

# Professional CTFL-AcT Reliable Test Vce Spend Your Little Time and Energy to Clear ISQI CTFL-AcT exam

What's more, part of that DumpsMaterials CTFL-AcT dumps now are free: <https://drive.google.com/open?id=1FoBskDNezOY80G6Ilx19rgGGDATCLL4m>

The CTFL-AcT exam prepare of our website is completed by experts who has a good understanding of real exams and have many years of experience writing CTFL-AcT study materials. They know very well what candidates really need most when they prepare for the exam. They also understand the real exam situation very well. So they compiled CTFL-AcT Exam prepare that they hope to do their utmost to help candidates pass the exam and get what job they want. They apply to exam candidates of different level of computer industry. So whichever degree you are at, you can utilize our CTFL-AcT study materials tool with following traits.

ISQI CTFL-AcT certification exam is ideal for anyone looking to build a career in software testing, especially in the area of acceptance testing. ISTQB Foundation Level - Acceptance Testing certification is suitable for software testers, test analysts, test engineers, quality assurance professionals, and anyone involved in software development projects.

The CTFL-AcT exam is suitable for testers who have some experience in acceptance testing and want to enhance their knowledge and skills in this area. CTFL-AcT Exam covers a wide range of topics, including the acceptance testing process, test design techniques, defect management, test management, and test automation. CTFL-AcT exam is based on the ISTQB Foundation Level syllabus, which is a globally recognized standard for software testing.

## Test ISQI CTFL-AcT Dumps Pdf, CTFL-AcT Certification Dumps

The ISQI modern job market is becoming more and more competitive and challenging and if you are not ready for it then you cannot pursue a rewarding career. Take a smart move right now and enroll in the ISTQB Foundation Level - Acceptance Testing (CTFL-AcT) certification exam and strive hard to pass the ISTQB Foundation Level - Acceptance Testing (CTFL-AcT) certification exam.

## ISQI ISTQB Foundation Level - Acceptance Testing Sample Questions (Q58-Q63):

### NEW QUESTION # 58

Which tool fits the mentioned acceptance test activities BEST?

- A. Model-based testing tools for managing incidents.
- B. Requirements management tools for managing acceptance test execution campaigns.
- C. Test management and automation tools for business process model-based acceptance test generation.
- **D. Business process management tools for modeling business processes and rules.**

**Answer: D**

Explanation:

Acceptance testing often relies on understanding and validating business processes and business rules. These are typically visualized and documented using business process modeling techniques such as BPMN (Business Process Model and Notation) and decision tables (DMN - Decision Model and Notation).

Business Process Management (BPM) tools are specifically designed for modeling and managing such workflows and rules. These tools are commonly used during acceptance test design to align tests with business objectives and processes.

Option C is correct because it directly aligns with the use of business process modeling in acceptance testing activities.

Other options:

A is incorrect because requirements management tools are more focused on requirement traceability and prioritization, not managing test execution campaigns.

B confuses roles - test management/automation tools can assist with test generation, but "business process model-based" generation is more accurately linked to BPM or model-based testing tools.

D is incorrect - model-based testing tools are used for test case generation, not incident management.

C). Business process management tools for modeling business processes and rules.

### NEW QUESTION # 59

Assume you are testing functionality of the interface of an elevator. One of the requirements is that the elevator can work only if the total weight of the passengers does not exceed 200 kg. The elevator can reach the following floors: Ground Floor, 1st floor and 2nd floor. You want to create an acceptance test using the Gherkin language. You can use the following phrases for this purpose:

i. the total weight of passengers is greater than 200 kg

ii. the elevator is on the Ground Floor

iii. a button '1st floor' was pressed

iv. the elevator goes to the 1st floor

v. a passenger standing at the 2nd floor calls the elevator

vi. a message 'too many passengers' is displayed on the screen

Which of the following statements correctly matches constructs of Given/When/Then with a relevant phrase in order to create a correct test case for the given requirement?

- A. GIVEN iii)  
WHEN ii)  
THEN iv)
- B. GIVEN ii)  
WHEN iv)  
THEN v)
- C. GIVEN ii)  
WHEN v) AND vi) THEN i)
- D. GIVEN ii)  
WHEN i)  
THEN vi)

**Answer: D**

Explanation:

Gherkin is a structured language used in Behavior-Driven Development (BDD) to define test cases in a clear, business-readable format. It follows the GIVEN-WHEN-THEN structure:

GIVEN describes the precondition (system's state before the action).

WHEN describes the action/event.

THEN describes the expected result or outcome.

Analyzing the phrases:

ii) "The elevator is on the Ground Floor" is a precondition - fits GIVEN.

i) "The total weight of passengers is greater than 200 kg" is an action or state change - fits WHEN.

vi) "A message 'too many passengers' is displayed on the screen" is the expected outcome - fits THEN.

Thus, Option A correctly maps these elements to form a well-structured Gherkin scenario.

Other options are incorrect because:

Option B misplaces an expected outcome as an action.

Option C misrepresents the order - "login" isn't a precondition.

Option D introduces two THEN elements and violates the typical Gherkin structure.

Exact Reference - ISTQB CTFL Acceptance Testing Syllabus (Section 2.2.2):

"Gherkin test cases use GIVEN-WHEN-THEN structures to make the behavior of the system under test understandable by all stakeholders."

### NEW QUESTION # 60

Which of the following is the BEST example of a Gherkin-style test for a web-based banking application?

- A. GIVEN I have \$5000 on my personal account X and \$600 on my personal account Y WHEN I transfer \$500 from Y to X  
THEN I should have balance \$4500 on X and balance \$1100 on Y
- B. GIVEN I have \$5000 on my personal account X WHEN I have \$600 on my personal account Y THEN I have \$5600 in total on my personal accounts X and Y
- C. GIVEN I have \$5000 on my personal account X AND I have \$200 on my personal account Y WHEN I click 'Make transfer' button AND I enter '3000' into 'Amount' field AND I enter 'X' into 'From which account' field AND I enter 'Y' into 'To which account' field AND I click 'Confirm transaction' button THEN I should have balance \$2000 on my personal account X AND I should have balance \$3200 on my personal account Y
- D. GIVEN I have \$5000 on my personal account X AND I have \$200 on my personal account Y WHEN I transfer \$1000 from X to Y THEN I should have balance \$4000 on my personal account X AND I should have balance \$1200 on my personal account Y

**Answer: D**

### NEW QUESTION # 61

Which one of the following statements regarding ATDD / BDD is true?

- A. In BDD, user stories are expressed in the form of 'Given - When - Then' statements
- B. The concept of "living documentation" means that business requirements become executable
- C. ATDD and BDD allow business analysts to code test automation scripts
- D. With visual ATDD, acceptance test cases are obtained from a graphical representation of application
