Salesforce Health Cloud Accredited Professional Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which two of the following statements are true about Care Teams? (Choose Two.)

- A. Communities must be enabled before External Care Team members can be added.
- B. If the Problem and Goal objects use Private Sharing, Care Team Membership provides access to these objects.
- C. A Care Plan must have a Coordinator as a member of the Care Team before a Care Plan Template can be applied.
- D. Care Team Members are optional on a Care Plan.

Answer: C,D

NEW QUESTION # 38

A healthcare organization is launching a new gene therapy program, and an administrator needs to leverage Advanced Therapy Management.

In which two ways does Advanced Therapy Management assist the healthcare organization with its complex scheduling requirements?

- A. Reschedule part of the appointment chain.
- B. Schedule a telehealth appointment.
- C. Optimize appointment chain with Einstein.
- D. Book multi-step appointments.

Answer: A,D

Explanation:

Advanced Therapy Management assists the healthcare organization with its complex scheduling requirements by allowing them to reschedule part of the appointment chain and book multi-step appointments. Rescheduling part of the appointment chain enables the organization to adjust the dates and times of individual appointments within a chain without affecting the rest of the chain. Booking multi-step appointments enables the organization to create a series of related appointments that follow a predefined sequence and duration.

NEW QUESTION # 39

Bloomington Caregivers has decided to expand its Health Cloud implementation to include a Crisis Support Center. Which two steps should an administrator take as part of the implementation?

- A. Review and modify the Crisis Center Intake flow in Flow Builder to meet requirements.
- B. Install the Crisis Support Center unmanaged package.
- C. Enable Crisis Support Center Management App in Setup.
- D. Assign users the Health Cloud Crisis Support Center Management permission set license.

Answer: A,B

Explanation:

The two steps that an administrator should take as part of the implementation of a Crisis Support Center are installing the Crisis Support Center unmanaged package and reviewing and modifying the Crisis Center Intake flow in Flow Builder to meet requirements. The Crisis Support Center unmanaged package provides out-of-the-box features for managing crisis situations, such as a custom object, a Lightning component, a Lightning app, and a Flow template. The Crisis Center Intake flow is a prebuilt flow that guides users through collecting information from callers and creating records in Health Cloud.

NEW QUESTION # 40

Which three statements about the patient timeline view are true? (Choose three.)

- A. The patient timeline can be used in any Salesforce application.
- B. Events can be specified to appear when the Health Cloud home page first loads.
- C. Filters can be used to limit the number of records shown in the patient timeline.
- D. The patient timeline supports standard and custom objects.
- E. The patient timeline is a Health Cloud Empower component.

Answer: B,C,D

Explanation:

Events can be specified to appear when the Health Cloud home page first loads (B), the patient timeline supports standard and custom objects (D), and filters can be used to limit the number of records shown in the patient timeline (E) are three statements that are true about the patient timeline view. The patient timeline cannot be used in any Salesforce application (A), as it is specific to Health Cloud. The patient timeline is not a Health Cloud Empower component, but a standard component in Health Cloud.

NEW QUESTION # 41

Bloomington Caregivers wants to use patient or member lists for its care coordinators in its current implementation. What is an important consideration when implementing this in Health Cloud?

- A. An administrator can create lists or add records to existing lists from the Campaign object
- B. Filter logic for patient or member lists is controlled by formula fields on records.
- C. If a user cannot access a field used in a filter on a patient or member list, they will not be able to see the list
- D. An administrator can create an override filter field on the person account.

Answer: C

Explanation:

B is correct because if a user cannot access a field used in a filter on a patient or member list, they will not be able to see the list. This is because the filter criteria are applied to the user's query, and if the user does not have permission to view the field, the query will return no results. To avoid this issue, the administrator should ensure that the user has the appropriate field-level security settings for the fields used in the filter.

NEW QUESTION # 42

.....

People who want to pass the exam have difficulty in choosing the suitable Health-Cloud-Accredited-Professional study materials.
