Palo Alto Networks PCCP Guaranteed Passing, Exam PCCP Lab Questions

The simplified information in PCCP certification dumps makes your exam preparation immensely easier for you. All the PCCP exam questions answers are self-explanatory and provide the best relevant and authentic information checked and approved by the industry experts. No key point of the PCCP Exam is left unaddressed. The complex portions have been explained with the help of real life based examples. In case, you don't follow and PCCP dumps, you can contact our customer's service that is operational 24/7 for your convenience.

Palo Alto Networks PCCP Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Network Security: This domain targets a Network Security Specialist and includes knowledge of Zero Trust Network Access (ZTNA) characteristics, functions of stateless and next-generation firewalls (NGFWs), and the purpose of microsegmentation. It also covers common network security technologies such as intrusion prevention systems (IPS), URL filtering, DNS security, VPNs, and SSL • TLS decryption. Candidates must understand the limitations of signature-based protection, deployment options for NGFWs, cybersecurity concerns in operational technology (OT) and IoT, cloud-delivered security services, and AI-powered security functions like Precision AI.
Topic 2	<ul style="list-style-type: none"> • Security Operations: This final section measures skills of a Security Operations Analyst and covers key characteristics and practices of threat hunting and incident response processes. It explains functions and benefits of security information and event management (SIEM) platforms, security orchestration, automation, and response (SOAR) tools, and attack surface management (ASM) platforms. It also highlights the functionalities of Cortex solutions, including XSOAR, Xpanse, and XSIAM, and describes services offered by Palo Alto Networks' Unit 42.
Topic 3	<ul style="list-style-type: none"> • Secure Access: This part of the exam measures skills of a Secure Access Engineer and focuses on defining and differentiating Secure Access Service Edge (SASE) and Secure Service Edge (SSE). It covers challenges related to confidentiality, integrity, and availability of data and applications across data, private apps, SaaS, and AI tools. It examines security technologies including secure web gateways, enterprise browsers, remote browser isolation, data loss prevention (DLP), and cloud access security brokers (CASB). The section also describes Software-Defined Wide Area Network (SD-WAN) and Prisma SASE solutions such as Prisma Access, SD-WAN, AI Access, and enterprise DLP.
Topic 4	<ul style="list-style-type: none"> • Cloud Security: This section targets a Cloud Security Specialist and addresses major cloud architectures and topologies. It discusses security challenges like application security, cloud posture, and runtime security. Candidates will learn about technologies securing cloud environments such as Cloud Security Posture Management (CSPM) and Cloud Workload Protection Platforms (CWPP), as well as the functions of a Cloud Native Application Protection Platform (CNAPP) and features of Cortex Cloud.
Topic 5	<ul style="list-style-type: none"> • Cybersecurity: This section of the exam measures skills of a Cybersecurity Practitioner and covers fundamental concepts of cybersecurity, including the components of the authentication, authorization, and accounting (AAA) framework, attacker techniques as defined by the MITRE ATT&CK framework, and key principles of Zero Trust such as continuous monitoring and least privilege access. It also addresses understanding advanced persistent threats (APT) and common security technologies like identity and access management (IAM), multi-factor authentication (MFA), mobile device and application management, and email security.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q183-Q188):

NEW QUESTION # 183

Which capability does Cloud Security Posture Management (CSPM) provide for threat detection within Prisma Cloud?

- A. Alerts for new code introduction
- B. Integration with threat feeds
- C. Continuous monitoring of resources
- D. Real-time protection from threats

Answer: C

Explanation:

Cloud Security Posture Management (CSPM), including Prisma Cloud's offering, continuously monitors all cloud resources - such as compute instances, storage, network configurations, and identities - to detect misconfigurations, vulnerabilities, and potential threats in near real time.

NEW QUESTION # 184

What is the function of an endpoint detection and response (EDR) tool?

- **A. To monitor activities and behaviors for investigation of security incidents on user devices**
- B. To integrate data from different products in order to provide a holistic view of security posture
- C. To provide organizations with expertise for monitoring network devices
- D. To ingest alert data from network devices

Answer: A

Explanation:

Endpoint Detection and Response (EDR) tools monitor, record, and analyze endpoint activity to detect suspicious behavior, investigate incidents, and respond to threats on user devices such as laptops and desktops.

NEW QUESTION # 185

The severity of an attack needs to be escalated.

What needs to be in place in order for the security operations team to properly inform various units within the enterprise of the issue?

- **A. Interface Agreement**
- B. Security Breach Blog
- C. Corporate Executive Listserv
- D. FAO Incident Site -

Answer: A

NEW QUESTION # 186

Which pillar of Prisma Cloud application security addresses ensuring that your cloud resources and SaaS applications are correctly configured?

- **A. visibility, governance, and compliance**
- B. compute security
- C. dynamic computing
- D. network protection

Answer: A

Explanation:

Ensuring that your cloud resources and SaaS applications are correctly configured and adhere to your organization's security standards from day one is essential to prevent successful attacks. Also, making sure that these applications, and the data they collect and store, are properly protected and compliant is critical to avoid costly fines, a tarnished image, and loss of customer trust. Meeting security standards and maintaining compliant environments at scale, and across SaaS applications, is the new expectation for security teams.

NEW QUESTION # 187

A high-profile company executive receives an urgent email containing a malicious link. The sender appears to be from the IT department of the company, and the email requests an update of the executive's login credentials for a system update.

Which type of phishing attack does this represent?

- A. Angler phishing
- B. Vishing
- **C. Whaling**
- D. Pharming

Answer: C

Explanation:

Whaling is a targeted phishing attack aimed at high-profile individuals, such as executives. The attacker impersonates a trusted entity (e.g., IT department) to trick the executive into revealing sensitive credentials.

This is a form of spear phishing specifically focused on "big fish" targets.

NEW QUESTION # 188

.....

This updated Palo Alto Networks PCCP exam study material of DumpExam consists of these 3 formats: Palo Alto Networks PCCP PDF, desktop practice test software, and web-based practice exam. Each format of DumpExam aids a specific preparation style and offers unique advantages, each of which is beneficial for strong Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) exam preparation. The features of our three formats are listed below. You can choose any format as per your practice needs.
