ITCertMagic UiPath UiPath-ADPv1 PDF

Here, we want to describe the UiPath-ADPv1 PC test engine for all of you. UiPath-ADPv1 PC test engine is suitable for all the windows system, which is very convenient to be installed. Besides, it does not need to install any assistant software. What's more, our UiPath-ADPv1 PC test engine is virus-free and safe which can be installed on your device. With the UiPath UiPath-ADPv1 simulate test, you can have a test just like you are in the real test environment. Dear, everyone, practice more frequently, you will success finally.

UiPath (ADPv1) Automation Developer Professional Sample Questions (Q91-Q96):

NEW QUESTION # 91
A developer creates a process that uses data from multiple sources and uploads it to an Orchestrator queue.
The data originates from emails in different email inboxes and needs to be processed in the same order in which the email was received. To ensure the Queue Items are processed in the correct order, which property of the Add Queue Item activity should be used?

- A. Deadline
- B. Postpone
- C. Reference
- D. ItemInformation

Answer: B

Explanation:
To ensure the Queue Items are processed in the correct order, the Postpone property of the Add Queue Item activity should be used. The Postpone property allows you to specify the date and time after which the queue item can be processed. This property can be used to prioritize the queue items based on the order of the emails received. For example, if the email was received at 10:00 AM, the Postpone property can be set to 10:00 AM or later, so that the queue item will not be processed before that time. The Postpone property can be set to a DateTime value, a variable, or an expression that returns a DateTime value. For example, the following expression sets the Postpone property to the current date and time plus one hour:
VB DateTime.Now.AddHours(1)

NEW QUESTION # 92
What is the purpose of the Interval filter in the Orchestrator's Monitoring page?

- A. It allows you to choose between background and foreground processes for the displayed data.
- B. It allows you to allocate licenses per machine for the displayed data.
- C. It enables you to sort the displayed data based on job priorities.
- D. It allows you to control the granularity of the displayed data and check the health of your system in either the last day or the last hour.

Answer: D

NEW QUESTION # 93
Where is the TransactionNumber incremented in the REFramework?

- A. In the RetryCurrentTransaction.xaml workflow and in the SetTransactionStatus.xaml workflow.
- B. Only in the SetTransactionStatus.xaml workflow.
- C. In the New Transaction transition.
- D. Only in the RetryCurrentTransaction.xaml workflow.

Answer: B

NEW QUESTION # 94
Given the following workflow:
What will be the output of the Log Message activity?

- A. apple, pear, orange, mango, kiwi
- B. "apple pear orange", "mango kiwi"
- C. apple pear orange, mango kiwi
- D. apple, pear, orange

Answer: A

NEW QUESTION # 95

What are the possible statuses after running any REFramework test case?

- A. MANUAL or AUTOMATIC.
- B. PASS or FAIL.
- C. SUCCESS or EXCEPTION.
- D. EXPECTED or ACTUAL.

Answer: B

Explanation:
After running any REFramework test case, the possible statuses are "PASS" or "FAIL". These indicate whether the test case succeeded or encountered an issue, respectively.

NEW QUESTION # 96
