CFRP Test Questions, Latest CFRP Exam Questions

The TestPassed is one of the top-rated and reliable platforms that has been helping the Psychiatric Rehabilitation Association CFRP exam candidates for many years. Over this long time period, countless CFRP exam candidates have passed their Psychiatric

Rehabilitation Association exam with good scores. In their success one thing is common and that is the usage of TestPassed CFRP Exam Practice test questions.

Psychiatric Rehabilitation Association Certified Child and Family Resiliency Practitioner (CFRP) Sample Questions (Q11-Q16):

NEW QUESTION # 11

Between the ages of five and twelve years, a child is typically

- A. forming an attachment to caregivers and teachers.
- **B. developing skills and a sense of pride in accomplishments.**
- C. exploring interpersonal skills through initiating activities.
- D. coming to terms with emerging sexuality.

Answer: B

Explanation:

Supporting health and wellness in the CFRP framework includes understanding developmental stages.

Between ages five and twelve, children are typically in Erikson's industry vs. inferiority stage, developing skills and a sense of pride in accomplishments through tasks like schoolwork and hobbies. The CFRP study guide notes, "From ages five to twelve, children focus on developing skills and a sense of pride in accomplishments, building competence and self-esteem." Exploring interpersonal skills (option A) is less specific, forming attachments (option C) is more relevant to earlier stages, and emerging sexuality (option D) typically occurs in adolescence.

* CFRP Study Guide (Section on Supporting Health and Wellness): "Children aged five to twelve typically develop skills and pride in accomplishments, aligning with the industry vs. inferiority developmental stage." References:

CFRP Study Guide, Section on Supporting Health and Wellness, Developmental Stages.

Psychiatric Rehabilitation Association (PRA) Guidelines on Child Development.

NEW QUESTION # 12

The system of care model emphasizes the importance of a strengths-based, empathetic, nonjudgmental approach to a:

- A. Family practice.
- **B. Collaborative partnership.**
- C. Provider alliance.
- D. Congenial relationship.

Answer: B

Explanation:

The Systems Competencies domain underscores the system of care model, which prioritizes collaborative, family-centered approaches. The PRA CFRP Study Guide 2024-2025 defines a collaborative partnership as a strengths-based, empathetic, and nonjudgmental relationship between practitioners, families, and other stakeholders to support the child's recovery.

Option A (Collaborative partnership) is correct because the PRA framework emphasizes partnerships that empower families and integrate services, aligning with the system of care principles.

Option B (Congenial relationship) is incorrect because "congenial" implies friendliness but lacks the depth of collaboration required by the PRA.

Option C (Family practice) is incorrect because this term refers to medical practice, not the system of care model.

Option D (Provider alliance) is incorrect because it focuses on providers, not the family-centered partnership central to the PRA guidelines.

:

Psychiatric Rehabilitation Association, CFRP Study Guide 2024-2025, Section on Systems Competencies: System of Care Model.

PRA Certification Candidate Handbook, Competency Domain 6: Systems Competencies.

PRA Code of Ethics, Principle 2: Family-Centered Practice.

NEW QUESTION # 13

Collaboration with a child involves

- A. instructing the child to problem solve.
- B. observing the child's behaviors.
- C. asking the child to identify barriers.
- D. **reinforcing the child's effort.**

Answer: D

Explanation:

Collaboration with children in the CFRP framework, under interpersonal competencies, emphasizes empowering them through positive reinforcement and partnership. Reinforcing the child's effort encourages engagement and builds confidence in their ability to contribute to their recovery. The CFRP study guide states, "Collaboration with a child involves reinforcing their efforts to foster active participation and self- efficacy in the recovery process." Instructing problem-solving (option A) or asking to identify barriers (option C) may be part of collaboration but are directive rather than reinforcing. Observing behaviors (option B) is a practitioner task, not a collaborative act.

* CFRP Study Guide (Section on Interpersonal Competencies): "Effective collaboration with children involves reinforcing their efforts to promote engagement and build self-efficacy in their recovery journey." References:

Certified Child and Family Resiliency Practitioner (CFRP) Study Guide, Section on Interpersonal Competencies, Child-Centered Collaboration.

Psychiatric Rehabilitation Association (PRA) Guidelines on Strengths-Based Engagement.

NEW QUESTION # 14

Mental health treatment is expanding to include

- A. **functional family therapy.**
- B. individualized goal planning.
- C. school modifications.
- D. peer-to-peer support.

Answer: A

Explanation:

The CFRP framework highlights the expansion of mental health treatment to include evidence-based practices that address family dynamics. Functional family therapy (FFT) is a recognized intervention being increasingly integrated into mental health treatment for children and youth, focusing on improving family relationships and communication. The CFRP study guide explains, "Mental health treatment is expanding to include functional family therapy, which targets family dynamics to support child and adolescent recovery." School modifications (option A) are accommodations, not treatments. Individualized goal planning (option B) is part of treatment but not a specific expansion. Peer-to-peer support (option C) is valuable but less central than FFT in treatment expansion.

* CFRP Study Guide (Section on Supporting Health and Wellness): "The expansion of mental health treatment includes functional family therapy, an evidence-based approach that strengthens family relationships to support recovery." References:

CFRP Study Guide, Section on Supporting Health and Wellness, Evidence-Based Treatments.

Psychiatric Rehabilitation Association (PRA) Guidelines on Family-Based Interventions.

NEW QUESTION # 15

Reform, when referenced with expanding home and community-based services, often comes in response to

- A. economic decline.
- B. population growth.
- C. **legal action.**
- D. educational initiatives.

Answer: C

Explanation:

Within the CFRP framework, systems competencies include understanding the broader systemic factors that influence service delivery, such as policy and legal frameworks. Reforms expanding home and community- based services often arise in response to legal action, such as court rulings or settlements that mandate improved access to community-based care over institutionalization.

The CFRP study guide highlights that

"legal actions, including lawsuits and advocacy efforts, have historically driven reforms to expand home and community-based services, ensuring compliance with federal mandates like the Olmstead decision." Educational initiatives (option A), economic decline

(option B), and population growth (option C) may influence service needs but are not the primary drivers of such reforms compared to legal mandates.

* CFRP Study Guide (Section on Systems Competencies): "Reforms expanding home and community-based services are often prompted by legal action, such as court rulings or advocacy efforts, to ensure equitable access to care." References: Certified Child and Family Resiliency Practitioner (CFRP) Study Guide, Section on Systems Competencies, Policy and Legal Frameworks.

Psychiatric Rehabilitation Association (PRA) Guidelines on Systems Advocacy.
