SAP C-TS414-2023 Lab Questions - Test C-TS414-2023 Result

Under the leadership of a professional team, we have created the most efficient learning C-TS414-2023 training guide for our users. Our users use their achievements to prove that we can get the most practical knowledge in the shortest time. C-TS414-2023 exam questions are tested by many users and you can rest assured. If you want to spend the least time to achieve your goals, C-TS414-2023 Learning Materials are definitely your best choice. You can really try it we will never let you down!

SAP C-TS414-2023 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing Clean Core: It focuses on the application of core principles to ERP for enhancing business process agility.
Topic 2	Quality Management in Sales and Distribution: The topic describes the integration of QM with Sales and Distribution.
Topic 3	Quality Planning: The topic explains the configuration requirements of Quality Planning.
Topic 4	Quality Inspection: It explains the configuration requirements of Quality Inspection.
Topic 5	Quality Improvement: It explains the configuration requirements of Quality Improvement.

Topic 6	Quality Management in Manufacturing: This topic describes the processes related to implementing QM in Manufacturing.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q10-Q15):

NEW QUESTION # 10

Which of the following API types does SAP recommend to use to achieve clean core integrations? Note: There are 2 correct answers to this question.

- A. SOAP
- B. RFC
- C. IDoc
- D. OData

Answer: A,D

Explanation:

For clean core integrations in SAP S/4HANA (minimizing custom code):

* SOAP (A): SAP recommends SOAP APIs for robust, secure integrations (e.g., enterprise services), supporting clean core by leveraging standard interfaces.

* OData (D): OData is the preferred RESTful API type for S/4HANA, enabling flexible, standard integrations (e.g., via SAP Gateway), a cornerstone of clean core.

* RFC (B): Remote Function Calls are legacy and less favored for clean core due to tight coupling.

* IDoc (C): IDocs are traditional EDI-focused, not prioritized for modern clean core integrations.

Thus, "SOAP" and "OData" are the correct answers. References: SAP Help Portal - "Integration APIs in S/4HANA"; SAP S/4HANA Developer Guide - "Clean Core APIs".

NEW QUESTION # 11

You want to transfer an inspection result to a batch characteristic value. What is a prerequisite for inspection planning?

- A. Assignment of a class characteristic to a master inspection characteristic
- B. Assignment of an inspection method to the inspection characteristic
- C. Assignment of an inspection characteristic to the inspection specification
- D. Assignment of a class characteristic to the inspection specification

Answer: A

Explanation:

Transferring inspection results to a batch characteristic in SAP QM (e.g., during results recording) requires linking QM and batch management (LO-BM). The prerequisite in inspection planning is:

* Assignment of a Class Characteristic to a Master Inspection Characteristic (B): To transfer results, the MIC (transaction QS21) must be linked to a class characteristic (transaction CT04) used in the batch class (transaction CL01). This is configured in the MIC by assigning the class characteristic, enabling the system to update batch values (e.g., potency) from inspection results. This is a standard prerequisite (SPRO > Quality Management > Inspection Planning > Basic Data > MIC).

* Assignment of a Class Characteristic to the Inspection Specification (A): Inspection specifications (e.g., material specs) don't directly link to class characteristics for this purpose; the link is via MICs.

* Assignment of an Inspection Characteristic to the Inspection Specification (C): This refers to planning setup but doesn't address batch transfer specifically.

* Assignment of an Inspection Method to the Inspection Characteristic (D): Methods guide execution, not batch value transfer.

Thus, "Assignment of a class characteristic to a master inspection characteristic" is the correct answer.

References: SAP Help Portal - "Batch Management Integration with QM"; SAP S/4HANA QM User Guide - "Results Recording".

NEW QUESTION # 12

What causes the system to issue a message to prevent you from closing a notification?

- A. Open activities
- B. Missing catalog profile
- C. Missing complaint quantity
- D. Open tasks

Answer: D

NEW QUESTION # 13

The IMG includes a customizing activity in which you assign object categories to a notification type? Which of the following object category already exist in standard setting? (3 Correct Ans)

- A. Serial Number
- B. Batch
- C. Material
- D. Order(pp-pi)
- E. Purchase order item

Answer: A,B,C

NEW QUESTION # 14

Which task list type is used for inspection lots with inspection lot origin 03 Production? Note: There are 2 correct answers to this question.

- A. Routing
- B. Master recipe
- C. Inspection plan
- D. Equipment task list

Answer: A,C

Explanation:

Inspection lots with origin 03 (Production) in SAP QM are triggered during production processes (e.g., order release or goods receipt). The task list types used are:

* Routing (B): In production (PP), routings (transaction CA01) define operations and can include QM- relevant operations with inspection characteristics. For inspection lot origin 03, the system uses routings when QM is integrated with PP, especially for in-process inspections.

* Inspection Plan (D): The inspection plan (transaction QP01) is the primary QM task list for origin 03, defining detailed inspection steps (e.g., characteristics, sampling) for production-related lots, such as goods receipt from production.

* Master Recipe (A): Used in Process Industries (PP-PI) for recipes (transaction C201), not standard for discrete manufacturing origin 03 lots.

* Equipment Task List (C): Relevant for Plant Maintenance (PM), not production QM lots.

Thus, "Routing" and "Inspection plan" are the correct answers for origin 03. References: SAP Help Portal - "Inspection Lot Origin 03"; SAP S/4HANA QM Customizing Guide - "Inspection Lot Creation".

NEW QUESTION # 15

.....

Under the dominance of knowledge-based economy, we should keep pace with the changeable world and renew our knowledge in pursuit of a decent job and higher standard of life. In this circumstance, possessing a C-TS414-2023 certification in your pocket can totally increase your competitive advantage in the labor market and make yourself distinguished from other job-seekers. Therefore our C-TS414-2023 Study Guide can help you with dedication to realize your dream. And only after studying with our C-TS414-2023 exam questions for 20 to 30 hours, you will be able to pass the C-TS414-2023 exam.
