If you want to participate in the IT industry's important CheckPoint 156-215.82 examination, it is necessary to select PremiumVCEDump CheckPoint 156-215.82 exam training database. Through CheckPoint 156-215.82 examination certification, you will be get a better guarantee. In your career, at least in the IT industry, your skills and knowledge will get international recognition and acceptance. This is one of the reasons that why lot of people choose CheckPoint 156-215.82 certification exam. So this exam is increasingly being taken seriously. So this exam is increasingly being taken seriously. PremiumVCEDump CheckPoint 156-215.82 Exam Training materials can help you achieve your aspirations. PremiumVCEDump CheckPoint 156-215.82 exam training materials are produced by the experienced IT experts, it is a combination of questions and answers, and no other training materials can be compared. You do not need to attend the expensive training courses. The CheckPoint 156-215.82 exam training materials of PremiumVCEDump add to your shopping cart please. It is enough to help you to easily pass the exam.

The majority of people encounter the issue of finding extraordinary CheckPoint 156-215.82 exam dumps that can help them prepare for the actual CheckPoint 156-215.82 Exam. They strive to locate authentic and up-to-date CheckPoint 156-215.82 practice questions for the Check Point Certified Security Administrator - R82 exam, which is a tough ask.

## Practice Test 156-215.82 Pdf | Reliable 156-215.82 Exam Review

The three versions of our 156-215.82 training materials each have its own advantage, now I would like to introduce the advantage of the software version for your reference. On the one hand, the software version can simulate the real 156-215.82 examination for all of the users in windows operation system. By actually simulating the real test environment, you will have the opportunity to learn

and correct your weakness in the course of study. So that you can get your best pass percentage by our 156-215.82 Exam Questions.

## CheckPoint Check Point Certified Security Administrator - R82 Sample Questions (Q135-Q140):

### NEW QUESTION # 135

What is the benefit to use Log Indexing?

- A. Log entries are checked for duplicates, which are then deleted due to space constraints
- B. The logs will consume less disk space
- C. It allows faster queries
- D. By indexing the log entries, you can get the whole time line of an infection of end entities

**Answer: C**

Explanation:

The correct answer is A. The benefit of Log Indexing is faster log searching and querying. In Check Point R82, logs can be indexed so SmartConsole Logs & Events and SmartView can return query results more efficiently, especially in environments generating large volumes of Firewall, VPN, HTTPS Inspection, Application Control, URL Filtering, and Threat Prevention logs. Option B is wrong because indexing does not primarily reduce disk usage; it can actually require additional storage because index data must be maintained. Option C describes investigation value that may come from correlated logs and event analysis, but it is not the direct benefit of indexing itself. Option D is incorrect because Log Indexing is not a duplicate-removal mechanism. The operational value is speed: indexed logs let administrators investigate faster by searching fields, actions, sources, destinations, users, blades, and time ranges more efficiently. Reference topics: Logging and Monitoring, Log Indexing, SmartConsole Logs & Events, custom log queries.

### NEW QUESTION # 136

Which of the following is NOT an option to calculate the traffic direction?

- A. Internal
- B. Incoming
- C. Outgoing
- D. External

**Answer: C**

Explanation:

The options to calculate the traffic direction are Incoming, Internal, and External. Outgoing is not an option. Incoming traffic is traffic that enters the Security Gateway from an external network. Internal traffic is traffic that originates and terminates in networks that are directly connected to the Security Gateway. External traffic is traffic that originates or terminates in networks that are not directly connected to the Security Gateway. Check Point R81 Security Management Administration Guide

### NEW QUESTION # 137

Which statement is NOT TRUE about Delta synchronization?

- A. Using UDP Multicast or Broadcast on port 8161
- B. Transfers changes in the Kernel tables between cluster members
- C. Using UDP Multicast or Broadcast on port 8116
- D. Quicker than Full sync

**Answer: A**

Explanation:

The statement that is not true about Delta synchronization is that it uses UDP Multicast or Broadcast on port 8161. The correct port number for Delta synchronization is 8116. The other statements are true about Delta synchronization. ClusterXL Administration Guide R81, Check Point CCSA - R81: Practice Test & Explanation

### NEW QUESTION # 138

How are the backups stored in Check Point appliances?

- A. Saved as\*.tgz under /var/CPbackup
- B. Saved as\*.tar under /var/CPbackup
- C. Saved as\*.tar under /var/log/CPbackup/backups
- D. Saved as\*.tgz under /var/log/CPbackup/backups

**Answer: A**

Explanation:

The backups are stored in Check Point appliances as \*.tgz files under /var/CPbackup. This is the default location for backup files created by the backup command. Therefore, the correct answer is B. Saved as \*.tgz under /var/CPbackup

### NEW QUESTION # 139

What is the role of the "Perimeter" profile in Autonomous Threat Prevention?

- A. It is used to monitor traffic without enforcement
- B. It is a default profile for any security deployment
- C. It provides aggressive protection for north-south traffic
- D. To simulate protection without enforcement

**Answer: C**

Explanation:

The correct answer is A. The Perimeter profile is designed for perimeter gateway protection, where traffic commonly flows north-south between internal users/servers and external networks such as the internet. Official R82 Autonomous Threat Prevention documentation describes perimeter profiles as optimized for perimeter gateways to prevent cyberattacks and protect users browsing the web, data centers, incoming email, and FTP. Option B and D describe the Monitor profile concept, where detection/simulation can occur without enforcement impact. Option C is misleading: Recommended for Perimeter may be a default or recommended profile in many deployments, but not every security deployment should use the same perimeter profile. Cloud/data center, internal network, and guest network profiles exist because different segments have different traffic patterns and risk models. The core role of the Perimeter profile is strong protection for external-facing north-south exposure.

Reference topics: Autonomous Threat Prevention Profiles, Recommended for Perimeter, Strict Security for Perimeter, north-south traffic protection.

### NEW QUESTION # 140

.....

Our world is in the state of constant change and evolving. If you want to keep pace of the time and continually transform and challenge yourself you must attend one kind of 156-215.82 certificate test to improve your practical ability and increase the quantity of your knowledge. Buying our 156-215.82 Study Materials can help you pass the test smoothly. Our 156-215.82 study materials have gone through strict analysis and verification by senior experts and are ready to supplement new resources at any time.
