New WGU Cloud-Deployment-and-Operations Exam Fee, Cloud-Deployment-and-Operations Test Pattern

No one can be responsible for you except yourself. So you must carefully plan your life and future career development. Our Cloud-Deployment-and-Operations training quiz might offer you some good guidance. Maybe you never find out your real interest in the past. Now, everything is different. So you still have the chance to change. Once you are determined to learn our Cloud-Deployment-and-Operations Study Materials, you will become positive and take your life seriously. Through the preparation of the exam, you will study much Cloud-Deployment-and-Operations practical knowledge. Of course, passing the Cloud-Deployment-and-Operations exam and get the certificate is just a piece of cake.

WGU Cloud-Deployment-and-Operations Exam Syllabus Topics:

Topic	Details
Topic 1	• Configuring Cloud Network Connectivity: This section of the exam measures skills of Cloud Engineers and covers network connectivity within AWS environments, including setup, troubleshooting, and corrective actions. Candidates must show they can manage cloud networking in a way that ensures reliable communication between systems and services.
Topic 2	• Monitoring, Logging, and Issue Remediation: This section of the exam measures skills of Cloud Engineers and covers responding to issues identified through AWS monitoring and logging tools. Candidates must show they can interpret system outputs, identify problems, and take corrective actions to maintain smooth cloud operations.
Topic 3	• Optimizing Cost and Performance Baselines: This section of the exam measures skills of Cloud Operations engineers and covers determining the best balance between cost and performance using AWS services. It involves selecting suitable configurations and resource types to maintain efficient operations while avoiding unnecessary spending.

We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our Cloud-Deployment-and-Operations actual exam is. In order to let you have a general idea about the shining points of our Cloud-Deployment-and-Operations training materials, we provide the free demos on our website for you to free download. You can check the information and test the functions by the three kinds of the free demos according to our three versions of the Cloud-Deployment-and-Operations Exam Questions.

WGU Cloud Deployment and Operations Sample Questions (Q20-Q25):

NEW QUESTION # 20
(An administrator plans to deploy a database to AWS that supports the following: multiple Availability Zones, a standby database instance that provides failover support, a database instance that allows only read-only connections. Which two database solutions should the administrator use? Choose 2 answers.)

- A. Amazon Aurora DB instance with Aurora Replica
- B. Amazon RDS Multi-AZ DB cluster
- C. Amazon Aurora DB cluster with multi-master replication
- D. Amazon RDS Multi-AZ DB instance

Answer: A,D

Explanation:
To meet the requirements, the administrator should use an Amazon RDS Multi-AZ DB instance for multiple Availability Zones and failover support, and an Amazon Aurora DB instance with Aurora Replica for a read- only connection. The RDS Multi-AZ configuration automatically provisions a standby instance in a different AZ for failover, while Aurora Replicas provide read-only instances for scaling read traffic. The WGU Cloud Deployment and Operations Study Guide (Section 7.1, RDS and Aurora) states, "RDS Multi-AZ deploys a standby instance across AZs for failover, and Aurora Replicas are read-only instances that enhance performance by offloading read traffic from the primary instance." Options A and D are incorrect as multi- master replication and Multi-AZ clusters do not align with the read-only requirement.

NEW QUESTION # 21
(Which component should be used to configure email notifications for a trigger by Amazon Made?)

- A. Elastic Kubernetes Service
- B. EventBridge
- C. CodeDeploy
- D. Simple Queue Service

Answer: B

Explanation:
Amazon EventBridge should be used to configure email notifications for a trigger by Amazon Made, as it can route events to targets like Amazon SNS (Simple Notification Service) for email delivery. EventBridge integrates with AWS services to handle event-driven notifications. The WGU Cloud Deployment and Operations Study Guide (Section 4.3, EventBridge) states, "EventBridge can be configured to send events from Amazon Made to SNS, enabling email notifications by subscribing an email endpoint to the SNS topic." SQS, EKS, and CodeDeploy do not support this notification configuration.

NEW QUESTION # 22
(A company uses SQS and EC2 to convert videos uploaded by users. In the evenings, videos take several hours to convert when they normally take minutes. The user base is expected to grow a hundredfold in the next 12 months. Which solution should be used to reduce the conversion delays?)

- A. Configure an alarm to scale the fleet based on queue length
- B. Switch from t2.medium to t2.xlarge instance type
- C. Use spot instances instead of on-demand
- D. Implement a dead-letter queue

Answer: A

Explanation:
To reduce conversion delays caused by increased demand, the company should configure a CloudWatch alarm to scale the EC2 fleet based on the SQS queue length. This auto-scaling approach dynamically adjusts the number of EC2 instances to handle the workload, especially during peak evening hours and anticipated growth. The WGU Cloud Deployment and Operations Study Guide (Section 3.3, Auto Scaling and SQS) explains, "Auto Scaling can be triggered by a CloudWatch alarm monitoring SQS queue depth, ensuring the EC2 fleet scales out to process video conversion tasks efficiently as the queue length increases." Spot instances, dead-letter queues, and instance type upgrades do not directly address dynamic scaling needs.

NEW QUESTION # 23
(An organization uses CloudFormation to deploy AWS infrastructure. The templates are built in JSON and deploy EC2 instances across multiple regions. Which solution should be used to set values in the template based on region-specific AMI IDs?)

- A. Resources
- B. Mappings
- C. Outputs
- D. WaitCondition

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
The Mappings section in a CloudFormation template should be used to set values based on region-specific AMI IDs. Mappings allow the template to define a lookup table that associates regions with corresponding AMI IDs, enabling dynamic selection during stack creation across multiple regions. The WGU Cloud Deployment and Operations Study Guide (Section 5.3, CloudFormation Mappings) states, "The Mappings section enables region-specific configurations, such as mapping AMI IDs to regions (e.g., 'us-east-1': 'ami-123456'), ensuring the correct AMI is used based on the deployment region." Outputs, WaitCondition, and Resources do not provide this mapping functionality.

NEW QUESTION # 24
(Which solution should be used to host content to be processed for Amazon Made?)

- A. S3
- B. EC2
- C. DocumentDB
- D. DynamoDB

Answer: A

Explanation:
Amazon S3 (Simple Storage Service) should be used to host content to be processed for Amazon Made, as it provides scalable object storage ideal for storing and retrieving large amounts of data, such as media files or documents, for processing workflows. The WGU Cloud Deployment and Operations Study Guide (Section 2.1, Amazon S3) states, "S3 is the preferred solution for hosting content to be processed by services like Amazon Made, offering durable and highly available storage with support for lifecycle policies and integration with other AWS services." DocumentDB, DynamoDB, and EC2 are not designed for this content hosting purpose.

NEW QUESTION # 25
......

As we all know, it is difficult for you to prepare a Cloud-Deployment-and-Operations exam by yourself. You will feel confused

about some difficult knowledge. Now, you are fortunate enough to purchase our Cloud-Deployment-and-Operations study questions. Our study materials are compiled by professional experts. They have researched the annual Real Cloud-Deployment-and-Operations Exam for many years. So once you buy our study materials, you will save a lot of troubles.
