시험대비 CT-UT시험기출문제 최신버전 덤프

많은 사이트에서ISTQB 인증CT-UT 인증시험대비자료를 제공하고 있습니다. 그중에서 Itcertkr를 선택한 분들은 ISTQB 인증CT-UT시험통과의 지름길에 오른것과 같습니다. Itcertkr는 시험에서 불합격성적표를 받으시면 덤프비용을 환불하는 서

최신 Usability Testing CT-UT 무료샘플문제 (Q19-Q24):

질문 # 19

Which of the following is the correct distinction between formative and summative usability evaluation?

- A. Summative evaluations mostly rely on experts, formative evaluations require users
- B. Summative evaluations mostly rely on user tests, formative evaluations require experts
- C. Summative evaluations focus on improvement, formative evaluations assess the outcome
- **D. Summative evaluations assess the outcome, formative evaluations focus on improvement**

정답: D

설명:

Formative usability evaluation is conducted during the development process to identify usability problems and improve the product iteratively. It is diagnostic and improvement-focused. Summative evaluation, on the other hand, is done after development to assess the final product's usability, measuring how well it meets defined usability goals. Therefore, the correct distinction is that formative evaluation focuses on improvement, and summative evaluation assesses the outcome. This distinction aligns with widely accepted models such as those defined by ISO 9241-210 and usability.gov.

질문 # 20

Which of the following is a principal task of the usability test moderator role?

- A. Log usability problems
- B. Create a survey plan
- C. Write a usability test plan
- **D. Define testing tasks**

정답: D

설명:

The usability test moderator plays a crucial role during the execution phase of a usability test. Their principal task is to facilitate the test sessions by guiding participants through predefined testing tasks, observing behaviors, and ensuring that the test environment is neutral and free from bias. Defining testing tasks, however, is primarily done during the test design phase by the usability test designer or analyst, but the moderator ensures these tasks are clearly communicated and administered to participants during the session. Logging usability problems (option B) is often done by observers or analysts reviewing session recordings or notes, not directly by the moderator during live testing. Creating a survey plan (option C) and writing the usability test plan (option D) are preparatory activities generally done before the test sessions and are not the moderator's main focus. Therefore, the principal role of the moderator centers on conducting the sessions and managing task delivery effectively to obtain authentic user interaction with the system under test.

질문 # 21

In a short conversation, a potential customer mentions that accessibility is of great importance to them. What does this mean?

- A. They focus on agile development
- B. They focus on quantitative usability evaluations
- **C. They also seek to address users with limitations**
- D. They use prototyping in their development process

정답: C

설명:

When a customer emphasizes the importance of accessibility, it means they are concerned with ensuring that users with disabilities or limitations are not excluded from using their products or services. Accessibility is about inclusiveness-providing equal access and opportunity to all users regardless of physical or cognitive ability. Option C directly reflects this understanding. The other options (A, B, and D) are aspects of usability or development methodologies but do not relate to addressing the needs of users with disabilities, which is the core focus of accessibility.

질문 # 22

What does the Equality Act address?

- A. It states that websites have to adhere to the WCAG conformity level AA
- B. It obligates organizations to make sites accessible at all costs

- C. It protects people from discrimination in the workplace and in wider society
- D. It states that websites have to adhere to the WCAG conformity level A

정답: C

설명:

The Equality Act 2010 (UK) is legislation designed to protect individuals from discrimination in various areas, including employment and access to goods and services-this includes digital products like websites.

While it does not directly mandate WCAG compliance levels (A or AA), it implies that digital services must be accessible to users with disabilities. Organizations are required to make "reasonable adjustments" to avoid discrimination. Therefore, the most accurate and comprehensive answer is B.

질문 # 23

Which of the following is a principal task of the usability tester role?

- A. Communicate with test participant
- B. Perform pre-session briefing of participants
- C. Discuss findings from usability test
- D. Define testing tasks

정답: A

설명:

The usability tester, often synonymous with the usability test moderator in practice, is primarily responsible for interacting directly with the test participants during the usability testing sessions. This role includes communicating with participants to guide them through test tasks, answering questions without leading responses, and ensuring the session runs smoothly. Effective communication is essential to facilitate participant comfort, elicit genuine user behaviors, and capture accurate usability data.

Performing the pre-session briefing (Option A) may be done by the usability tester but is often a shared responsibility or part of test facilitation protocols. Discussing findings (Option C) typically falls to analysts or usability experts after testing sessions are completed and data analyzed. Defining testing tasks (Option D) is usually done by test designers or analysts during test planning, not during the test execution.

Therefore, communicating with test participants during testing is a core, principal task of the usability tester role.
