

Salesforce Comm-Dev-101 Exam Questions Preparation Material By RealValidExam

Salesforce Comm-Dev-101 Exam PDF Questions: A Smarter Way to Prepare

Preparing for the Salesforce Comm-Dev-101 exam often feels overwhelming because the material isn't just theoretical; it's deeply practical. Many candidates rely on scattered resources, memorization, or outdated notes, only to realize that the exam tests real-world application rather than surface-level knowledge.

If you've ever studied for hours but still felt unsure about your readiness, you're not alone. The issue isn't effort, it's strategy.

What Effective Preparation Actually Looks Like

Strong preparation starts with understanding how Salesforce exams are structured. Instead of asking you to recall definitions, the Comm-Dev-101 exam challenges your ability to solve problems using platform tools, development concepts, and best practices.

To prepare effectively, you need to:

- Work through scenario-based questions
- Understand why an answer is correct (not just what it is)
- Identify weak areas early and revisit them
- Practice consistently under time constraints

This approach builds not just knowledge, but confidence, the kind you need when facing complex exam questions.

But there's one more element that significantly accelerates this process.

The Role of PDF Questions in Exam Success

[Salesforce Comm-Dev-101 Exam PDF Questions](#) provide a structured and accessible way to practice anytime, anywhere. Unlike random online quizzes, well-organized PDFs allow you to follow a focused study path without distractions.

They help you:

- Simulate real exam conditions
- Reinforce key concepts through repetition
- Improve speed and accuracy
- Gain familiarity with question patterns

More importantly, they turn passive learning into active problem-solving.

To save you from the loss of time and money, RealValidExam is offering Salesforce Comm-Dev-101 Questions. - A. Hyponyms
- B. Synonyms
- C. Synonyms

Answer: A

NEW QUESTION # 157

A Digital Developer creates a B2C Commerce server connection in their UX Studio workspace. The Developer adds new cartridges to the workspace, but the cartridges do NOT execute as the Developer expects.

Which three things should the Digital Developer verify to ensure the cartridges are uploaded? (Choose three.)

- A. The cartridge is for the current version of B2C Commerce.
- B. The Active Server setting is enabled for the server connection.
- C. The server is configured to accept incoming connections.
- D. The Auto-Upload setting is enabled for the server connection.
- E. The credentials for the server connection are correctly entered.

Answer: A,C,D

NEW QUESTION # 158

A Digital Developer has been given a requirement to add fault tolerance to an existing web service integration that uses Service Framework. Administrators at Universal Containers need to be able to configure the timeout and rate limiting.

Which approach should the Developer use to implement the requirement?

- A. Implement a `ServiceUnavailableException` exception handler to execute fallback code.
- B. Use the `setTimeout` method to execute fallback code if the request has NOT completed.
- C. Implement a condition that checks to see if the response was empty and execute fallback code if true.
- D. Create a site preference to store timeout settings and implement an `IOException` handler to execute fallback code.

Answer: A

NEW QUESTION # 159

A developer set up a new site with Taxation: Net. However, the business requirements changed and the site now needs to be Taxation:Gross. The Business Manager interface does not give this option.

Which sequence of steps is necessary to change the site to gross taxation?

- A. Unlock the site preferences and then change the Taxation setting to Gross
- B. Create a new site with Taxation set to Gross, then delete the old site.

Option	Description
Taxation Policy	Determines whether product and service prices are treated as gross or net prices for the site. This policy is configured at site creation and can only be changed by Commerce Cloud Support.

- C. Make sure that the developer has "Administrator" Access, then change the Taxation
- D. Change the global setting "Enable Taxation Methods" to true, then change the Taxation

Answer: B

NEW QUESTION # 160

.....
