

Oracle 1Z0-1163-1 Simulationsfragen - 1Z0-1163-1 Lernhilfe

P.S. Kostenlose und neue 1Z0-1163-1 Prüfungsfragen sind auf Google Drive freigegeben von ExamFragen verfügbar:
https://drive.google.com/open?id=1byLLk_flGNRHMIpEpUCdqqjEYjsmZ0M

Wir ExamFragen sind die professionellen Anbieter der Schulungsunterlagen zur Oracle 1Z0-1163-1 Zertifizierungsprüfung. Seit langem betrachten wir ExamFragen das Angebot der besten Prüfungsunterlagen zur Oracle 1Z0-1163-1 Zertifizierungsprüfung als unser Ziel. Verglichen zu anderen Webseiten, wir ExamFragen sind immer von anderen vertraut. Warum? Weil wir ExamFragen vieljährige Erfahrungen haben, aufmerksam auf die IT-Zertifizierung-Studie machen und viele Prüfungsregeln sammeln. Damit können wir ExamFragen sehr hohe Hit-Rate haben. Das gewährleistet die Durchlaufrate.

Oracle 1Z0-1163-1 Prüfungsplan:

Thema	Einzelheiten
Thema 1	• OMBPs for Order Management: This section evaluates the proficiency of Order Fulfillment Analysts in managing Oracle Cloud's order management modules. It covers the process flow and integration of different components to streamline order processing. Candidates will study key design considerations and metrics related to customer satisfaction, order fulfillment efficiency, and accuracy in managing customer demand.
Thema 2	• Oracle Cloud Success Navigator & Oracle Cloud Quality Standards: This section evaluates the skills of Cloud Implementation Managers in leveraging Oracle Cloud Success Navigator and Quality Standards for cloud adoption. It explains how best practices are embedded into Oracle Cloud Applications and applied using Starter Configuration. Candidates will understand how to optimize cloud performance and ensure successful deployments following Oracle's quality guidelines.
Thema 3	• OMBPs for Innovation: This section evaluates the expertise of Supply Chain Innovation Analysts in leveraging SCM Innovation modules. It focuses on understanding the functionalities that drive product development and improving time-to-market. Candidates will explore key design considerations, best practices, and performance metrics that ensure faster product launches and enhanced innovation processes.
Thema 4	• OMBPs for Procurement: This section tests the abilities of Procurement Specialists in managing procurement operations within Oracle Cloud Applications. It covers the flow of procurement processes, integration points with other SCM modules, and best practices for improving procurement efficiency. Candidates will gain insights into the key metrics used to evaluate procurement performance and cost-effectiveness.

Thema 5	• Oracle Cloud Applications and Oracle Modern Best Practice (OMBP): This section of the exam measures the skills of Cloud Application Consultants in understanding Oracle Cloud Applications and their capabilities. It covers the key offerings within the Oracle Cloud ecosystem and highlights the features of the Oracle SCM suite. Candidates will learn about data flow between the SCM OMBPs and how these processes optimize supply chain management.
Thema 6	• OMBPs for Manufacturing: This section measures the skills of Manufacturing Operations Managers in utilizing Oracle Cloud's manufacturing capabilities. It explains the flow of manufacturing processes, module integration, and best practices that enhance operational efficiency. Candidates will analyze metrics that assess productivity, cost control, and overall manufacturing performance.
Thema 7	• OMBPs for Logistics: This section tests the expertise of Logistics Coordinators in optimizing logistics and transportation management within Oracle Cloud Applications. It covers the process flows, best practices for logistics operations, and integration of different logistics modules. Candidates will understand performance metrics that impact supply chain visibility, efficiency, and customer satisfaction.
Thema 8	• OMBPs for Sustainability: This section assesses the knowledge of Sustainability Specialists in integrating environmental and social responsibility into supply chain and procurement processes. It focuses on the benefits of aligning sustainability goals with business operations, ensuring compliance with global regulations, and implementing eco-friendly best practices.

Oracle 1Z0-1163-1 Lernhilfe & 1Z0-1163-1 Pruefungssimulationen

Sie können jetzt Oracle 1Z0-1163-1 Zertifikat erhalten. Unser ExamFragen bietet die neue Version von Oracle 1Z0-1163-1 Prüfung. Sie brauchen nicht mehr, die neuesten Schulungsunterlagen von Oracle 1Z0-1163-1 zu suchen. Weil Sie die besten Schulungsunterlagen von Oracle 1Z0-1163-1 gefunden haben. Benutzen Sie beruhigt unsere 1Z0-1163-1 Schulungsunterlagen. Sie werden sicher die Oracle 1Z0-1163-1 Zertifizierungsprüfung bestehen.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 1Z0-1163-1 Prüfungsfragen mit Lösungen (Q47-Q52):

47. Frage

What is a key advantage of the Production Order to Cost Update OMBP in Oracle Fusion Cloud SCM?

- A. It provides real-time cost updates, ensuring immediate financial benefits.
- **B. It provides accurate cost calculations, leading to better decision-making and improved profitability.**
- C. It enhances customer relationship management, leading to effective cost analysis.
- D. It automates the production process, requiring minimal human supervision.

Antwort: B

Begründung:

The Production Order to Cost Update process within Oracle Manufacturing Business Process (OMBP) in Oracle Fusion Cloud SCM ensures accurate cost calculations by capturing and updating costs associated with production orders, such as materials, labor, and overhead. This accuracy supports better decision-making and improves profitability by enabling precise cost analysis and pricing strategies. Option A is irrelevant as it ties to CRM, not cost updates. Option B exaggerates automation-human oversight remains necessary. Option D focuses on real-time updates, which is secondary to the primary benefit of accuracy emphasized in Oracle documentation.

48. Frage

Which feature in Oracle Fusion Cloud SCM tracks and manages real-time production processes?

- **A. Manufacturing Execution.**
- B. Inventory Management.

- C. Supplier Qualification.
- D. Cost Accounting.

Antwort: A

Begründung:

Manufacturing Execution (C) in Oracle Fusion Cloud SCM tracks and manages real-time production processes on the shop floor, capturing data like work order progress, material usage, and labor hours. For example, if a worker completes 100 units, the system logs the time, resources consumed (e.g., 50 kg of steel), and any delays (e.g., machine downtime), providing live visibility. Option A (Supplier Qualification) evaluates suppliers, not production. Option B (Cost Accounting) analyzes costs post-production, not real-time processes. Option D (Inventory Management) tracks stock, not manufacturing activities. This feature ensures production aligns with schedules, identifies bottlenecks instantly, and feeds data into cost and quality systems, enhancing operational control.

49. Frage

What is the function of Manufacturing Execution in Oracle Fusion Cloud SCM?

- A. It focuses only on financial reporting for manufacturing expenses.
- **B. It tracks and manages real-time production processes on the shop floor.**
- C. It eliminates the need for supplier coordination in production planning.

Antwort: B

Begründung:

Manufacturing Execution in Oracle Fusion Cloud SCM is a critical function that tracks and manages real-time production processes on the shop floor, ensuring visibility and control over activities like work order execution, material consumption, and labor tracking. It captures data as production occurs-e.g., when a worker completes an assembly step or uses raw materials-allowing managers to monitor progress, identify bottlenecks, and ensure quality. Option A is incorrect because supplier coordination remains essential for raw material supply; Manufacturing Execution does not eliminate this need but integrates with it. Option C is wrong as financial reporting is handled by Cost Accounting, not Manufacturing Execution, though the latter provides data that feeds into cost calculations. For example, if a factory produces 100 units, Manufacturing Execution records the exact time, resources, and issues (e.g., machine downtime), enabling proactive adjustments. This real-time oversight improves efficiency, reduces waste, and ensures production aligns with planned schedules.

50. Frage

Which key metric measures the effectiveness of the Demand Forecast to Supply Plan OMBP?

- A. Supplier Service Quality.
- B. Supply Chain Flexibility.
- **C. Demand Fulfillment.**
- D. Lead Time Variability.

Antwort: C

Begründung:

The Demand Forecast to Supply Plan OMBP in Oracle Fusion Cloud SCM bridges demand forecasting with supply planning, and its effectiveness is best measured by Demand Fulfillment-the percentage of demand met on time and in full. This metric evaluates how well the supply plan, derived from forecasts, satisfies actual customer orders. For example, if a forecast predicts 500 units and the supply plan delivers 480 units on time, the fulfillment rate is 96%. Option A (Lead Time Variability) assesses supplier performance, not the forecast-to-plan process. Option B (Supplier Service Quality) focuses on supplier reliability, a separate concern. Option C (Supply Chain Flexibility) measures adaptability, not direct fulfillment success. Demand Fulfillment ties directly to the OMBP's goal of aligning supply with demand, ensuring customer satisfaction and operational efficiency while minimizing excess inventory or stockouts.

51. Frage

What is a key feature of the Back-to-Back Order Fulfillment process in Oracle Fusion Cloud SCM?

- A. It delays order fulfillment until inventory is replenished.
- **B. It links customer orders to supplier purchase orders, ensuring direct fulfillment.**

- C. It prioritizes warehouse stock over supplier sourcing.

Antwort: B

Begründung:

The Back-to-Back Order Fulfillment process (A) in Oracle Fusion Cloud SCM links customer orders directly to supplier purchase orders, ensuring seamless fulfillment without relying solely on existing inventory. When a customer order is placed, the system automatically generates a corresponding PO to the supplier, who ships the goods directly or via the warehouse to the customer. For example, if a retailer orders a custom machine not in stock, Back-to-Back triggers a PO to the manufacturer, streamlining delivery. Option B is incorrect-it aims for efficiency, not delays. Option C is wrong-it prioritizes supplier sourcing over warehouse stock when needed. This feature reduces inventory holding costs, improves cash flow, and ensures timely delivery, making it ideal for make-to-order scenarios.

52. Frage

.....

Die Oracle 1Z0-1163-1 Prüfung zu bestehen ist eigentlich nicht leicht. Trotzdem ist die Zertifizierung nicht nur ein Beweis für Ihre IT-Fähigkeit, sondern auch ein weltweit anerkannter Durchgangsausweis. Auf Oracle 1Z0-1163-1 vorzubereiten darf man nicht blindlings. Die Technik-Gruppe von uns ExamFragen haben die Prüfungssoftware der Oracle 1Z0-1163-1 nach der Mnemotechnik entwickelt. Sie kann mit vernünftiger Methode Ihre Belastungen der Vorbereitung auf Oracle 1Z0-1163-1 erleichtern.
