

Professional 350-701–100% Free Braindump Pdf | New 350-701 Test Objectives

P.S. Free & New 350-701 dumps are available on Google Drive shared by ITPassLeader: <https://drive.google.com/open?id=1cm8YGERi4fNCdNKToQ5Iu4cQMihLcZvU>

ITPassLeader 350-701 exam braindumps are authorized legal products which is famous for its high passing rate. Our dumps can cover nearly 95% questions of the real test, our answers and explanations are edited by many experienced experts and the correct rate is 100%. Our Cisco 350-701 Exam Braindumps provide three versions to satisfy different kinds of customers' habits: PDF version, Soft test engine and APP test engine.

Available Certification Paths

The Cisco SCOR 350-701 exam brings one the Cisco Certified Specialist – Security Core certificate. Also, it will take candidates closer to obtaining the CCNP Security and the CCIE Security certifications. To earn the first one, applicant should obtain the passing score in any of the six offered concentration tests. The second one requires students to pass the CCIE Security v6.0 lab exam. This certification is for candidates who want to prove they are experts in implementing and operating Cisco security technologies.

Cisco 350-701 Certification Exam is an ideal choice for IT professionals who want to advance their careers in the field of network security. Implementing and Operating Cisco Security Core Technologies certification is particularly valuable for those who work in security operations centers, network administration, or security consulting. By earning this certification, candidates can demonstrate their ability to design, implement, and manage secure networks and protect them against cyber threats.

New 350-701 Test Objectives, New 350-701 Exam Labs

Since our company's establishment, we have devoted mass manpower, materials and financial resources into 350-701 exam materials and until now, we have a bold idea that we will definitely introduce our 350-701 study materials to the whole world and make all people that seek fortune and better opportunities have access to realize their life value. Our 350-701 Practice Questions, therefore, is bound to help you pass through the 350-701 exam and win a better future.

Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q525-Q530):

NEW QUESTION # 525

A company recently discovered an attack propagating throughout their Windows network via a file named abc428565580xyz.exe. The malicious file was uploaded to a Simple Custom Detection list in the AMP for Endpoints Portal and the currently applied policy for the Windows clients was updated to reference the detection list. Verification testing scans on known infected systems shows that AMP for Endpoints is not detecting the presence of this file as an indicator of compromise. What must be performed to ensure detection of the malicious file?

- A. Use an Advanced Custom Detection List instead of a Simple Custom Detection List
- B. Upload the malicious file to the Blocked Application Control List
- C. Upload the SHA-256 hash for the file to the Simple Custom Detection List
- D. Check the box in the policy configuration to send the file to Cisco Threat Grid for dynamic analysis

Answer: C

NEW QUESTION # 526

An engineer is trying to decide whether to use Cisco Umbrella, Cisco CloudLock, Cisco Stealthwatch, or Cisco AppDynamics Cloud Monitoring for visibility into data transfers as well as protection against data exfiltration. Which solution best meets these requirements?

- A. Cisco Stealthwatch
- B. Cisco CloudLock
- C. Cisco AppDynamics Cloud Monitoring
- D. Cisco Umbrella

Answer: B

Explanation:

Cisco CloudLock is a cloud-native cloud access security broker (CASB) that helps you move to the cloud safely. It protects your cloud users, data, and apps. CloudLock's simple, open, and automated approach uses APIs to manage the risks in your cloud app ecosystem. With CloudLock you can more easily combat data breaches while meeting compliance regulations¹.

Cisco CloudLock provides the following features that meet the requirements of visibility into data transfers as well as protection against data exfiltration:

* User security: Cloudlock uses advanced machine learning algorithms to detect anomalies based on multiple factors. It also identifies activities outside allowed countries and spots actions that seem to take place at impossible speeds across distances¹.

* Data security: Cloudlock's data loss prevention (DLP) technology continuously monitors cloud environments to detect and secure sensitive information. It provides countless out-of-the-box policies as well as highly tunable custom policies. It also supports inline and out-of-band data inspection and blocking capabilities to protect sensitive data².

* App security: The Cloudlock Apps Firewall discovers and controls cloud apps connected to your corporate environment. You can see a crowd-sourced Community Trust Rating for individual apps, and you can ban or allowlist them based on risk¹.

The other solutions do not provide the same level of visibility and protection as Cisco CloudLock:

* Cisco Umbrella is a cloud-delivered network security service that provides DNS-layer security, secure web gateway, cloud-delivered firewall, cloud access security broker, and threat intelligence³. It does not offer data security features such as DLP, data inspection, and data blocking⁴.

* Cisco AppDynamics Cloud Monitoring is a cloud-native application performance management solution that helps you monitor, troubleshoot, and optimize your cloud applications. It does not offer user security, data security, or app security features as a CASB solution.

* Cisco Stealthwatch is a network traffic analysis solution that provides visibility and threat detection across your network, endpoints, and cloud. It does not offer data security features such as DLP, data inspection, and data blocking.

NEW QUESTION # 527

Which two capabilities of Integration APIs are utilized with Cisco DNA center? (Choose two)

- A. Upgrade software on switches and routers
- B. Automatically deploy new virtual routers
- C. Connect to ITSM platforms
- D. Create new SSIDs on a wireless LAN controller
- E. Third party reporting

Answer: C,E

Explanation:

NEW QUESTION # 528

V

ADD RULE

Refer to the exhibit When configuring this access control rule in Cisco FMC, what happens with the traffic destined to the DMZinside zone once the configuration is deployed?

- A. No traffic will be allowed through to the DMZ_inside zone regardless of if it's trusted or not
- B. No traffic will be allowed through to the DMZ_inside zone unless it's already trusted
- C. All traffic from any zone will be allowed to the DMZ_inside zone only after inspection
- D. All traffic from any zone to the DMZ_inside zone will be permitted with no further inspection

Answer: D

Explanation:

The access control rule in the exhibit has the following characteristics:

- * The rule name is DMZ_Rule and it is enabled.
- * The action set for this rule is Trust, meaning traffic matching this rule will not be subjected to further inspection.
- * The source zones are not specified, meaning any zone can match this rule.
- * The destination zone is DMZ_Inside, meaning only traffic destined to this zone can match this rule.

Therefore, the effect of this rule is that all traffic from any zone to the DMZ_Inside zone will be permitted with no further inspection. This is the correct answer, option A.

The other options are incorrect because they do not match the configuration of the rule or the behavior of the Trust action. Option B is incorrect because traffic will be allowed through to the DMZ_Inside zone, not blocked. Option C is incorrect because traffic will not be inspected before being allowed to the DMZ_Inside zone. Option D is incorrect because traffic does not need to be trusted to be allowed to the DMZ_Inside zone. References:

NEW QUESTION # 529

During a recent security audit a Cisco IOS router with a working IPSEC configuration using IKEv1 was flagged for using a wildcard mask with the crypto isakmp key command The VPN peer is a SOHO router with a dynamically assigned IP address Dynamic DNS has been configured on the SOHO router to map the dynamic IP address to the host name of vpn.sohoroutercompany.com In addition to the command crypto isakmp key Cisc425007536 hostname vpn.sohoroutercompany.com what other two commands are now required on the Cisco IOS router for the VPN to continue to function after the wildcard command is removed? (Choose two)

- A. Add the dynamic keyword to the existing crypto map command
- B. ip host vpn.sohoroutercompany.com <VPN Peer IP Address>
- C. ip name-server <DNS Server IP Address>
- D. fqdn vpn.sohoroutercompany.com <VPN Peer IP Address>
- E. crypto isakmp identity hostname

Answer: A,C

NEW QUESTION # 530

.....

Getting Cisco certification is a good way for you to access to IT field. But you may find that real test questions are difficult and professional and you have no time to prepare the 350-701 valid test. So it is time that our latest dumps torrent and training materials help you get high passing score in the process of 350-701 practice test at your first attempt.
