EDI101 Bridges Interfaces Exam 2023/2024 With complete solution

Verified

No, the encoding characters can be any printable character. - CORRECT ANSWERS Does every HL7 message have to be encoded with the characters |^~\& ?

The result is positive \T\ has a value of 2.7 x 10^3. - CORRECT ANSWERS Imagine that your message begins with MSH|^~\&. How would you encode the string "The result is positive & has a value of 2.7 x 10^3."?

Context; its meaning depends on the segment it follows. - CORRECT ANSWERS Why is the NTE segment special?

An empty field is ignored by the interface, whereas the delete character will delete information from the database, assuming the field in question supports the delete character. - CORRECT ANSWERS What is the difference between receiving an empty field || and the delete sequence "[]"?

X12, FHIR, NCPDP, DICOM, and Direct. - CORRECT ANSWERS Aside from HL7 Version 2, name two other standards supported in Bridges?

Epic's interfacing application. It consists of both the interface infrastructure to build, send, receive, and file messages along with the tools and utilities to maintain those interfaces. - CORRECT ANSWERS What is Bridges?

The Event Queue contains the information needed to build a message. Usually this is a patient ID, an encounter DAT, and the type of message to be built, amongst other information.

The Data Queue contains the text of HL7 messages and additional metadata.

The Control Queue is a to-do list of message numbers to send or file. - CORRECT ANSWERS What are stored in the Event Queue, Data Queue, and Control Queue?

No, never. They are purged only by an automated purge job. - CORRECT ANSWERS Are messages ever manually deleted from the Data Queue?

TCP/IP with an interface engine is the most common communication method.

Interconnect is used for HTTPS or other communication outside your local network.

The pass rate of the EDI101 training materials is 99%, we pass guarantee, and if you can't pass, money guarantee for your failure, that is money will return to your account. You just need to send the participation and the failure scanned, money will be returned. We can ensure that your money will be returned, either the certification or the money back. Besides the EDI101 Training Materials include the question and answers with high-quality, you will get enough practice.

EPIC EDI101 Exam Syllabus Topics:

Section	Objectives
	- Interface setup and profile variables
Topic 1: Interface Configuration (Bridges Tools)	1. System defaults and configuration management 2. Trigger configuration and routing rules
	- Error logging and classification
Topic 2: Error Handling & Troubleshooting	1. Error codes and root cause analysis 2. Workqueues and resolution workflows

- Message Processing & Transport

- 1. Message queues and monitoring tools
- 2. Message routing and transmission rules

Topic 3: Epic Bridges Interface Foundations

- Interface Architecture Overview

- 1. Interface system components and message flow
- 2. HL7 messaging basics (v2 structure, segments, triggers)

- Message retriggering and resubmission

Topic 4: Message Operations & Utilities

- 1. Message search and message companion tools

Strengthen your Exam Preparation using Updated EPIC EDI101 Questions

Under the help of our EDI101 exam questions, the pass rate among our customers has reached as high as 98% to 100%. We are look forward to become your learning partner in the near future. As we all know, to make something right, the most important thing is that you have to find the right tool. Our EDI101 study quiz is the exact study tool to help you pass the EDI101 exam by your first attempt.

EPIC CEE: Bridges Interfaces Application Essentials Exam (2026 Version) Sample Questions (Q32-Q37):

NEW QUESTION # 32

Which of the following messages cannot be retriggered? (SELECT ALL THAT APPLY)

- A. Incoming messages
- B. Messages resubmitted from other messages
- C. Messages retriggered from other messages
- D. Messages loaded from a flat file

Answer: A,C

Explanation:

Retriggering is specifically an outgoing interface action. Therefore, Incoming messages (Option D) cannot be retriggered. Additionally, to maintain a clear audit trail and prevent logic errors, Bridges does not allow you to retrigger a message that was already the result of a retrigger (Option A).

NEW QUESTION # 33

An ID Type can be reused for multiple Chronicles master files.

- A. True
- B. False

Answer: B

Explanation:

In Epic's Identity framework, an ID Type is explicitly linked to a single Chronicles master file (e.g., EPT for patients, SER for providers). This one-to-one relationship ensures that the system knows exactly which master file to search when an ID of that type is received in a message. You cannot use a single ID Type definition to identify both a patient and a provider.

NEW QUESTION # 34

How can incoming interfaces determine the ID type to use when looking up a record? (SELECT ALL THAT APPLY)

- A. Match the ID type identifiers from the message to the External System Settings section of the ID Type configuration
- B. Use a default ID type specified on the interface
- C. Incoming interfaces do not need to lookup an ID type
- D. Find any record with the received ID and choose an associated ID type

Answer: A,B

Explanation:

Incoming interfaces must identify the correct ID Type to successfully locate a record in Chronicles. They do this in two primary ways:

- * Default ID Type: The interface can be configured with a fallback ID type to use if no other information is provided.
- * External System Settings: The interface can look at identifiers within the HL7 message (like the Assigning Authority in PID-3.4) and match them against the "External System Settings" defined in the ID Type configuration. Option C is incorrect because searching without a defined ID type would be inefficient and could lead to incorrect record matches.

NEW QUESTION # 35

An interface can be started if one or more of the profile variables say "Review Required."

- A. True
- B. False

Answer: B

Explanation:

The "Review Required" status acts as a safety hard-stop in Bridges. This status usually appears after a system upgrade or when a new interface is created from a template. Bridges prevents the daemons from starting as long as a variable is marked for review to ensure that an analyst has verified that the settings are appropriate for the specific environment, preventing potential data filing errors.

NEW QUESTION # 36

Editing a message in the messages activity can overwrite existing messages on the data queue.

- A. True
- B. False

Answer: B

Explanation:

When you edit a message within the Bridges Messages activity, you are not overwriting the original message on the data queue. Instead, Bridges typically creates a new version of the message for resubmission or processing, preserving the original message's history and integrity for auditing purposes. The original data remains intact as part of the interface's message log.

NEW QUESTION # 37

.....

With EDI101 study engine, you will get rid of the dilemma that you work hard but cannot improve. With our EDI101 learning materials, you can spend less time but learn more knowledge than others. EDI101 exam questions will help you reach the peak of your career. Just think of that after you get the EDI101 Certification, you will have a lot of opportunities of going to bigger and better company and getting higher incomes! what a brighter future!
