The content system of NCP-US exam simulation is constructed by experts. After-sales service of our NCP-US study materials is also provided by professionals. If you encounter some problems when using our products, you can also get them at any time. After you choose NCP-US preparation questions, professional services will enable you to use it in the way that suits you best, truly making the best use of it, and bringing you the best learning results. Our NCP-US Study Materials have a professional attitude at the very beginning of its creation for you to get your certification.

The NCP-US certification exam is specifically designed to validate the skills and knowledge of IT professionals who work with the Nutanix platform. NCP-US exam covers a range of topics, including the design, deployment, and management of Nutanix storage solutions. NCP-US exam also covers the various features and capabilities of the Nutanix platform, including data protection, disaster recovery, and security.

Nutanix Certified Professional - Unified Storage (NCP-US) v6 exam is a valuable certification for IT professionals who work with Nutanix storage solutions. NCP-US exam tests candidates' knowledge and skills in various areas related to Nutanix storage, including installation, configuration, and management of Nutanix clusters. Nutanix Certified Professional - Unified Storage v6.5 certification is highly valued by employers and can help professionals advance their careers in the IT industry. Candidates who want to prepare for the exam should take advantage of the many resources available, including training courses, practice exams, and study guides.

The NCP-US Exam is based on the Nutanix Enterprise Cloud OS, which is a software-defined infrastructure platform designed for building and operating hybrid clouds. NCP-US exam tests the candidate's ability to work with Nutanix storage solutions and covers topics such as Nutanix storage architecture, file and block services, data protection and disaster recovery, and storage management and monitoring.

NCP-US Interactive Questions & NCP-US Reliable Test Test

The ExamBoosts NCP-US PDF questions file, desktop practice test software, and web-based practice test software, all these three NCP-US practice test questions formats are ready for instant download. Just download any Nutanix NCP-US Exam Questions format and start this journey with confidence.

Nutanix Certified Professional - Unified Storage v6.5 Sample Questions (Q77-Q82):

NEW QUESTION # 77
An administrator needs to deploy Files Analytics (FA). After logging into the Prism management console using personal credentials, the administrator is not able to deploy the Virtual Appliance.
What action is needed to resolve this issue?

- A. Deploy FA using the Prism admin user account.
- B. Move FA to another storage container.
- C. Perform FA deployment in Prism Central,
- D. Download the FA Virtual Appliance.

Answer: C

Explanation:
Prism Central is a multi-cluster manager that provides a single, centralized management interface for Nutanix clusters running any hypervisor2. File Analytics (FA) is a service that enables you to monitor and analyze file activity on Nutanix Files clusters3. To deploy FA, you need to download the FA Virtual Appliance and import it into Prism Central3.
To deploy Files Analytics (FA), the deployment needs to be performed in Prism Central. When the administrator logs into the Prism management console using personal credentials, the administrator is not able to deploy the Virtual Appliance. Therefore, to resolve this issue, the administrator needs to perform the FA deployment using the Prism admin user account in Prism Central

NEW QUESTION # 78
What are the limitations for enabling Self-Service Restore (SSR) in a File Server? (Choose two.)

- A. SSR does not support SMB shares.
- B. SSR is not supported at the root of distributed shares or exports.
- C. SSR for SMB does not restore streams or attributes in directories.
- D. SSR does not support NFS shares.

Answer: B,D

NEW QUESTION # 79
An administrator has been tasked with creating a distributed share on a single-node cluster, but has been unable to successfully complete the task.
Why is this task failing?

- A. Number of distributed shares limit reached.
- B. File server version should be greater than 3.8.0
- C. Distributed shares require multiple nodes.
- D. AOS version should be greater than 6.0.

Answer: C

NEW QUESTION # 80

Which feature ensures that a host failure's impact on a Files cluster will be minimal?

- A. VM-VM anti-affinity rules
- B. VM-Host affinity rules
- C. VM-Host anti-affinity rules
- D. VM-VM affinity rules

Answer: C

Explanation:
These rules ensure that VMs are distributed across different hosts in a cluster, so that if one host fails, the impact on the VMs and their data will be minimal1. Nutanix Files also supports DFS-N (Distributed File System - Namespaces), which allows multiple file servers hosting the same data to support a common folder and provide site affinity for users2.

NEW QUESTION # 81

What is the result of an administrator applying the lifecycle policy "Expire current objects after # days/months/years" to an object with versioning enabled?

- A. The policy deletes any past versions of the object after the specified time and deletes any current version of the object.
- B. The policy does not delete the current version of the object after the specified time and does not delete any past versions of the object.
- C. The policy deletes any past versions of the object after the specified time and does not delete any current version of the object.
- D. The policy deletes the current version of the object after the specified time and does not delete any past versions of the object.

Answer: D

NEW QUESTION # 82

......
