Answer: D

NEW QUESTION # 20

You are replicating employees from SAP SuccessFactors Employee Central to SAP ERP and the replication of event reasons results in two status-changing action types that are logged with the same start date for the same employee.

What should you do to prevent the processing in the SAP ERP system from being aborted?

- A. Change the start date of one of the status-changing event reasons in SAP SuccessFactors Employee Central.
- B. Add a change date request to one of the status-changing event reasons in SAP SuccessFactors Employee Central.
- **C. Override the default system behavior by defining how SAP ERP will react to multiple status-changing event reasons.**
- D. Delete one of the status-changing event reasons in SAP SuccessFactors Employee Central.

Answer: C

Explanation:

When multiple status-changing events with the same start date occur, ERP will stop processing unless instructed otherwise. Implementing logic in the EX_ECPAO_IN_MULTIPLE_ACTION_BADI or similar mechanism allows SAP ERP to interpret and accept both events as valid, thereby preventing abortion of replication.
