# New NS0-185 Test Online - Pass NS0-185 in One Time

As the saying goes, knowledge has no limits. You may be old but the spirit of endless learning won't be old. If you attend the test of NS0-185 certification you will update your stocks of knowledge and improve your actual abilities, buying our NS0-185 exam practice materials can help you pass the test smoothly. There are no threshold limits to attend the NS0-185 test such as the age, sexuality, education background and your job conditions, and anybody who wishes to improve their volume of knowledge and actual abilities can attend the NS0-185 test.

We provide 3 versions of our NS0-185 exam torrent and they include PDF version, PC version, APP online version. Each version's functions and using method are different and you can choose the most convenient version which is suitable for your practical situation. For example, the PDF version is convenient for you to download and print our NS0-185 Test Torrent and is suitable for browsing learning. If you use the PDF version you can print our NS0-185 guide torrent on the papers. The PC version of our NS0-185 exam questions can stimulate the real exam's environment.

## How to Crack Network Appliance NS0-185 Certification Exam Easily?

There are lots of benefits of obtaining a certificate, it can help you enter a better company, have a high position in the company, improve you wages etc. Our NS0-185 test materials will help you get the certificate successfully. We have channel to obtain the latest information about the exam, and we ensure you that you can get the latest information about the NS0-185 Exam Dumps timely. Furthermore, you can get the downloading link and password for NS0-185 test materials within ten minutes after purchasing.

## Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q12-Q17):

**NEW QUESTION # 12**
You are setting up a LIF for the node management network.
What will be the default failover policy in this scenario?

- A. broadcast-domain-wide
- B. sfo-partner-only
- C. local-only
- D. system-defined

**Answer: C**

Explanation:
Node management LIFs are used to manage individual nodes within an ONTAP cluster. These LIFs are designed to remain on the node they manage and are not intended to move during failover events.
By default, a node management LIF uses the local-only failover policy. This ensures that the LIF remains bound to ports on the same node and does not migrate to other nodes. This behavior preserves administrative clarity and prevents confusion when accessing node-specific management interfaces.
Other failover policies, such as broadcast-domain-wide or sfo-partner-only, are used for data or cluster management LIFs where

mobility is required for availability. System-defined is not a failover policy type.
Therefore, the correct answer isC (local-only).

## NEW QUESTION # 13
You have a 4-node FAS8060 cluster. You use the vol move command to relocate a volume from an aggregate on node 1 to an aggregate on node 4.
In this scenario, which network is used for the traffic being relocated?

- A. the intercluster network
- B. the node management network
- C. the HA interconnect
- D. the cluster interconnect

**Answer: D**

## NEW QUESTION # 14
Before expanding a cluster, which two ONTAP configuration backup methods are available? (Choose two.)

- A. storage VM
- B. node
- C. cluster
- D. switch

**Answer: C,D**

## NEW QUESTION # 15
A customer is asked to install a new AFF ASA A700 system. During the installation, the customer asks if ONTAP 9.8 is supported with their host's OS version running Windows 2016.
In this scenario, which NetApp tool would verify supportability?

- A. Active IQ OneCollect
- B. ONTAP System Manager
- C. Active IQ Unified Manager
- D. Interoperability Matrix Tool

**Answer: D**

Explanation:
Verifying interoperability between ONTAP versions, storage platforms, host operating systems, protocols, and host utilities is a mandatory step in NetApp solution assessment and installation planning. The Interoperability Matrix Tool (IMT)is the authoritative NetApp resource used to confirm whether a specific combination of components is supported.
In this scenario, the customer needs to verify thatONTAP 9.8is supported withWindows Server 2016on an AFF ASA A700 system. IMT allows administrators to search by storage OS version, platform model, host OS, protocol (iSCSI, FC, NVMe), and host utilities to ensure the configuration is supported.
ONTAP System Manager is used for system administration, not supportability validation. Active IQ Unified Manager focuses on monitoring and performance. Active IQ OneCollect is used for data collection, not compatibility verification.
Therefore, the correct tool is theInteroperability Matrix Tool.

## NEW QUESTION # 16
A customer has a 2-node FAS8200 cluster with four DS212C shelves with 10 TB SATA drives.
Referring to the exhibit, an aggregate will be created with which default RAID type?

- A. RAID-TEC
- B. RAID4
- C. RAID-DP
- D. RAID1

**Answer: C**

Explanation:
ONTAP 9.x defaults toRAID-DPfor SATA, NL-SAS, SAS, and SSD aggregates unless specific conditions require RAID-TEC.
RAID-DP provides double-parity protection, allowing the system to withstand two simultaneous disk failures, which is essential for large-capacity SATA drives such as 10 TB disks.
RAID-TEC is reserved for very large aggregates with higher disk counts and is not the default. RAID4 and RAID1 are not used as default aggregate RAID types in ONTAP 9.
Therefore, the aggregate will be created withRAID-DP.

**NEW QUESTION # 17**

......

Users of this format don't need to install excessive plugins or software to attempt the NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) web-based practice exams. Another format of the NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) practice test is the desktop-based software. This NS0-185 Exam simulation software needs installation only on Windows computers to operate. The third format of the TestPassKing Network Appliance NS0-185 exam dumps is the NS0-185 Dumps PDF.
