And you will be amazed to find that our F3 exam questions are exactly the same ones in the real exam.

CIMA F3 Financial Strategy Sample Questions (Q389-Q394):

NEW QUESTION # 389
H Company has a fixed rate load at 10.0%, but wishes to swap to variable. It can borrow at LIBOR 8%.
The bank is currently quoting swap rates of 3.1% (bid) and 3.5% (ask).
What net rate will H Company pay if it enters into the swap?

- A. LIBOR +6.9%
- B. LIBOR +6.5%
- C. LIBOR +8%

- D. LIBOR +3.1%

Answer: A

NEW QUESTION # 390
Which THREE of the following long term changes are most likely to increase the credit rating of a company?

- A. A decrease in the (Net debt) / (Earnings before interest, tax, depreciation and amortisation) ratio.
- B. A decrease in the (Book value of debt) / (Book value of equity) ratio.
- C. An increase in the free cashflow generated from operations.
- D. A decrease in the dividend cover ratio.
- E. An increase in the interest cover ratio.

Answer: A,C,E

Explanation:
We're looking for long-term changes that would improve a company's credit rating (i.e. reduce perceived credit risk and increase capacity to service debt):
A). Increase in interest cover (EBIT / interest) # higher coverage, safer for lenders # positive.
B). Decrease in (Net debt)/(EBITDA) # lower leverage relative to earnings # positive.
C). Increase in free cash flow from operations # more internally generated cash to pay interest and repay debt # positive.
D). Decrease in (Book debt)/(Book equity) is also a good sign in reality, but the question restricts us to three; exam focus is usually on coverage and cash flow-based ratios, so A, B and C are the best three.
E). Decrease in dividend cover (earnings / dividend) means paying a larger proportion of earnings out as dividends # less retained profit and weaker protection for creditors # negative for credit rating.
So the three most likely to improve the rating: A, B, C.

NEW QUESTION # 391
The ex div share price of a company's shares is $2.20.
An investor in the company currently holds 1,000 shares.
The company plans to issue a scrip dividend of 1 new share for every 10 shares currently held.
After the scrip dividend, what will be the total wealth of the shareholder?
Give your answer to the nearest whole $.
$? .

- A. 0
- B. 1

Answer: B

NEW QUESTION # 392
Company A plans to acquire a minority stake in Company B.
The last available share price for Company B was $0.60.
Relevant data about Company B is as follows:
* A dividend per share of $0.08 has just been paid
* Dividend growth is expected to be 2%
* Earnings growth is expected to be 4%
* The cost of equity is 15%
* The weighted average cost of capital is 13%
Using the dividend growth model, what would be the expected change in share price?

- A. $0.16 increase
- B. $0.07 fall
- C. $0.03 increase
- D. $0.14 increase

Answer: C

NEW QUESTION # 393

Which of the following statements about companies seeking a stock market listing is correct?

- A. When a company seeks a listing this may unsettle its staff, potentially resulting in a loss of valued employees.
- B. A listing may make it harder for a company to raise money from its existing lenders.
- C. The enhanced reputation of the company can improve its credit rating reducing the risk of non-payment to suppliers and lenders.
- D. A listing will require the owners to either sell a majority of their shares, or, if they retain their shares, to step down from the board.

Answer: C

NEW QUESTION # 394

......
