According to the web search results, when an auditor initiates a live monitoring session to PSM server to view an ongoing live session, the auditor's machine makes an RDP connection to the PSM server using the PSMAadminConnect user. The PSMAadminConnect user is a local or domain user that starts PSM sessions on the PSM machine for authorized users who want to monitor or terminate active sessions1. The PSMAadminConnect user has limited permissions and access rights on the PSM server, and its credentials are managed by the CPM.
