**NEW QUESTION # 420**

Case Study 2 - Best for You Organics

Background

Best for You Organics Company started as a home-based business. The founders began making handmade soaps and bath products in their kitchen. As sales increased, the business established a production facility and distribution center that supplies three retail

stores.

Soaps and bath products are manufactured in the production facility and are stocked in the warehouse for distribution to the retail stores. Employees at retail stores use mobile point of sale (MPOS) tablet devices to sell the products to customers.

The company structure is a single legal entity with two sites as shown in the diagram below:

Current environment

Best for You Organics plans to introduce a new product line of face creams. Each product in the new line uses the same base ingredients but includes a different extract (for example, lime, avocado, kiwi). The marketing department is preparing to introduce the new product line. Minimal inventory will be held in the warehouse.

The company uses a cloud-based deployment of Dynamics 365 Supply Chain Management to manage finances for all company operations and locations. The company does not use Bill of Materials (BOM) versioning.

The production and warehouse facility is set up with the following organizational hierarchy:

External customers include:

CustomerA: a wall-in store customer (business-to-consumer)

CustomerB: a customer with an existing account (business-to-business)

External vendors include:

VendorA: a trucking company

VendorB: a raw materials supplier

Requirements. General

The new product line must be set up in the system and readily available for sale when the company introduces the product line to the public at an upcoming trade show.

Requirements. Production

You must configure the system to produce the new products:

Ensure that the warehouse stocks the minimum quantities of raw materials to produce the

products.

Use a single version per item

Implement FIFO inventory valuation methods.

Track raw and finished goods using different General ledger accounts.

Use a primary location to determine where to stock product in the warehouse,

Configure alternate locations in the warehouse to hold overstock products and ref the primary

location as-needed.

Requirements. Shipments

You identify the following requirements related to shipping:

Ship product to retail stores weekly

Stores require a packing slip to check in merchandise. Drivers require transport documentation

and charge per mile to the stores.

Shipments to Store1 must be scheduled for Monday, Wednesday, or Friday. Store1 will

sometimes pick up their own deliveries when an order is small because they have their own van. Shipments to Store2 and Store3 must be scheduled for Tuesday or Thursday.

You must transmit Advance Shipping Notifications (ASN's) to the stores prior to deliveries.

Set up the system configuration to allow for store transfers.

Set up the system so that products may be shipped to the retail stores as bulk orders.

Set up the transport providers to deliver products from the warehouse to the retail stores.

Requirements. Reporting

Once the new products are available in stores, review 30 day of historical sales data from day-to-day transactions will determine the reorder quantities.

Set up reporting to allow the product line to be costed and tracked independent of other items.

Requirements. Pricing and inventory

You identify the following requirements related to pricing and inventory:

Determine the quantity of the new product that can be produced and ready for sale within the

first 90 days. Ensure that specialty packaging is on hand for retail sales. The packaging must be shipped directly to the stores from the vendor.

Stores must not inventory the packaging materials. Stores must maintain a 30-day supply of specialty packaging materials. Stores must reorder packaging materials as needed.

Retail store customers must pay full retail price. Resellers must receive a 10 percent discount off the list price.

You need to configure inventory levels for the retail stores.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Enter a manual forecast for the initial stock levels at the retail stores.
- B. After the first month of face mask sales, create a manual forecast for the warehouse and automatically generate a demand forecast for the stores.
- C. After the first month of face mask sales, look at the warehouse sales orders for the past 30 days to generate a demand forecast.
- D. After the first month of face mask sales, review store sales for the past 30 days to generate a demand forecast.
- E. After the first month of face mask sales, create a forecast for the warehouse and a second forecast for the retail stores.

**Answer: A,D**

## NEW QUESTION # 421

• • • • •

To help you get to know the exam questions and knowledge of the MB-330 practice exam successfully and smoothly, our experts just pick up the necessary and essential content in to our MB-330 test guide with unequivocal content rather than trivia knowledge that exam do not test at all. To make you understand the content more efficient, our experts add charts, diagrams and examples in to MB-330 Exam Questions to speed up you pace of gaining success. Up to now, more than 98 percent of buyers of our MB-330 latest dumps have passed it successfully. Up to now they can be classified into three versions: the PDF, the software and the app version. So we give emphasis on your goals, and higher quality of our MB-330 test guide.
