscription creation flow.

Quick Validation Checklist

Confirm all of the following in AM PA Prod:

Entitlements contains SAP Build Work Zone, standard edition
the plan is standard (Application)

Trust Configuration shows agvlankzw.accounts.ondemand.com

Instances and Subscriptions shows SAP Build Work Zone, standard edition the subscription is created successfully

13. Frage

SIMULATION

Task 3: Create Subaccounts with Default Provider and Region

In the Human Resources directory, create the subaccount EU HCM Dev (Description: Human Resources Development) with subdomain btpops#####-eu-hcm-dev in the region Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10.2.

In the Human Resources directory, create the subaccount EU HCM Test (Description: Human Resources Testing) with subdomain btpops#####-eu-hcm-test using EU HCM Dev as source subaccount.3.

In the Human Resources directory, create the subaccount EU HCM Prod (Description: Human Resources Production) with subdomain btpops#####-eu-hcm-prod using EU HCM Dev as source subaccount. Set the subaccount as used in production.

Antwort:

Begründung:

See the Explanation below for complete solution.

Explanation:

You must create these 3 subaccounts inside the Human Resources directory:

EU HCM Dev

EU HCM Test

EU HCM Prod

Important:

Replace ##### with your global account number

Enter names, descriptions, and subdomains exactly

EU HCM Prod must be marked as used in production

Task 3 - Create Subaccounts with Default Provider and Region

Before You Start

Log in to the SAP BTP Cockpit.

Open the correct Global Account.

Go to Directories.

Open the Human Resources directory.

Why this matters:

All 3 subaccounts in this task must be created inside Human Resources. If you create them anywhere else, the result will be incorrect.

Step 1 - Open the Human Resources Directory

What to do

In the left menu, choose Directories.

In the list, select Human Resources.

Explanation:

This is the parent directory where the required HR subaccounts must be created.

What to verify

You should now be inside the Human Resources directory.

Step 2 - Start Creating EU HCM Dev

What to do

Inside Human Resources, open Subaccounts.

Click Create → Subaccount.

Explanation:

This opens the form to create the first HR subaccount.

Step 3 - Enter Values for EU HCM Dev

What to do

Enter the following:

Display Name / Name: EU HCM Dev

Description: Human Resources Development

Subdomain: btpops#####-eu-hcm-dev

Set the region as:

Cloud Provider: Amazon Web Services (AWS)

Region: Europe (Frankfurt)

Technical Region / Environment: cf-eu10

Then click Create.

Explanation:

This creates the development subaccount for HR and defines the required provider and region.

This first subaccount is important because it will be used as the source subaccount for the next two subaccounts.

What to verify

After creation, you should see:

EU HCM Dev

under the Human Resources directory.

Step 4 - Confirm EU HCM Dev Exists

What to do

Check the subaccounts list in Human Resources.

Explanation:

You must make sure EU HCM Dev is available before you create the next subaccounts, because both EU HCM Test and EU HCM Prod must use it as the source subaccount.

What to verify

You should see:

EU HCM Dev

If it is missing, create it correctly before moving on.

Step 5 - Start Creating EU HCM Test

What to do

Still in the Human Resources directory, click Create → Subaccount again.

Explanation:

This opens the form for the test subaccount.

Step 6 - Enter Values for EU HCM Test

What to do

Enter:

Display Name / Name: EU HCM Test

Description: Human Resources Testing

Subdomain: btpops#####-eu-hcm-test

Then select:

Source Subaccount: EU HCM Dev

Then click Create.

Explanation:

This creates the testing subaccount by using EU HCM Dev as the source subaccount.

This helps keep the configuration aligned with the development subaccount.

What to verify

After creation, you should see:

EU HCM Test

under Human Resources.

Step 7 - Start Creating EU HCM Prod

What to do

In Human Resources, click Create → Subaccount once more.

Explanation:

This opens the form for the production subaccount.

Step 8 - Enter Values for EU HCM Prod

What to do

Enter:

Display Name / Name: EU HCM Prod
Description: Human Resources Production
Subdomain: btpops#####-eu-hcm-prod

Then select:

Source Subaccount: EU HCM Dev

Enable:

Used in Production: Yes

Then click Create.

Explanation:

This creates the production HR subaccount based on EU HCM Dev and marks it as a production system.
The production setting is mandatory here.

What to verify

After creation, you should see:

EU HCM Prod

under Human Resources, and it should be marked as used in production.

Final Expected Result for Task 3

Inside the Human Resources directory, you must have these 3 subaccounts:

1. EU HCM Dev

Description: Human Resources Development

Subdomain: btpops#####-eu-hcm-dev

Region: Amazon Web Services (AWS) → Europe (Frankfurt) cf-eu10

2. EU HCM Test

Description: Human Resources Testing

Subdomain: btpops#####-eu-hcm-test

Source Subaccount: EU HCM Dev

3. EU HCM Prod

Description: Human Resources Production

Subdomain: btpops#####-eu-hcm-prod

Source Subaccount: EU HCM Dev

Used in Production: Yes

Common Mistakes to Avoid

1. Creating the subaccounts in the wrong directory

All 3 must be created inside:

Human Resources

Not under:

Global Account

Americas

Eurasia

Partner

2. Wrong subdomain values

Use exactly:

btpops#####-eu-hcm-dev

btpops#####-eu-hcm-test

btpops#####-eu-hcm-prod

Only replace ##### with your global account number.

3. Wrong region for EU HCM Dev

It must be:

Amazon Web Services (AWS)

Europe (Frankfurt)

cf-eu10

4. Wrong source subaccount

For both:

EU HCM Test

EU HCM Prod

you must select:

EU HCM Dev

5. Forgetting the production flag

For EU HCM Prod, make sure:

Used in Production is enabled
