

IDP Valid Exam Labs | High-quality Dumps IDP Guide: CrowdStrike Certified Identity Specialist(CCIS) Exam

P.S. Free & New IDP dumps are available on Google Drive shared by CertkingdomPDF: <https://drive.google.com/open?id=1axGf0mGKA8sFy-NHKoQxg4afJsoBt6UG>

If you want to have a general review of what you have learned, you can choose us. IDP Online test engine has testing history and performance review, and it can help you have a general review of what you have learnt last time. Besides IDP Online test engine support all web browsers, and it is convenient and easy to learn, and you can have offline practice if you like. IDP Training Materials are high quality and you can pass the exam just one time if you choose us. We offer you free update for one year, and the update version for IDP exam dumps will be sent to your email automatically.

It is not hard to know that IDP study materials not only have better quality than any other study materials, but also have better quality. On the one hand, we can guarantee that you will pass the IDP exam easily if you learn our IDP Study Materials; on the other hand, you will learn a lot of useful knowledge from our IDP learning braindump. Are you ready? You can free download the demo of our IDP study materials on the web first.

Dumps IDP Guide - IDP Latest Test Preparation

Our IDP study tool boost three versions for you to choose and they include PDF version, PC version and APP online version. Each version is suitable for different situation and equipment and you can choose the most convenient method to learn our IDP test torrent. For example, APP online version is printable and boosts instant access to download. You can study the IDP Guide Torrent at any time and any place. The PC version of IDP study tool can stimulate the real exam's scenarios. We provide 365-days free update and free demo available.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q13-Q18):

NEW QUESTION # 13

Which of the following statements is NOT true as it relates to Identity Events, Detections, and Incidents?

- A. A detection can become an element of an incident that preceded it in time
- B. Not all events are security events that become elements of detections
- C. An event can become an element of a detection that preceded it in time
- **D. Events related to an incident that occur after the incident is marked In Progress will create a new incident**

Answer: D

Explanation:

Falcon Identity Protection follows a correlation and enrichment model where events, detections, and incidents are dynamically linked over time. According to the CCIS curriculum, events that occur after an incident is marked In Progress do not automatically create a new incident. Instead, related events and detections are typically added to the existing incident, provided they fall within the incident's correlation and suppression window.

This behavior allows Falcon to present a single evolving incident, showing the full progression of an identity attack rather than fragmenting activity into multiple incidents. Therefore, statement A is not true.

The other statements are correct:

- * Detections can be retroactively associated with incidents that occurred earlier if correlation logic determines relevance.
- * Events can be linked to detections even if the detection is created after the event occurred.
- * Not all events are security-relevant; many remain informational and never become detections.

This adaptive correlation model is a core concept in CCIS training and supports efficient investigation and incident lifecycle management. Hence, Option A is the correct answer.

NEW QUESTION # 14

Which section of the Falcon menu is used to investigate the Event Analysis dashboard?

- **A. Explore**
- B. Configure
- C. Enforce
- D. Threat Hunter

Answer: A

Explanation:

In Falcon Identity Protection, the Explore section of the Falcon menu is used to investigate analytical views such as the Event Analysis dashboard. This aligns with the CCIS framework, which defines Explore as the primary area for interactive investigation, analytics, and risk exploration across identity data.

The Event Analysis dashboard is designed to help administrators analyze identity-related authentication events, behavioral patterns, and anomalous activity derived from domain traffic inspection and domain controller telemetry. These analytical capabilities are intentionally placed under Explore because this menu category supports hypothesis-driven investigation rather than enforcement or configuration actions.

By contrast:

- * Enforce is used to apply policy rules and automated controls.
- * Threat Hunter is focused on proactive hunting using queries and detection pivots.
- * Configure is used to manage settings, connectors, policies, and integrations.

The CCIS documentation explicitly associates dashboards such as Risk Analysis and Event Analysis with the Explore menu, emphasizing its role in understanding why risk exists before taking action. Therefore, Option C (Explore) is the correct and verified answer.

NEW QUESTION # 15

How should an organization address the domain risk score found in the Domain Security Overview page?

- A. Prioritizing the risks by severity, addressing the Medium (Yellow) risks first
- B. Prioritizing the risks by severity, addressing the Low (Green) risks first
- **C. Address the risks on the list from top to bottom as risks are presented in a descending order**
- D. Prioritizing the detections by severity, addressing the High (Red) detections first

Answer: C

Explanation:

The Domain Security Overview page in Falcon Identity Protection presents domain risks in a prioritized, descending order, based on a combination of severity, likelihood, and consequence. The CCIS curriculum emphasizes that organizations should address risks from top to bottom, as the list is already optimized to reflect the most impactful identity risks first.

This ordering allows security teams to focus remediation efforts where they will produce the greatest reduction in overall domain risk score. Addressing risks sequentially ensures alignment with Falcon's risk modeling and avoids misprioritization that could occur if teams focus only on color-based severity or individual detections.

The incorrect options reflect common misconceptions:

- * Medium risks should not be prioritized over higher-impact risks.

* Detections are different from risks and should not be addressed independently of risk context.

* Low risks are intentionally deprioritized by the platform.

By following the descending order provided in the Domain Security Overview, organizations align remediation with Falcon's Zero Trust-driven identity risk scoring methodology, making Option A the correct answer.

NEW QUESTION # 16

When creating an API key, which scope should be selected to retrieve Identity Protection detection and incident information?

- **A. Identity Protection Detections**
- B. Identity Protection Assessment
- C. Identity Protection Incidents
- D. Identity Protection Data

Answer: A

Explanation:

To retrieve identity-based detections and incident-related data using the CrowdStrike APIs, the API key must include the correct permission scope. According to the CCIS curriculum, the Identity Protection Detections scope is required to access identity-based detection and incident information through GraphQL.

This scope allows API queries to retrieve:

* Identity-based detections

* Associated incident metadata

* Detection attributes such as severity, status, and related entities

Incident data in Falcon Identity Protection is derived from detections, making the Detections scope the authoritative permission set for this information. Without this scope, GraphQL queries related to identity detections and incidents will fail authorization.

The other scopes are either too narrow or unrelated to detection retrieval. Therefore, Option A is the correct and verified answer.

NEW QUESTION # 17

Which option can be selected from the Threat Hunter menu to open the current Threat Hunter query in a new window as GraphQL format?

- **A. Open Query in API Builder**
- B. Export to API Builder
- C. Save as Custom Report
- D. Save as Custom Query

Answer: A

Explanation:

Falcon Threat Hunter provides a direct integration with the API Builder to support advanced investigation workflows and automation. According to the CCIS curriculum, analysts can take an existing Threat Hunter query and convert it into a GraphQL-compatible format by selecting Open Query in API Builder from the Threat Hunter menu.

This option opens the current query in a new window within API Builder, automatically translating the query structure into GraphQL syntax where applicable. This enables security teams to reuse validated hunting logic for automation, reporting, or external integrations without rewriting queries from scratch.

The other menu options serve different purposes:

* Export to API Builder is not a valid menu action.

* Save as Custom Query stores the query for reuse inside Threat Hunter.

* Save as Custom Report generates a reporting artifact, not an API query.

Because Open Query in API Builder is the only option that opens the query in GraphQL format in a new window, Option D is the correct and verified answer.

NEW QUESTION # 18

.....

The practice materials of the exam with low quality may complicate matters of the real practice exam. So, you must know about our IDP question torrent. Our study material is not same as other dumps or study tools, it not only has good quality but also has cheap

price. We have most professional team to compiled and revise IDP Exam Question, in order to try our best to help you pass the exam and get a better condition of your life and your work.

Dumps IDP Guide: <https://www.certkingdompdf.com/IDP-latest-certkingdom-dumps.html>

CrowdStrike IDP Valid Exam Labs You will have the opportunity to enjoy the best service from our company, The product CertkingdomPDF provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you pass the IDP exam by the method which is convenient for you, With the help of our high quality IDP training materials: CrowdStrike Certified Identity Specialist(CCIS) Exam, you can past the test just like them by practicing the materials two to three hours a day.

Some of the comments and requirements that came back from Dumps IDP Guide the survey were: How do you incorporate configuration management in the development process, Testing a Project.

You will have the opportunity to enjoy the best IDP service from our company, The product CertkingdomPDF provide with you is compiled by professionals elaborately and boosts varied versions which aimed to help you pass the IDP exam by the method which is convenient for you.

Pass Guaranteed Quiz 2026 The Best CrowdStrike IDP Valid Exam Labs

With the help of our high quality IDP training materials: CrowdStrike Certified Identity Specialist(CCIS) Exam, you can past the test just like them by practicing the materials two to three hours a day.

Many candidates attended IDP certification exam once but failed, After that, if you want to choose CrowdStrike IDP exam prep, you can get free updated IDP study cram in one year after purchase.
