Valid Braindumps IDP Torrent - Accurate IDP Exam Tool Guarantee Purchasing Safety

One of the advantages of the IDP training test is that we are able to provide users with free pre-sale experience, the IDP study materials pages provide sample questions module, is mainly to let customers know our part of the subject, before buying it, users further use our IDP Exam Prep. At the same time, it is more convenient that the sample users we provide can be downloaded PDF demo for free, so the pre-sale experience is unique. So that you will know how efficiency our IDP learning materials are and determine to choose without any doubt.

CrowdStrike IDP Exam Syllabus Topics:

Topic	Details
Topic 1	• Domain Security Assessment: Focuses on domain risk scores, trends, matrices, severity • likelihood • consequence factors, risk prioritization, score reduction, and configuring security goals and scopes.
Topic 2	• GraphQL API: Covers Identity API documentation, creating API keys, permission levels, pivoting from Threat Hunter to GraphQL, and building queries.
Topic 3	• Configuration and Connectors: Addresses domain controller monitoring, subnet management, risk settings, MFA and IDaaS connectors, authentication traffic inspection, and country-based lists.
Topic 4	• Identity Protection Tenets: Examines Falcon Identity Protection's architecture, domain traffic inspection, EDR complementation, human vulnerability protection, log-free detections, and identity-based attack mitigation.
Topic 5	• Threat Hunting and Investigation: Focuses on identity-based detections and incidents, investigation pivots, incident trees, detection evolution, filtering, managing exclusions and exceptions, and risk types.
Topic 6	• Risk Assessment: Covers entity risk categorization, risk and event analysis dashboards, filtering, user risk reduction, custom insights versus reports, and export scheduling.

Exam IDP Vce Format, Technical IDP Training

The CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) product can be easily accessed just after purchasing it from DumpsTorrent. You can receive free CrowdStrike Dumps updates for up to 1 year after buying material. The 24/7 support system is also available for you, which helps you every time you get stuck somewhere. Many students have studied from the DumpsTorrent CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) practice material and rated it positively because they have passed the IDP certification exam on the first try.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q28-Q33):

NEW QUESTION # 28
Which menu option isNOTincluded in Falcon Identity Threat Detection (ITD)?

- A. Privileged Identities

- B. Event Analysis
- C. Policy Rules
- D. Settings

Answer: C

Explanation:
Falcon Identity Threat Detection (ITD) providesvisibility, analytics, and detectionof identity-based threats but doesnot include enforcement capabilities. According to the CCIS curriculum, ITD customers have access to investigative and analytical features such asEvent Analysis,Privileged Identities, and relevant Settingsfor visibility and monitoring.
Policy Rules, however, are part ofIdentity Threat Protection (ITP)and reside in theEnforcesection of the Falcon console. Policy Rules enable automated responses and enforcement actions, such as blocking access or enforcing MFA, which are not available under ITD-only subscriptions.
This distinction is critical in the CCIS material:
* ITD = Detect and analyze identity threats
* ITP = Detect + enforce policy actions
Because ITD does not include enforcement functionality,Policy Rules are not available, makingOption Dthe correct answer.

NEW QUESTION # 29
When creating an API key, which scope should be selected to retrieve Identity Protection detection and incident information?

- A. Identity Protection Assessment
- B. Identity Protection Data
- C. Identity Protection Detections
- D. Identity Protection Incidents

Answer: C

Explanation:
To retrieve identity-based detections and incident-related data using the CrowdStrike APIs, the API key must include the correctpermission scope. According to the CCIS curriculum, theIdentity Protection Detections scope is required to access identity-based detection and incident information through GraphQL.
This scope allows API queries to retrieve:
* Identity-based detections
* Associated incident metadata
* Detection attributes such as severity, status, and related entities
Incident data in Falcon Identity Protection isderived from detections, making the Detections scope the authoritative permission set for this information. Without this scope, GraphQL queries related to identity detections and incidents will fail authorization.
The other scopes are either too narrow or unrelated to detection retrieval. Therefore,Option Ais the correct and verified answer.

NEW QUESTION # 30
Falcon Identity Protection monitors network traffic to build user behavioral profiles to help identify unusual user behavior. How can this be beneficial to create a Falcon Fusion workflow?

- A. Falcon Fusion is not identity based
- B. Falcon Fusion will only send emails to the user
- C. Falcon Fusion will only work with certain users
- D. Falcon Fusion works with your IT policy enforcement through the use of identity and behavioral analytics

Answer: D

Explanation:
Falcon Identity Protection continuously inspects authentication traffic and network behavior to establish behavioral baselines for users and accounts. These baselines enable the platform to detect deviations that indicate potential compromise, misuse, or insider threat activity. This behavioral intelligence directly enhances the effectiveness ofFalcon Fusion workflows.
Falcon Fusion leveragesidentity and behavioral analyticsas decision points within workflows, allowing automated actions to be triggered when abnormal behavior is detected. For example, a workflow can automatically enforce MFA, notify administrators, isolate risky sessions, or initiate remediation when a user deviates from their established baseline.
The CCIS curriculum highlights that Falcon Fusion is designed tointegrate identity risk signals with IT policy enforcement, enabling

Zero Trust-aligned automation. This capability goes far beyond simple notifications and supports coordinated responses across security and IT teams.
Options A, B, and C are incorrect because Falcon Fusion is fully identity-aware, applies broadly across users and entities, and supports a wide range of actions beyond email notifications. Therefore,Option Daccurately describes how behavioral profiling strengthens Falcon Fusion workflows.

NEW QUESTION # 31
The configuration of the Azure AD (Entra ID) Identity-as-a-Service connector requires which three pieces of information?

- A. Tenant Domain, Client Secret, User Identifier
- B. Tenant Domain, Application ID, Scope
- C. Tenant Domain, Application ID, Application Secret
- D. Tenant Domain, Token, Configuration File

Answer: C

Explanation:
To integrate Falcon Identity Protection withAzure AD (Entra ID)as an Identity-as-a-Service (IDaaS) provider, specific application-level credentials are required. According to the CCIS curriculum, the connector configuration requiresTenant Domain,Application (Client) ID, andApplication Secret.
These values are generated when registering an application in Azure AD and are used to authenticate Falcon Identity Protection securely via OAuth-based API access. This method ensures least-privilege access and allows the connector to ingest cloud authentication activity and apply SSO-related policy enforcement.
Other options list incomplete or incorrect credential combinations. Therefore,Option Dis the correct and verified answer.

NEW QUESTION # 32
The Enforce section of Identity Protection is used to:

- A. Gain an overview of the domain and indicate whether the domain follows best security practice
- B. View all identity-based detections and identity-based incidents in the environment
- C. Define policy rules that determine what actions to take in response to certain triggers observed in the environment
- D. Configure domains, appliances, subnets, connectors, risk configuration, and settings

Answer: C

Explanation:
The Enforce section of Falcon Identity Protection is dedicated to policy-based identity enforcement.
According to the CCIS curriculum, this section allows administrators to define and manage Policy Rules and Policy Groups that specify how the platform should respond when identity-related conditions are detected.
These rules evaluate triggers such as risky authentication behavior, privilege misuse, compromised credentials, or elevated risk scores, and then execute actions like blocking access, enforcing MFA, or initiating Falcon Fusion workflows. Enforce is therefore the execution layer of Falcon's identity security model.
The other options correspond to different sections of the platform:
Configuration tasks are handled in Configure.
Detections and incidents are reviewed in Monitor or Explore.
Domain posture overviews are displayed in Domain Security Overview.
Because Enforce directly controls what actions are taken in response to identity risk, Option B is the correct and verified answer.

NEW QUESTION # 33
.....

You can pass your CrowdStrike IDP certification exam in less time, without wasting time and money on outdated or unreliable CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam study materials. Don't let fear or a lack of resources hold you back from achieving your goals, trust DumpsTorrent CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) practice test material and achieve the highest marks in your CrowdStrike Certified Identity Specialist(CCIS) Exam (IDP) exam.
