As you have experienced various kinds of exams, you must have realized that renewal is invaluable to C-S4EWM-2023 study materials, especially to such important C-S4EWM-2023 exams. And there is no doubt that being acquainted with the latest trend of exams will, to a considerable extent, act as a driving force for you to pass the exams and realize your dream of living a totally different life. So if you do want to achieve your dream, buy our C-S4EWM-2023 practice materials.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q49-Q54):

NEW QUESTION # 49
Which assignment do you make to create external process steps in process-oriented storage control?

- A. External process step to a storage process
- B. External process step to an SAP internal process step
- C. External process step to a work center
- D. External process step to a warehouse process type

Answer: B

Explanation:
External Process Steps in Process-Oriented Storage Control
* To integrate external process steps, they must be linked to predefined SAP internal process steps to define the sequence of warehouse processes.
* Example: External steps like quality inspection can be mapped to SAP internal steps to ensure smooth process flow.
Excluded Options
* Option A: Work centers are operational locations, not directly linked to external process step assignment.
* Option C: Storage processes handle physical stock movements, not step mapping.
* Option D: Warehouse process types govern task execution, unrelated to external step assignments.
SAP S/4HANA Cloud Private Edition Reference
* Refer to Process-Oriented Storage Control Configuration in SAP EWM Help for step mapping details.

NEW QUESTION # 50
Which fields in the warehouse process type are used to determine warehouse order creation rules (WOCR)?
Note: There are 2 correct answers to this question.

- A. Activity
- B. WOCR activity area
- C. Storage process
- D. Process type determination indicator

Answer: A,B

Explanation:
Fields in Warehouse Process Type for WOCR Determination
* WOCR Activity Area (B): Defines the area of operations within the warehouse for specific tasks.
* Activity (C): Specifies the type of activity (e.g., picking, putaway) to link with the appropriate warehouse order creation rule.
Excluded Options
* A (Storage Process): Relevant for stock movement flows but not directly linked to WOCR determination.
* D (Process Type Determination Indicator): Governs warehouse process type determination but not WOCR rules.
SAP S/4HANA Cloud Private Edition Reference
* Refer to Warehouse Order Creation Rule Fields in SAP EWM for configuration details.

NEW QUESTION # 51
What is defined with the preparation time in the warehouse order creation rule?

- A. The time required by the system for the picking strategy
- B. The time required by an employee to prepare the processing of the warehouse order
- C. The time required by the resource until it reaches the storage type

- D. The time required by the wave for the creation process

Answer: B

NEW QUESTION # 52
What can you do with evaluation points?

- A. Influence which warehouse order is assigned to a resource.
- B. Influence the search sequence of storage types, storage sections, and bin types.
- C. Use them to measure the efficiency of your warehouse.
- D. Influence which items shall be picked first.

Answer: B

NEW QUESTION # 53
What is the purpose of a business system in the system integration? Note: There are 2 correct answers to this question.

- A. It can be used to separate materials coming from two different systems.
- B. It defines the RFC parameters for the integration.
- C. It is connected to a logical system, as in warehouse requests only the business system is stored.
- D. It allows the mapping of document type and item type depending on the source system.

Answer: A,C

Explanation:
Comprehensive and Detailed In-Depth Explanation:
The business system in EWM integration represents the source or target system (e.g., ERP) in the landscape.
Option A ("It is connected to a logical system...") is correct because it links to a logical system via RFC, and warehouse requests store the business system for tracking, configured in SPRO: SCM Extended Warehouse Management > Interfaces > Define Business System. Option C ("It can be used to separate materials...") is correct as it differentiates stock origins in multi-system scenarios. Option B is incorrect because RFC parameters are defined separately, and option D is handled by document type mapping, not the business system itself.

NEW QUESTION # 54
.....

Normally, you will come across almost all of the C-S4EWM-2023 real questions on your usual practice. Maybe you are doubtful about our C-S4EWM-2023 guide dumps. We have statistics to tell you the truth. The passing rate of our products is the highest. Many candidates can also certify for our C-S4EWM-2023 Study Materials.
