

AZ-900 New Test Materials | AZ-900 Latest Learning Material

P.S. Free & New AZ-900 dumps are available on Google Drive shared by PracticeDump: <https://drive.google.com/open?id=1a86bG06Z7vr-gX2ZrfSrGUWBdYysvdXY>

Our AZ-900 exam simulation is selected many experts and constantly supplements and adjust our questions and answers. When you use our AZ-900 study materials, you can find the information you need at any time. When we update the AZ-900 preparation questions, we will take into account changes in society, and we will also draw user feedback. If you have any thoughts and opinions in using our AZ-900 Study Materials, you can tell us. We hope to grow with you and the continuous improvement of AZ-900 training engine is to give you the best quality experience.

Microsoft AZ-900: Microsoft Azure Fundamentals exam is the perfect way to validate your knowledge about Microsoft Azure. It is designed to test your understanding of cloud services, Azure services, and the benefits of using Azure. AZ-900 exam is ideal for individuals who are looking to start a career in cloud computing or for IT professionals who want to add cloud computing to their skillset.

Microsoft Azure is one of the fastest-growing cloud computing platforms in the world, and as such, more and more businesses are looking to utilize its capabilities. To help individuals and organizations understand the fundamentals of Azure, Microsoft created the AZ-900 (Microsoft Azure Fundamentals) certification exam. AZ-900 exam is designed to test an individual's knowledge of Azure's core services and concepts, making it the perfect starting point for anyone looking to learn more about the platform.

AZ-900 Latest Learning Material & AZ-900 Latest Test Report

In today's society, there are increasingly thousands of people put a priority to acquire certificates to enhance their abilities. With a total new perspective, our AZ-900 study materials have been designed to serve most of the office workers who aim at getting a AZ-900 certification. Our AZ-900 Test Guide keep pace with contemporary talent development and makes every learner fit in the needs of the society. There is no doubt that our AZ-900 latest question can be your first choice for your relevant knowledge accumulation and ability enhancement.

Microsoft Azure Fundamentals Sample Questions (Q246-Q251):

NEW QUESTION # 246

Which Azure service should you use to correlate events from multiple resources into a centralized repository?

- A. Azure Monitor
- B. Azure Stream Analytics
- C. Azure Analysis Services
- D. Azure Event Hubs

Answer: D

Explanation:

Section: Understand Core Azure Services

Explanation:

Azure Event Hubs is a big data streaming platform and event ingestion service. It can receive and process millions of events per second. Data sent to an event hub can be transformed and stored by using any real-time analytics provider or batching/storage adapters.

Azure Event Hubs can be used to ingest, buffer, store, and process your stream in real time to get actionable insights. Event Hubs uses a partitioned consumer model, enabling multiple applications to process the stream concurrently and letting you control the speed of processing.

Azure Event Hubs can be used to capture your data in near-real time in an Azure Blob storage or Azure Data Lake Storage for long-term retention or micro-batch processing.

NEW QUESTION # 247

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Statements	Yes	No
General Data Protection Regulation (GDPR) defines data protection and privacy rules.	☐	☐
General Data Protection Regulation (GDPR) applies to companies that offer goods or services to individuals in the EU.	☐	☐
Azure can be used to build a General Data Protection Regulation (GDPR)-compliant infrastructure.	☐	☐

Answer:

Explanation:

Statements	Yes	No
General Data Protection Regulation (GDPR) defines data protection and privacy rules.	☒	☐
General Data Protection Regulation (GDPR) applies to companies that offer goods or services to individuals in the EU.	☐	☐
Azure can be used to build a General Data Protection Regulation (GDPR)-compliant infrastructure.	☐	☐

Explanation

Yes

YES

YES

NEW QUESTION # 248

You have 1,000 virtual machines hosted on the Hyper-V hosts in a data center.

You plan to migrate all the virtual machines to an Azure pay-as-you-go subscription.

You need to identify which expenditure model to use for the planned Azure solution.

Which expenditure model should you identify?

- A. capital
- B. elastic
- C. operational
- D. scalable

Answer: C

Explanation:

Section: Describe Cloud Concepts

Explanation:

One of the major changes that you will face when you move from on-premises cloud to the public cloud is the switch from capital expenditure (buying hardware) to operating expenditure (paying for service as you use it).

This switch also requires more careful management of your costs. The benefit of the cloud is that you can fundamentally and positively affect the cost of a service you use by merely shutting down or resizing it when it's not needed.
