HPE2-W12 Free Learning Cram, New HPE2-W12 Test Book

Our SurePassExams HPE2-W12 exam certification training material is the collection of experience and innovation results of highly certified IT professionals in IT industry. We guarantee that after you buy SurePassExams HPE2-W12 certification exam training materials, we will provide free renewal service for one year. If HPE2-W12 Exam Certification training materials have any quality problem or you fail HPE2-W12 exam certification, we will give a full refund unconditionally.

HP Selling HPE Aruba Networking Solutions Sample Questions (Q43-Q48):

NEW QUESTION # 43

What common challenge for network admins is created by an expanding remote workforce?

- A. Home equipment often lacks support for Wi-Fi 6.
- **B. Typical VPN solutions are complex and take a lot of time to support.**
- C. Data center networks are not designed to receive so much external traffic.
- D. The shift in traffic away from the campus makes optimization difficult.

Answer: B

Explanation:

The correct answer is B because as remote workforces expand, traditional VPN solutions have become a major challenge for IT teams. VPNs are complex to scale, create management overhead, and introduce performance bottlenecks. HPE Aruba Networking highlights that organizations increasingly need to move from VPN-based access to Zero Trust Network Access (ZTNA) and SASE models to simplify operations and improve security.

NEW QUESTION # 44

A customer has many small sites that connect over a wide area network (WAN) to the customer's data center and access the Internet from there. Due to changes in traffic patterns, the CIO now wants to stop sending Internet-bound traffic through the data center, but the Head of IT Security is concerned about potential security risks from that change. What benefit of HPE Aruba Networking solutions should you emphasize?

- **A. HPE Aruba Networking offers SD-WAN solutions for branches with built-in next-generation firewall capabilities.**
- B. HPE Aruba Networking offers branch-in-the-box solutions with all the services branches require, so branch devices no longer need to send traffic to the Internet.
- C. HPE Aruba Networking Fabric Composer automatically establishes a secure fabric across all the customer's sites.
- D. HPE Aruba Networking solutions optimize network speeds to such a high degree that the company can continue sending all traffic through the data center.

Answer: A

Explanation:

The correct answer is C because HPE Aruba Networking Edge Connect SD-WAN provides secure local Internet breakout at branch sites with integrated next-generation firewall (NGFW) and security features. This allows Internet-bound traffic to be securely routed directly from the branch instead of being backhauled through the data center, while still ensuring full visibility and threat protection.

NEW QUESTION # 45

Which Aruba solution supports location services and asset tracking?

- A. Aruba NetEdit
- **B. Aruba Meridian**
- C. Aruba ClearPass
- D. Aruba AirWave

Answer: B

NEW QUESTION # 46

Which business outcome is a high priority for most Chief Information Security Officers (CISO)?

- A. Allowing network admins to use their preferred security monitoring tools.
- B. Planning network security so that they can assume no breach will ever occur.
- **C. Improving operational continuity by minimizing risks and attack surfaces.**
- D. Ensuring that employees can only access resources from within the corporate campus.

Answer: C

Explanation:

The correct answer is C because CISOs are primarily focused on reducing business risk, minimizing the attack surface, and ensuring

operational continuity. Instead of assuming that breaches will never occur, modern security strategies such as Zero Trust and SASE aim to mitigate risks, contain breaches, and protect critical business operations to maintain availability and resilience.

Relevant extracts from official HPE Aruba Networking documentation:

* "CISOs prioritize reducing the attack surface and ensuring operational resilience, recognizing that breaches are inevitable."

* "Aruba Zero Trust Security minimizes risk by continuously authenticating and authorizing all users and devices, ensuring least-privilege access."

* "By combining visibility, control, and automated enforcement, Aruba solutions help security leaders maintain business continuity while reducing exposure."

* "Operational continuity and resilience are the top business outcomes CISOs seek, enabled by proactive risk minimization strategies." Why the other options are incorrect:

* A Preferred tools may be useful, but tool choice is not the main business outcome for CISOs—it's about risk reduction and continuity.

* B Restricting access to only the corporate campus is outdated in today's hybrid and remote-first environments.

* D Assuming no breach will occur is unrealistic. Modern security models (Zero Trust, Assume Breach) accept that threats will happen and focus on resilience and minimization.

References (HPE Aruba Networking Solutions / Study Guides):

NEW QUESTION # 47

Which feature helps IT teams quickly identify network problems?

- A. Network analytics
- B. VLAN tagging
- C. Static routing
- D. DHCP pools

Answer: A

Explanation:

Aruba's analytics platform provides visibility into application and network performance.

NEW QUESTION # 48
