

Latest The Open Group OGEA-103 Questions–Key To Success In First Try

The Open Group
OGEA-103 TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam 2

The Open Group OGEA-103 exam is an essential certification for anyone working in the field of enterprise architecture. By achieving this certification, professionals can demonstrate their expertise in the TOGAF framework and enhance their career prospects. OGEA-103 exam is challenging, but with the right preparation and study, candidates can achieve success and become certified TOGAF professionals.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q34-Q39):

NEW QUESTION # 34

Complete the following sentence:

Presenting different _____ and _____ to stakeholders helps architects to extract hidden agendas principles and requirements that could impact the final Target Architecture

- A. Business Scenarios Business Models
- B. Alternatives Trade-offs
- C. Solutions Applications
- D. Architecture Views Architecture Viewpoints

Answer: B

Explanation:

Presenting different alternatives and trade-offs to stakeholders helps architects to extract hidden agendas principles and requirements that could impact the final Target Architecture. Alternatives are different ways of achieving a desired outcome, while trade-offs are compromises or sacrifices that must be made to choose one alternative over another. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.1 Business Scenarios.

NEW QUESTION # 35

Complete the sentence Business Transformation Readiness Assessment is _____.

- A. a joint effort between corporate staff lines of business and IT planners
- B. widely used to validate an architecture that is being developed
- C. to ensure the active support of powerful stakeholders
- D. a way to put building blocks into context thereby supporting re-usable solutions

Answer: A

Explanation:

Business Transformation Readiness Assessment is a joint effort between corporate staff lines of business and IT planners to evaluate the readiness of the organization to undergo change. It involves assessing factors such as vision, commitment, capacity, capability, culture, and motivation that may influence the success of a business transformation initiative. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.2 Business Transformation Readiness Assessment.

NEW QUESTION # 36

Which of the following are the four purposes that typically frame the planning horizon, depth and breadth of an Architecture Project, and the contents of the EA Repository-?

Pass Guaranteed Quiz 2026 OGEA-103: TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Perfect New Real Test

Our OGEA-103 study materials are constantly improving themselves. We keep updating them to be the latest and accurate. And we

apply the latest technologies to let them applied to the electronic devices. If you have any good ideas, our OGEA-103 Exam Questions are very happy to accept them. OGEA-103 learning braindumps are looking forward to having more partners to join this family. We will progress together and become better ourselves.

The TOGAF Enterprise Architecture Combined Part 1 and Part 2 Certification Exam is designed for individuals who want to demonstrate their knowledge and expertise in enterprise architecture. It is ideal for enterprise architects, solution architects, IT architects, and anyone who is involved in the design, planning, and implementation of enterprise architecture. OGEA-103 Exam is also suitable for professionals who are responsible for managing or overseeing enterprise architecture initiatives.

The Open Group TOGAF Enterprise Architecture Combined Part 1 and Part 2 Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which of the following is included as part of Architecture Governance?

- A. Creating and maintaining the Statement of Architecture Work through out the ADM cycle
- B. Ensuring compliance with internal and external standards and regulatory obligations
- C. Interacting with the CxO level on Enterprise Architecture
- D. Managing Stakeholders and their requirements

Answer: B

Explanation:

Ensuring compliance with internal and external standards and regulatory obligations is one of the activities included as part of Architecture Governance. Architecture Governance is the practice and orientation by which enterprise architectures and other architectures are managed and controlled at an enterprise-wide level. It involves establishing processes, roles, responsibilities, policies, and standards to ensure that architectures are aligned with the enterprise's strategy and objectives, and meet the quality and performance requirements. Reference: The TOGAF® Standard | The Open Group Website, Section 3.3.6 Architecture Governance.

NEW QUESTION # 46

Refer to the table below:

Which ADM Phase does this describe?

- A. Phase B
- B. Phase A
- C. Preliminary Phase
- D. Phase C

Answer: A

Explanation:

Phase B of the ADM cycle is the Business Architecture phase. It describes the development of a Business Architecture to support an agreed Architecture Vision. The objectives of this phase are to describe the baseline and target Business Architecture, identify candidate Architecture Roadmap components based on gaps between the baseline and target, and determine whether an incremental approach is required. Reference:

The TOGAF Standard | The Open Group Website, Section 3.2.2 Phase B: Business Architecture.

NEW QUESTION # 47

Which of the following best describes the class of information known as the Reference Library within the Architecture Repository?

- A. A record of the governance activity across the enterprise
- B. Processes to support governance of the Architecture Repository
- C. Guidelines and templates used to create new architectures
- D. Specifications to which architectures must conform

Answer: C

Explanation:

The class of information known as the Reference Library within the Architecture Repository contains guidelines and templates used to create new architectures. The Reference Library provides a set of resources that can be leveraged or customized for specific architecture development purposes. It includes generic building blocks, patterns, models, standards, frameworks, methods, techniques, best practices, etc. Reference: The TOGAF® Standard | The Open Group Website, Section 2.4 Architecture Repository.

NEW QUESTION # 48

Consider the following ADM phases objectives.

□ Which phase does each objective match?

- A. 1G-2H-3H-4F
- B. 1F-2G-3G-4H
- C. 1H-2F-3F-4G
- D. 1F-2G-3H-4H

Answer: C

Explanation:

Explanation

According to the TOGAF Standard, Version 9.2, the ADM phases and their objectives are as follows¹:

Preliminary Phase: To prepare and initiate the architecture development cycle, including defining the architecture framework, principles, and governance.

Phase A: Architecture Vision: To define the scope, vision, and stakeholders of the architecture initiative, and to obtain approval to proceed.

Phase B: Business Architecture: To describe the baseline and target business architecture, and to identify the gaps between them.

Phase C: Information Systems Architectures: To describe the baseline and target data and application architectures, and to identify the gaps between them.

Phase D: Technology Architecture: To describe the baseline and target technology architecture, and to identify the gaps between them.

Phase E: Opportunities and Solutions: To identify and evaluate the opportunities and solutions for implementing the target architecture, and to define the work packages and transition architectures.

Phase F: Migration Planning: To finalize the implementation and migration plan, and to ensure alignment with the enterprise portfolio and project management.

Phase G: Implementation Governance: To provide architecture oversight and guidance for the implementation projects, and to manage any architecture change requests.

Phase H: Architecture Change Management: To monitor the changes in the business and technology environment, and to assess the impact and performance of the architecture.

Requirements Management: To manage the architecture requirements throughout the ADM cycle, and to ensure alignment with the business requirements.

Based on the above definitions, we can match each objective with the corresponding phase as follows:

Objective 1: Ensure that the business value and cost of work packages and transition architectures is understood by key stakeholders. This objective is achieved in Phase H: Architecture Change Management, where the value realization and cost-benefit analysis of the architecture are performed².

Objective 2: Ensure conformance with the Target Architecture by implementation projects. This objective is achieved in Phase F: Migration Planning, where the conformance requirements and criteria for the implementation projects are defined³.

Objective 3: Ensure that the architecture development cycle is maintained. This objective is achieved in Phase F: Migration Planning, where the architecture roadmap and iteration cycle are maintained³.

Objective 4: Ensure that the Architecture Governance Framework is executed. This objective is achieved in Phase G: Implementation Governance, where the architecture governance processes and procedures are applied to the implementation projects⁴.
