

# 100% Pass Quiz Huawei - H12-841\_V1.5 - Perfect HCIP-Datacom-Campus Network Planning and Deployment V1.5 Dumps

If you have time to know more about our H12-841\_V1.5 study materials, you can compare our study materials with the annual real questions of the exam. In addition, we will try our best to improve our hit rates of the H12-841\_V1.5 exam questions. You will not wait for long to witness our great progress. It is worth fighting for your promising future with the help of our H12-841\_V1.5 learning guide. As you can see that our H12-841\_V1.5 training braindumps are the best seller in the market.

No matter where you are, we will ensure that you can use our H12-841\_V1.5 guide quiz at any time. We have provided you with three versions for your choice: the PDF, Software and APP online. At home, you can use the Software. Outside, you can use the APP version of our H12-841\_V1.5 Study Materials. If you like the aroma of paper, you can choose the PDF version. You can carry the printed material with you and write your own notes on it. If you want to know more about them, just free download the demos of our H12-841\_V1.5 exam questions.

## Practice Huawei H12-841\_V1.5 Exams, Test H12-841\_V1.5 Questions Pdf

We understand you not only consider the quality of our HCIP-Datacom-Campus Network Planning and Deployment V1.5 prepare torrents, but price and after-sales services and support, and other factors as well. So our HCIP-Datacom-Campus Network Planning and Deployment V1.5 prepare torrents contain not only the high quality and high accuracy H12-841\_V1.5 Test Braindumps but comprehensive services as well. By the free trial services you can get close realization with our H12-841\_V1.5 quiz guides, and know how to choose the perfect versions before your purchase.

## 华为 HCIP-Datacom-Campus Network Planning and Deployment V1.5 Sample Questions (Q223-Q228):

### NEW QUESTION # 223

(Free mobility implements policy management and permission control based on users' VLAN IDs and IP addresses.)

- A. FALSE
- B. TRUE

**Answer: A**

Explanation:

In Huawei campus network solutions, free mobility is a user-centric access control mechanism designed to decouple network policies

from physical locations and traditional network identifiers. According to HCIP Datacom Campus Network documentation, free mobility does not rely on VLAN IDs or IP addresses as the basis for policy management and permission control. Instead, it is implemented based on user identity, such as user accounts, roles, user groups, or device identities.

Traditional networks often bind security policies to VLANs or IP subnets, which means users receive different permissions when they move to different access points or switch ports. This approach lacks flexibility and increases configuration complexity. Free mobility solves this problem by using centralized authentication and authorization mechanisms, such as 802.1X or MAC authentication combined with AAA, to dynamically assign policies after user authentication.

Once a user is authenticated, the network enforces access permissions based on predefined user roles or groups, regardless of where the user connects to the network. Even if the user's IP address or VLAN changes due to roaming, the same security policy is consistently applied. This ensures seamless access experience, simplifies network management, and enhances security control. Because free mobility is identity-based rather than VLAN- or IP-based, the statement claiming that it implements policy management and permission control based on users' VLAN IDs and IP addresses is incorrect. Therefore, the correct answer is FALSE.

#### NEW QUESTION # 224

In Huawei's WAN bandwidth optimization solution, which of the following technologies can "reduce bandwidth usage while ensuring smooth live streaming" for "live video traffic transmitted across regions"?

- A. Only audio streams are transmitted, not video streams, resulting in a poor user experience.
- B. **Dynamic bitrate and layered encoding for live video (resolution adjusted based on link quality)**
- C. Fixed bitrate transmission of live video results in buffering when the link is congested.
- D. Lowering the live stream frame rate results in poor video smoothness.

**Answer: B**

#### NEW QUESTION # 225

In Huawei's SD-WAN solution, for the scenario of "VPN communication between multiple branches", which of the following technologies can "achieve direct communication between branches without the need for headquarters relay"?

- A. All inter-branch communication is relayed through headquarters, increasing latency.
- B. Only branch offices are allowed to access headquarters; direct communication between branches is prohibited.
- C. **SD-WAN inter-branch full interconnection tunnel technology (dynamically establishing direct connection tunnels between branches)**
- D. Manually creating point-to-point tunnels for each pair of branches is complex to configure.

**Answer: C**

#### NEW QUESTION # 226

In the deployment of BGP routing policies in a wide area network, which of the following BGP attributes can be used to "control route reception and advertising" to achieve route optimization?

(Multiple choice)

- A. Ignore BGP attributes and prioritize routes based solely on prefix length.
- B. **MED (Affects the preferred order of routing for other ASs)**
- C. No routing policy is configured; all BGP routes are received and advertised.
- D. **Local Preference (Controls route preference within the local AS)**
- E. **AS\_PATH (Filter routes by AS path length or specific AS)**

**Answer: B,D,E**

#### NEW QUESTION # 227

In Huawei's WAN bandwidth optimization solution, for "low-bit-rate IoT device data (such as sensor- collected data) transmitted across regions", which of the following technologies can "reduce data transmission overhead and improve transmission efficiency"?

- A. **IoT data packet aggregation technology (merging multiple small packets into one large packet for transmission)**
- B. Relying solely on link bandwidth expansion without optimizing data transmission mechanisms.

- C. Transmit raw IoT data directly without any optimization.
- D. Increase the data transmission frequency of IoT devices to ensure data real-time performance.

**Answer: A**

#### **NEW QUESTION # 228**

.....

As the old saying goes people change with the times. People must constantly update their stocks of knowledge and improve their practical ability. Passing the test H12-841\_V1.5 certification can help you achieve that and buying our H12-841\_V1.5 study materials can help you pass the test smoothly. Our H12-841\_V1.5 Study Materials are superior to other same kinds of study materials in many aspects. Our products' test bank covers the entire syllabus of the test and all the possible questions which may appear in the test. Each question and answer has been verified by the industry experts.
