

Valid AI-102 Test Sample | AI-102 Test Torrent

P.S. Free & New AI-102 dumps are available on Google Drive shared by PassReview: <https://drive.google.com/open?id=1XM6ddHIHvhX4sqXHqq17A5s2Lr8FB7BD>

These Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice test questions also boost your confidence. If you have prepared well, tried all the Microsoft Designing and Implementing a Microsoft Azure AI Solution Certification Exams, and understood each concept clearly, there is minimal or no chance of failure. Desktop Practice exam software and web-based Designing and Implementing a Microsoft Azure AI Solution (AI-102) practice test are available at PassReview.

Microsoft AI-102 certification exam is designed to test individuals on their ability to design and implement Microsoft Azure AI solutions. AI-102 exam is targeted towards individuals who have experience working with Azure and have a strong understanding of AI and machine learning concepts. AI-102 exam measures the candidate's proficiency in several areas, including designing AI solutions that meet business requirements, implementing AI models and solutions, monitoring and troubleshooting AI solutions, and managing the lifecycle of AI solutions.

To prepare for the Microsoft AI-102 Exam, candidates are recommended to have a good understanding of AI concepts, programming languages such as Python and R, and experience in using Azure AI services. Microsoft offers various resources, including online courses, practice exams, and study guides, to help candidates prepare for the exam and increase their chances of passing it on the first attempt.

AI-102 Test Torrent & AI-102 Latest Study Guide

PassReview will provide you with actual Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam questions in pdf to help you crack the AI-102 exam. So, it will be a great benefit for you. If you want to dedicate your free time to preparing for the Designing and Implementing a Microsoft Azure AI Solution (AI-102) exam, you can check with the soft copy of pdf questions on your smart devices and study when you get time. On the other hand, if you want a hard copy, you can print AI-102 exam questions.

Microsoft AI-102 Certification Exam is designed to test your skills and knowledge in designing and implementing Microsoft Azure AI solutions. It is an important certification for professionals who want to demonstrate their expertise in developing and implementing AI solutions in the Azure environment.

Microsoft Designing and Implementing a Microsoft Azure AI Solution Sample Questions (Q136-Q141):

NEW QUESTION # 136

You have an Azure subscription that contains an Azure AI Video Indexer account.

You need to add a custom brand and logo to the indexer and configure an exclusion for the custom brand. How should you complete the REST API call? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Microsoft

```

```

NEW QUESTION # 137

You need to create a new resource that will be used to perform sentiment analysis and optical character recognition (OCR). The solution must meet the following requirements:

- * Use a single key and endpoint to access multiple services.
- * Consolidate billing for future services that you might use.
- * Support the use of Computer Vision in the future.

How should you complete the HTTP request to create the new resource? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

NEW QUESTION # 138

You need to develop an automated call handling system that can respond to callers in their own language. The system will support only French and English.

Which Azure Cognitive Services service should you use to meet each requirement? To answer, drag the appropriate services to the correct requirements. Each service may be used once, more than once, or not at all.

You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Services**ANSWER AREA**

Speaker Recognition

Detect the incoming language.

Text Analytics

Respond in the callers' own language:

Text to Speech

Translator

Answer:

Explanation:

Services

Speaker Recognition

Speech to Text

Text Analytics

Text to Speech

Translator

Detect the incoming language:

Text Analytics

Respond in the callers' own language:

Translator

Explanation:

Text Description automatically generated with low confidence

Detect the incoming language:

Text Analytics

Respond in the callers' own language:

Translator

Box 1: Text Analytics

The Language Detection feature of the Azure Text Analytics REST API evaluates text input for each document and returns language identifiers with a score that indicates the strength of the analysis.

Box 2: Translator

Translator is a cloud-based neural machine translation service that is part of the Azure Cognitive Services family of REST APIs. Translator can be used with any operating system and powers many Microsoft products and services used by thousands of businesses worldwide to perform language translation and other language-related operations.

NEW QUESTION # 139

You have a product support manual.

You need to build a product support chatbot based on the manual. The solution must minimize development effort and costs.

What should you use?

- A. Azure AI Language Custom question answering
- B. Azure AI Phi-3-medium with fine-tuning
- C. **Azure OpenAI GPT-4 with grounding data that uses Azure AI Search**
- D. Azure AI Document intelligence

Answer: C

Explanation:

Azure OpenAI On Your Data makes it easier for developers to connect, ingest and ground their enterprise data to create personalized copilots (preview) rapidly. It enhances user comprehension, expedites task completion, improves operational efficiency, and aids decision-making.

Azure OpenAI On Your Data enables you to run advanced AI models such as GPT-3.5-Turbo and GPT-4 on your own enterprise data without needing to train or fine-tune models. You can chat on top of and analyze your data with greater accuracy. You can specify sources to support the responses based on the latest information available in your designated data sources.
