- A. Project Quality Management
- B. Project Integration Management
- **C. Project Communications Management**
- D. Project Risk Management

**Answer: C**

Explanation:

Section: Volume E

Explanation:

#### **PROJECT COMMUNICATIONS MANAGEMENT**

Project Communications Management includes the processes that are required to ensure timely and appropriate planning, collection, creation, distribution, storage, retrieval, management, control, monitoring, and the ultimate disposition of project information. Project managers spend most of their time communicating with team members and other project stakeholders, whether they are internal (at all organizational levels) or external to the organization.

Effective communication creates a bridge between diverse stakeholders who may have different cultural and organizational backgrounds, different levels of expertise, and different perspectives and interests, which impact or have an influence upon the project execution or outcome.

#### **NEW QUESTION # 152**

The project manager and the project team are having a meeting with the purpose of identifying risks. Which tools and techniques might help in this process?

- A. Prompt lists and data analysis
- B. Data analysis and risk audits
- **C. Reports and representations of uncertainty**
- D. Interpersonal and team skills and project management information system

**Answer: C**

Explanation:

Section: Volume E
