Any area of accreditation is in high demand, and if you have a Salesforce Certified Sharing and Visibility Architect Sharing-and-Visibility-Architect Certification, you will grow in the information technology industry with ease.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q11-Q16):

NEW QUESTION # 11

Universal Health is planning to store patient notes in Salesforce. Patient notes consist of long text notes taken by a user to document phone calls with a patient.

A data audit has identified that these notes can contain Personally Identifiable Information (PII) and Personal Health Information (PHI). The regulatory requirements state that this data must be encrypted at rest as well as in transit.

What should the Architect do in order to make sure Universal Health stays compliant?

- **A. Enable Salesforce Shield Platform Data Encryption and mark the patient notes field as encrypted.**
- B. Use an Apex trigger and the Apex Crypto class to encrypt patient notes as soon as they are saved to Salesforce.
- C. Create a new Custom Field of type "Text (Encrypted)" and move the patient notes data into the new field.
- D. No action is required; all Salesforce data is encrypted at rest as part of Salesforce's standard trust measures.

Answer: A

NEW QUESTION # 12

When writing test methods, what functionality is verified by the system method "runAs()?"

- A. Enforcement of user's public group assignments.
- B. Enforcement of user permissions.
- C. Enforcement of a user's field-level security.
- **D. Enforcement of a user's record sharing.**

Answer: D

NEW QUESTION # 13

At Universal Containers, Accounts and Contacts are normally visible to all employees, and Proposals (custom object) are visible to the Account owner and managers. However, some Proposals are considered confidential and are managed by a Strategic Proposals team. These Proposals should not be visible to anyone in the Sales group other than the owner and the strategic team. How should the architect design for this requirement?

- A. Proposal Owner set to the Strategic Deals Team Queue and set the Account relationship to Master-Detail.
- **B. Disable Grant Access Using Hierarchies and set an Owner-Based Sharing rule for Strategic Deals team**
- C. Disable Grant Access Using Hierarchies and set a Criteria-Based Sharing rule for Strategic Deals team.
- D. Proposal Owner set to the Strategic Deals Team Queue and create an owner-based sharing rule to grant visibility to the Account owner

Answer: B

Explanation:

Explanation

Disabling Grant Access Using Hierarchies and setting an Owner-Based Sharing rule for Strategic Deals team is the best way to design for this requirement. This will ensure that only the owner and the strategic team can access the confidential proposals, regardless of the role hierarchy. Setting the Proposal Owner to the Strategic Deals Team Queue will not work, because queues can only own leads, cases, orders, and custom objects.

Setting a Criteria-Based Sharing rule for Strategic Deals team will not work, because criteria-based sharing rules can only grant access, not restrict it.

NEW QUESTION # 14

Which two capabilities does the delegated administrator permission provide?

Choose 2 answers

- A. Set OWD
- **B. Assign users profiles**
- C. Create profiles
- **D. Unlock users**

Answer: B,D

NEW QUESTION # 15

Which features does Salesforce provide for restricting login access to the application?

Choose 2 answers.

- A. Role-based IP restrictions
- B. Organization-wide login hour restrictions
- **C. Profile-based login hour restrictions**
- **D. Profile-based IP restrictions**

Answer: C,D

Explanation:

Explanation

Profile-based login hour restrictions and profile-based IP restrictions are two features that Salesforce provides for restricting login access to the application. These features allow administrators to specify when and from where users can log in to Salesforce based on their profiles. Role-based IP restrictions and organization-wide login hour restrictions are not valid features in Salesforce.

NEW QUESTION # 16

.....

If you do not have access to internet most of the time, if you need to go somewhere is in an offline state, but you want to learn for your Sharing-and-Visibility-Architect exam.
