## PL-600 Test Questions Fee - Reliable PL-600 Test Cost

We also update frequently to guarantee that the client can get more learning PL-600 exam resources and follow the trend of the times. So if you use our PL-600 study materials you will pass the test with high success probability. And our PL-600 learning guide is high-effective. If you study with our PL-600 practice engine for 20 to 30 hours, then you can pass the exam with confidence and achieve the certification as well.

By earning the Microsoft PL-600 Certification, professionals demonstrate their expertise in designing and implementing solutions on the Microsoft Power Platform, which can lead to career advancement opportunities and increased earning potential. Microsoft Power Platform Solution Architect certification is also a valuable asset to organizations as it validates the technical competency of professionals in delivering solutions that drive business value and improve operational efficiency.

## Microsoft Power Platform Solution Architect Sample Questions (Q76-Q81):

**NEW QUESTION # 76**
You need to recommend methods for assigning security to each group of users.
The customer provides the following requirements:
* Customers need the ability to submit a case through an online portal.
* Portal must handle 75 concurrent users submitting cases.
* Service data must be retained for at least six years.

You need to determine which requirements are functional or non-functional.

Which requirements are functional or non-functional? To answer, drag the appropriate types to the correct requirements. Each type may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Functional

Functional requirements describe what the solution needs to do or its behaviors.

Box 2: Non-functional

Non-functional requirements commonly describe non-behavior aspects of the solution such as performance requirements.

Box 3: Non-functional

Examples of common non-functional requirement types include:

* Availability
* Compliance/regulatory
* Data retention/residency
* Performance (response time, and so on)
* Privacy
* Recovery time
* Security
* Scalability

## NEW QUESTION # 77

You need to recommend the appropriate components to meet the inspection requirements.

What should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:

Box 1: Security role

Microsoft Dataverse uses a role-based security model to help secure access to the database.

Scenario:

* You must prevent users from changing inspection order data once an inspection is marked as final.

* Supervisors must be able to modify standard checklists. Other employees must be prevented from modifying checklists.

Box 2: Data flow

Dataflows are a self-service, cloud-based, data preparation technology. Dataflows enable customers to ingest, transform, and load data into Microsoft Dataverse environments, Power BI workspaces, or your organization's Azure Data Lake Storage account.

Scenario: Provide a visual representation of the testing measurement limits for each step. Include an indication of how the measured value compares to measurement limits and whether the measurement is within tolerance. Users must be able to configure the visualizations to display the minimum value and maximum value, and whether the reading is within the tolerance of a single targeted value. It must also be able to be used for maintenance inspections once the machine has been installed.

https://docs.microsoft.com/en-us/dynamics365/field-service/configure-schedule-board

## NEW QUESTION # 79

You need to recommend components to meet the re-inspection requirements.
Which components should you recommend? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

**Answer:**

Explanation:

Explanation:
Box 1: Power Automate flow
Scenario: Inspection orders must be automatically marked for re-inspection should a machine fail inspection.
The new inspection order must be created by using the originating inspection order as a template.
Box 2: Business rule
* By combining conditions and actions, you can do any of the following with business rules:
* Set column values
* Clear column values
* Set column requirement levels
* Show or hide columns
* Enable or disable columns
* Validate data and show error messages
* Create business recommendations based on business intelligence.
